

The Lessons From Forest Restoration

**CBD workshop for SE Asia on Ecosystem Conservation and Restoration
Jambi, Indonesia – 28 April to 2 May 2014**

**BomKwon Chun
Senior Forestry Officer
Forest Resources Management Team
FAO Forestry Department**

Contents

I. Forest Resources

II. Forest Land use

III. Forest Administration

Planted 12 billion trees

- 1960s** Korea Forest Service (1967)
Fuelwood plantation, Erosion control
- 1970s ~ 1980s** 1st & 2nd Afforestation(1973 - 87)
Project to stop slash and burn
Plantation of species for erosion control
- 1990s** Forest tending program for
increasing economic value of trees
Policies for mountain village and forest recreation
- 2000~** Sustainable Forest Management(SFM)
Green Growth, Climate change policies

1. Plantation

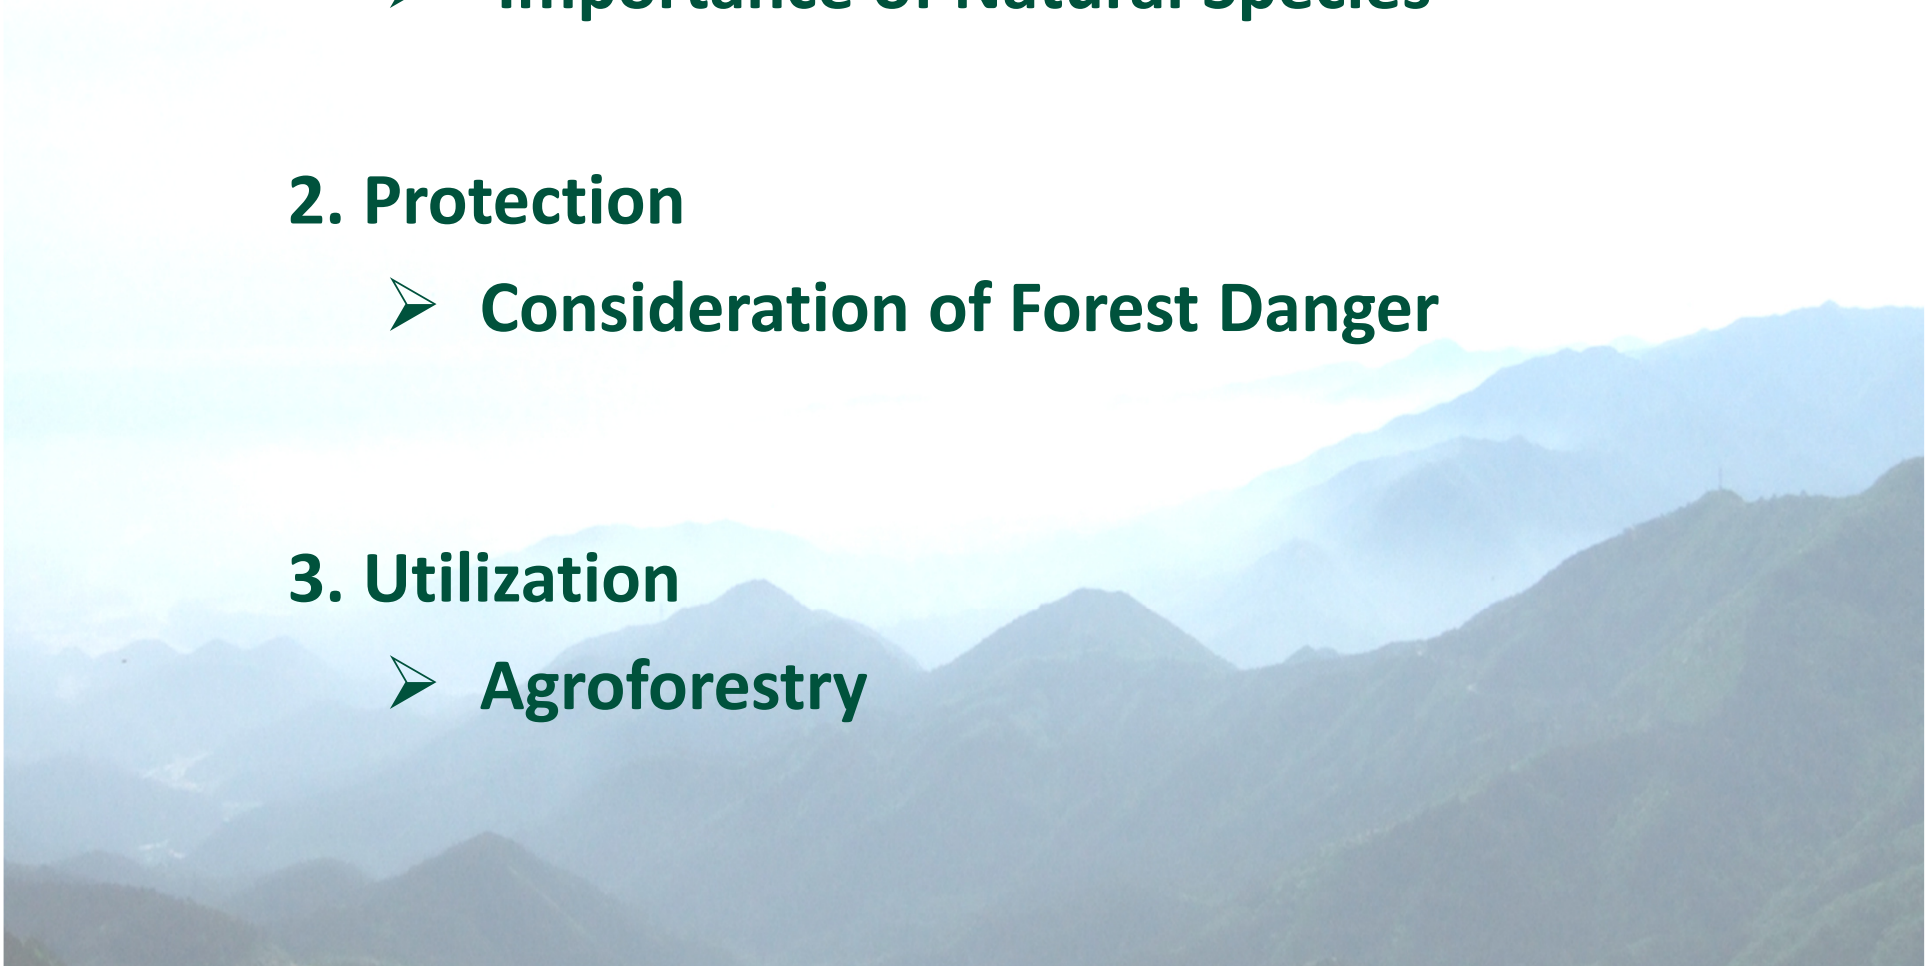

- Importance of Natural Species

2. Protection

- Consideration of Forest Danger

3. Utilization

- Agroforestry

1. Harmonized Zone

- **Consideration of stakeholder & dwellers**
- **Forestry welfare**

2. Supply for industry

1. Organization(Cooperation & Independence)

- Initial period of plantation
- Mature period of forests

2. Legislation

thank you!
