## Executive Summary

This Joint Submission examines the *Nagoya Protocol* on access and benefit sharing arising from the use of genetic resources. The new treaty was adopted in October 2010.

The central purpose of this Submission is to highlight substantive and procedural injustices in the *Protocol*, in relation to Indigenous peoples' human rights. These injustices detract from the legitimacy or validity of the *Protocol* and, therefore, merit serious attention and redress.

The importance of achieving an effective international regime on access and benefit sharing is beyond question. In relation to Indigenous peoples, such a regime must include a principled framework that fully safeguards their human rights and respects their right to full and effective participation.

Indigenous peoples and local communities continue to face dispossession and "biopiracy" in relation to their lands and resources. In the context of the *Protocol*, biopiracy refers to the unauthorized commercial or other use by third parties of genetic resources and traditional knowledge without sharing the benefits.

Indigenous peoples have an essential role in safeguarding biodiversity that benefits humankind. By respecting and protecting their rights, biodiversity objectives are strengthened.

The new *Protocol* implements a central objective of the 1992 *Convention on Biological Diversity*. In regard to the objective of benefit sharing, the *Convention* requires that such sharing be "fair and equitable ... taking into account all rights". States are required to exploit their own genetic resources "in accordance with the Charter of the United Nations and the principles of international law".

These essential obligations were not respected or fulfilled in the *Protocol*, when addressing the rights of Indigenous peoples and local communities.

In regard to the *Nagoya Protocol*, **substantive injustices** include *inter alia* the following:

- Indigenous peoples' human rights concerns were largely disregarded, contrary to the Parties' obligations in the *Charter of the United Nations*, *Convention* and other international law;
- progressive international standards, such as the *United Nations Declaration on the Rights of Indigenous Peoples* (UNDRIP) were not fully respected – despite the obligation in the *Protocol* that it be implemented "in a mutually supportive manner with other international instruments";
- repeated use of ambiguous and questionable phrases, such as "subject to national legislation" and "in accordance with national legislation" is not consistent with the requirement that national legislation be *supportive* of the "fair and equitable" objective of benefit sharing;
- excessive reliance on national legislation is likely to lead to serious abuses, in light of the history of violations and the *Protocol's* lack of a balanced framework;
- the phrase "indigenous and local communities" is used throughout the *Protocol*, even though "indigenous peoples" is the term now used for such peoples in the international human rights system.

Such denial of status often leads to a denial of self-determination and other rights, which would be discriminatory;

- in regard to access and benefit sharing of genetic resources, only “established” rights – and not other rights based on customary use – appear to receive some protection under domestic legislation. Such kinds of distinctions have been held to be discriminatory by the Committee on the Elimination of Racial Discrimination;
- “established” rights might only refer to situations where a particular Indigenous people or local community can demonstrate that its right to genetic resources is affirmed by domestic legislation, agreement or judicial ruling. This would be a gross distortion of the original intent. Massive dispossessions could result globally from such an arbitrary approach inconsistent with the *Convention*;
- “prior and informed consent” of Indigenous peoples was included in the *Protocol*, along with questionable and ambiguous terms that some States are likely to use to circumvent the obligation of consent;
- lack of Parties’ commitment to ethical conduct is exemplified by the Tkarihwaié:ri Ethical Code of Conduct, adopted by the Conference of the Parties – which Code stipulates that it “should not be construed as altering or interpreting the obligations of Parties to the Convention ... or any other international instrument” or altering domestic laws and agreements.

In regard to the *Nagoya Protocol*, **procedural injustices** include *inter alia* the following:

- The procedural dimensions of Indigenous peoples’ right to “full and effective participation” were not respected during the negotiations of the *Protocol* and in its final text;
- in relation to the formulation and adoption of national legislation and other measures, the democratic requirement of “full and effective participation” of Indigenous peoples and local communities is virtually unaddressed;
- key provisions relating to UNDRIP and “established” rights to genetic resources were negotiated in closed meetings, where representatives of Indigenous peoples and local communities were explicitly excluded; and
- some States exploited the practice of seeking consensus among the Parties, with a view to diminishing or ignoring the rights of Indigenous peoples and local communities and applying the *lowest common denominator* among the Parties’ positions.

