

## IBD Celebrations in Ethiopia

***Prosopis juliflora***: One of the worst threats of Biodiversity in Ethiopia

Ethiopia will celebrate IBD by carrying out the following activities:

- One day workshop and field visit on sites where invasive species are a major threat to biodiversity, Eastern Ethiopia
- Distributing awareness materials such as brochure, booklet, posters, banners, etc. to relevant institutions working on IAS and affected areas
- Recognizing the efforts of institutions working on IAS by presenting Appreciation Certificates
- Cultural music and dances relevant to the problem of IAS
- Creating awareness using the mass media such as the National TV, Radio, and Newspapers
- Promoting the IBD and the theme “Invasive Alien Species” using IBC website ([www.ibc-et.org/biodiversity/ibd](http://www.ibc-et.org/biodiversity/ibd))
