

The **Caribbean Marine Environment** & the CBD Aichi Targets

YOU ARE NOT ALONE!

**...working together towards achieving the Aichi targets
in the (wider) Caribbean**

2 questions:

☐ how much does achieving your targets under your NBSAP depend on what “others” will do?

(countries, organizations, projects)

☐ where will a regional approach/regional collaboration be needed, or beneficial?

Countries &
territories in
the Caribbean

WECAFC

CARICOM
Secretariat

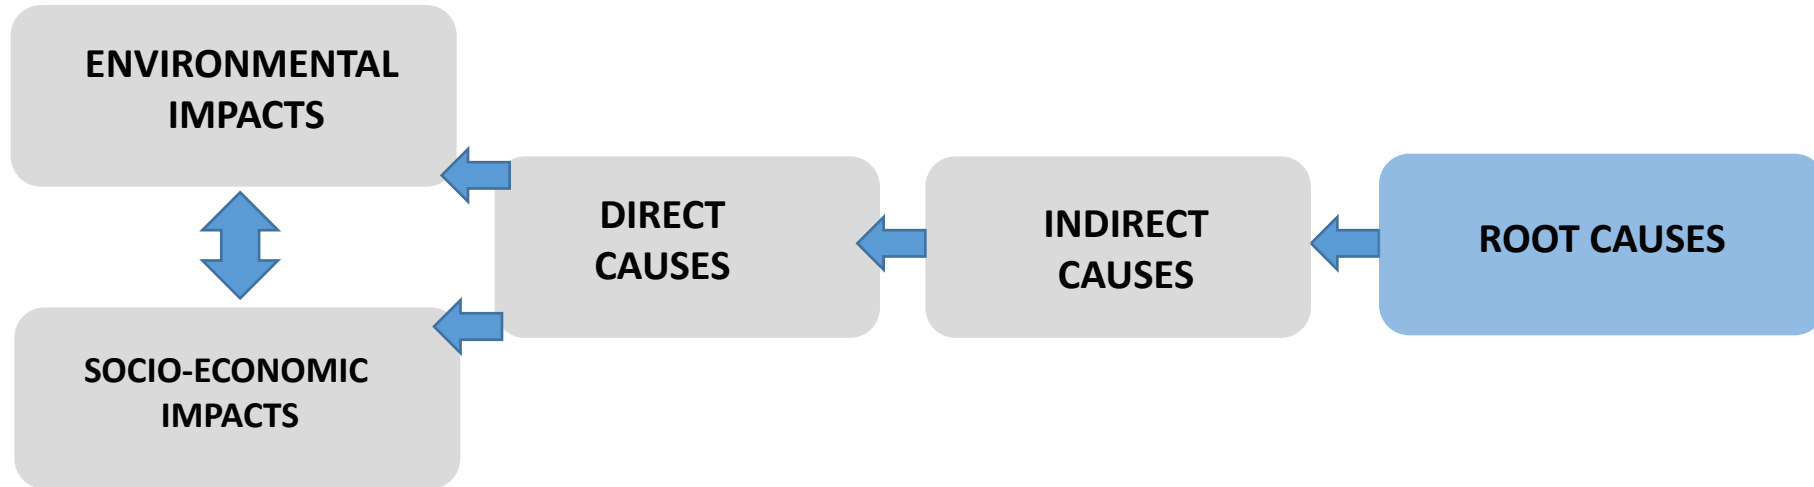

UNEP CEP
SPAW Protocol
RAC

the CLME+
initiative

OECS
ECROP

CRFM

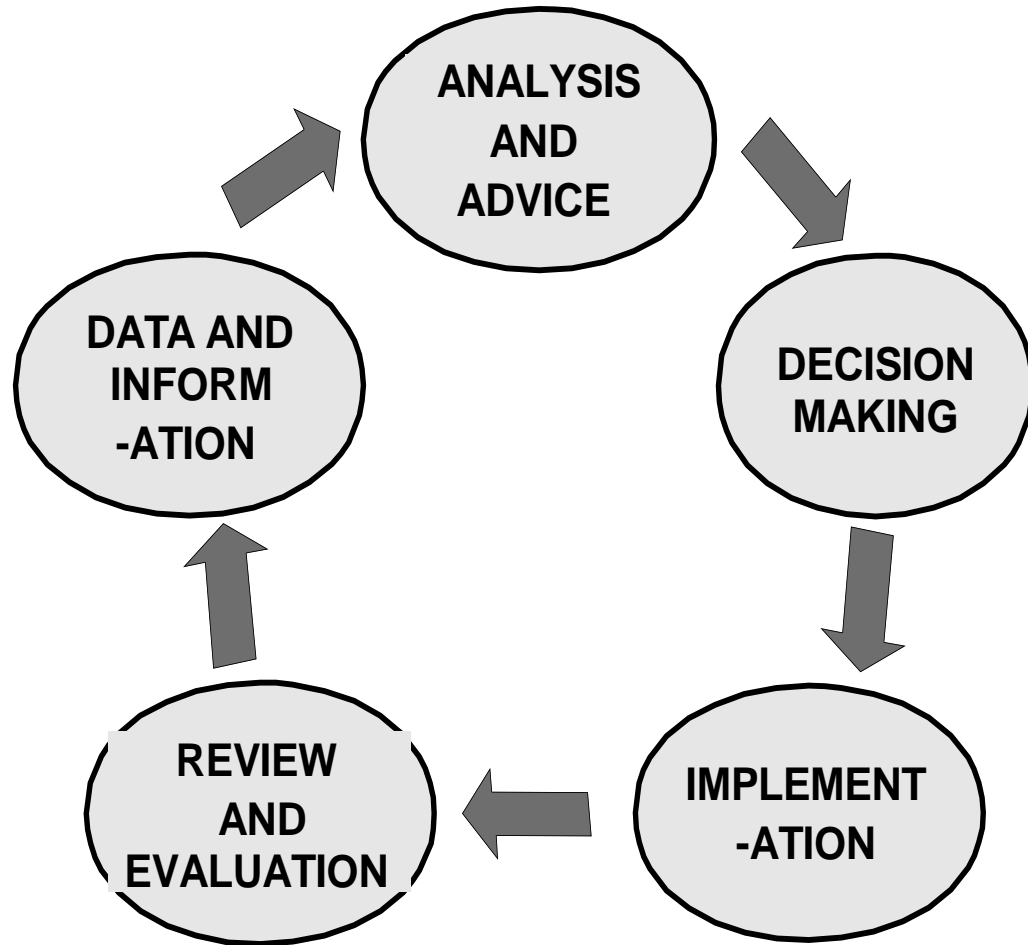

Causal-Chain Analysis

(Alternative to CCA = “DPSIR” (EEA):
Drivers – Pressure – Status – Impact – Response)

ROOT CAUSES OF THE 3 CLME+ ISSUES

- ☐ Weaknesses in governance arrangements
- ☐ Limited human & financial resources
- ☐ Lack of (access to) data & information
- ☐ Inadequate public awareness
- ☐ Valuation of ecosystem goods & services

Focus on Marine/Coastal

Target 5
loss/degradation
of habitat

Target 11
10% of coastal &
marine areas

Target 15
carbon stocks