This Joint Submission makes specific recommendations for fair and equitable implementation of the *Protocol*, as well as possible revisions to its text. Discriminatory and unjust dimensions of the *Protocol* all require redress – with the full and effective participation of Indigenous peoples and local communities at all stages.

In relation to Indigenous peoples and local communities, the *Protocol* must be consistent with the principles of justice, democracy, equality, non-discrimination, respect for human rights and rule of law. The rights, security and well-being of present and future generations must be ensured.

# **Nagoya Protocol on Access and Benefit Sharing: Substantive and Procedural Injustices relating to Indigenous Peoples' Human Rights**

*We need more than the rhetoric of justice. We need justice. ... It's not just what you stand for, it's what you stand up for.<sup>1</sup>*

*Hon. Rosalie Abella, Justice of the Supreme Court of Canada, 2010*

## **I. Introduction**

1. This Joint Submission examines the *Nagoya Protocol on Access to Genetic Resources and the Fair and Equitable Sharing of Benefits Arising from their Utilization to the Convention on Biological Diversity*,<sup>2</sup> in relation to Indigenous peoples. The *Protocol* was adopted at the tenth Conference of the Parties (COP 10) on 29 October 2010, in Nagoya, Japan.
2. We reiterate our strong support for the central objective of both the *Convention on Biological Diversity*<sup>3</sup> (CBD) and the *Nagoya Protocol*, namely, “*fair and equitable sharing of the benefits arising out of the utilization of genetic resources*”.<sup>4</sup> However, in relation to Indigenous peoples, the text of the *Protocol* exceeds the authority established under the *Convention* insofar as this new text may serve to undermine their human rights.
3. **The central purpose of this Joint Submission is to highlight substantive and procedural injustices in relation to Indigenous peoples' human rights in the Nagoya Protocol and related COP 10 Decisions.**<sup>5</sup> These injustices detract from the legitimacy or validity of the *Protocol* and, therefore, merit serious attention and redress. The Joint Submission does not preclude other concerns raised by Indigenous peoples and local communities.
4. We wish to thank those States that, at different times, spoke out in favour of Indigenous peoples' rights in the negotiations, recognizing that the text of the *Protocol* needed to be strengthened. As emphasized at the time of its adoption by Venezuela:

The document should further recognize the inalienable right of peoples who have preserved their in-depth knowledge on medicine and other areas, despite the genocide, humiliation and exclusion to which they have been subjected. We should ask ourselves whether the document in front of us meets those demands.<sup>6</sup>

## **II. Urgent Need for an Effective International Regime**

5. With respect to genetic resources (GR), the importance of achieving an effective international regime on access and benefit sharing is beyond question. In relation to Indigenous peoples, such a regime must include a principled framework that safeguards their human rights and respects their democratic right to full and effective participation.

6. Such key elements are not adequately included in the *Nagoya Protocol*. In the spring of 2010, the UN Permanent Forum on Indigenous Issues reiterated to the Parties to the *Convention on Biological Diversity* the importance of respecting and protecting Indigenous peoples' rights consistent with the *UN Declaration on the Rights of Indigenous Peoples* (UNDRIP)<sup>7</sup>:

... consistent with international human rights law, *States have an obligation to recognize and protect the rights of indigenous peoples to control access to the genetic resources that originate in their lands and waters and any associated indigenous traditional knowledge. Such recognition must be a key element of the proposed international regime on access and benefit-sharing, consistent with the United Nations Declaration on the Rights of Indigenous Peoples.*<sup>8</sup>

7. Indigenous peoples are among the most disadvantaged peoples in the world.<sup>9</sup> They increasingly face threats to their traditional knowledge (TK) and resource rights. Although States commiserate about the debilitating poverty suffered by such peoples, some States appear unwilling to safeguard Indigenous rights to resources.
8. A key problem that exacerbates the impoverishment of Indigenous peoples and local communities is "biopiracy".<sup>10</sup> This issue is not specifically referred to in the *Nagoya Protocol*. Biopiracy has been described as "the unauthorised commercial use of genetic resources and TK without sharing the benefits with the country or community of origin, and the patenting of spurious 'inventions' based on such knowledge and resources".<sup>11</sup>
9. In view of global biopiracy of genetic resources and traditional knowledge, Indigenous peoples urgently need international and domestic safeguards for their human rights. Piracy through patenting can pose formidable challenges.<sup>12</sup>

*The United Nations [S]ubcommission on Prevention of Discrimination and Protection of Minorities reports ... The annual market value of pharmaceutical products derived from medicinal plants discovered by Indigenous peoples [world wide] exceeds US\$43 billion ... Traditional Healers have employed most of the 7000 natural compounds used in natural medicine for centuries; 25 percent of American prescription drugs contain active ingredients derived from Indigenous knowledge of plants ...*<sup>13</sup>

10. Indigenous peoples and local communities have an essential role<sup>14</sup> in safeguarding biodiversity that benefits humankind.<sup>15</sup> By respecting and protecting their rights, biodiversity objectives are strengthened.
11. As underlined in the *Global Biodiversity Outlook 3*, the loss of biodiversity globally continues at an alarming rate.<sup>16</sup>

There is a high risk of dramatic biodiversity loss and accompanying degradation of a broad range of ecosystem services if ecosystems are pushed beyond certain thresholds or tipping points. The poor would face the earliest and most severe impacts of such changes, but ultimately all societies and communities would suffer.<sup>17</sup>

12. The “Updated Global Strategy for Plant Conservation 2011-2020” underlines:

*Of urgent concern is the fact that many plant species, communities, and their ecological interactions, including the many relationships between plant species and human communities and cultures, are in danger of extinction, threatened by such human-induced factors as, inter alia, climate change, habitat loss and transformation, over-exploitation, alien invasive species, pollution, clearing for agriculture and other development.*<sup>18</sup>

13. At a 2011 biodiversity workshop in Montreal for Québec-based companies, a presentation highlighted the rate of biodiversity loss in monetary terms:

... the total value of ecological services (if they are monetized) ... is seen as roughly \$33 trillion and ... are being lost at a rate of more than \$50 billion per year. ... the monetizing [of] ecosystem services *does not take into account the vital esthetic and socio-cultural aspects* that, if lost, will greatly diminish the quality of life for everyone.<sup>19</sup>

14. The ongoing loss of biodiversity “threatens to increase poverty and undermine development”<sup>20</sup> and can be devastating to Indigenous peoples and local communities:

The cultural services provided by ecosystems have important mental health benefits for people. For indigenous and local communities whose cultures and ways of life are intricately linked to nature and natural places, the disruption of ecosystems and the *loss of components of biodiversity can be devastating, not only materially, but also psychologically and spiritually.*<sup>21</sup>

15. For Indigenous peoples the far-ranging importance of biodiversity has many dimensions. In December 2010 the General Assembly reaffirmed “the intrinsic value of biological diversity as well as the ecological, genetic, social, economic, scientific, educational, cultural, recreational and aesthetic values of biological diversity and its components”.<sup>22</sup>

16. The urgency to safeguard biodiversity and the essential contributions of Indigenous peoples and local communities *should have* been reflected in the *Nagoya Protocol*, in a manner that provided a principled framework that respected their rights. The central objectives of the *Convention on Biological Diversity* support such a rights-based perspective.<sup>23</sup>

17. What was achieved in the *Protocol* is not adequate. Based on contemporary and past experiences, excessive reliance on State discretion is likely to be detrimental to Indigenous peoples’ and local communities’ well-being and their substantive and procedural rights.

### **III. Nagoya Protocol – Indigenous Rights Must Be Respected at All Stages**

18. According to the *Convention*, the negotiations on the *Nagoya Protocol* required respect for the rights of Indigenous peoples and local communities. The same remains true for its implementation. Both the *Convention* and the *Protocol* have an identical objective – namely,

“fair and equitable sharing of the benefits arising from the utilization of genetic resources, including by appropriate access to genetic resources ... *taking into account all rights over those resources*”.<sup>24</sup> This objective calls for a rights-based approach.<sup>25</sup>

19. Any dispossession<sup>26</sup> or diminution of the rights of Indigenous peoples and local communities would be inconsistent with the central objective of “fair and equitable” benefit sharing of genetic resources. Such actions would fail to take into account “all rights” over those resources. Moreover, the *Nagoya Protocol* confirms in its preamble:

Affirming that nothing in this Protocol shall be construed as diminishing or extinguishing the existing rights of indigenous and local communities ...

20. These objectives and criteria are further reinforced by the *Convention on Biological Diversity*. The *Convention* must be interpreted in the context of international law as a whole.
21. In international law, State sovereignty is not absolute and is especially limited by the obligations accepted by States in the *Charter of the United Nations* and specific treaties.
22. The *Convention on Biodiversity* itself affirms important limits, when it indicates: “States have, *in accordance with the Charter of the United Nations and the principles of international law*, the sovereign right to exploit *their own resources* pursuant to their own environmental policies” (art. 3). The resources rights of others must still be respected and protected.<sup>27</sup>
23. Whenever human rights are at issue, States are required to act in accordance with their human rights obligations. As required by the *Charter of the United Nations*, the UN and its member States have a duty to promote “universal respect for, and observance of, human rights and fundamental freedoms for all without distinction”.<sup>28</sup> Such duty includes universal respect for the human rights of Indigenous peoples affirmed in UNDRIP.
24. Respect for the rule of law is critical for the validity and legitimacy of the *Nagoya Protocol*. As affirmed by the United Nations in April 2011, the rule of law requires laws that are “consistent with international human rights norms and standards”:

The rule of law is a concept at the very heart of the Organization’s mission. It refers to a principle of governance in which all persons, institutions and entities, public and private, including the State itself, are *accountable to laws* that are publicly promulgated, equally enforced and independently adjudicated, and *which are consistent with international human rights norms and standards*.<sup>29</sup>

25. The term “principles of international law” in the *Convention* includes, *inter alia*, diverse principles affirmed in UNDRIP that underlie Indigenous peoples’ rights and related State obligations.<sup>30</sup> Such principles include: “principles of justice, democracy, respect for human rights, equality, non-discrimination, good governance and good faith”.<sup>31</sup>
26. The intention of the *Convention* is not to undermine existing international instruments or the rights of Indigenous peoples. The explicit intention is “to *enhance and complement existing international arrangements* for the conservation of biological diversity and sustainable use of its components” (preamble). Such “international arrangements” include UNDRIP, which affirms

Indigenous peoples' rights to genetic resources, traditional knowledge, cultural diversity and biological diversity,<sup>32</sup> as well as environmental,<sup>33</sup> food<sup>34</sup> and human security.<sup>35</sup>

27. This complementary approach is reinforced in the *Protocol*:

*This Protocol shall be implemented in a mutually supportive manner with other international instruments relevant to this Protocol. Due regard should be paid to useful and relevant ongoing work or practices under such international instruments and relevant international organizations, provided that they are supportive of and do not run counter to the objectives of the Convention and this Protocol.*<sup>36</sup>

28. The *Convention* and the *Nagoya Protocol* are characterized as international environmental agreements.<sup>37</sup> These two treaties cannot be interpreted so as to undermine the human rights obligations of any Contracting Party in relation to Indigenous peoples.

29. As affirmed in the *Convention* and *Protocol*, nothing in these instruments shall affect the obligations of Contracting Parties deriving from "any existing international agreement". Such obligations would necessarily include respect and protection of human rights in a wide range of international agreements.

The provisions of this Convention shall not affect the rights and obligations of any Contracting Party deriving from any existing international agreement, except where the exercise of those rights and obligations would cause a serious damage or threat to biological diversity. (*Convention*, art. 22(1))

The provisions of this Protocol shall not affect the rights and obligations of any Party deriving from any existing international agreement, except where the exercise of those rights and obligations would cause a serious damage or threat to biological diversity. (*Protocol*, art. 4(1))

30. During the negotiations of the *Nagoya Protocol*, a number of States took the view that the *Convention* and *Protocol* were not *per se* human rights instruments. States generally disregarded requests to carefully consider the human rights implications of proposed texts relating to Indigenous peoples.

31. The resulting shortcomings in the *Nagoya Protocol* are likely to be exploited by some States in the future. The substandard text opens the door to confusion, uncertainty and ambiguity that could serve to undermine Indigenous rights.

### **3.1 Indigenous peoples' cultural rights are human rights**

32. Indigenous peoples' cultural rights are human rights. As affirmed in the 2010 *Report of the independent expert in the field of cultural rights*, their existence is "a reality in international human rights law today, in particular in the United Nations Declaration on the Rights of Indigenous Peoples."<sup>38</sup> Such cultural rights are integral to the *Convention* and the *Nagoya Protocol* and their interpretation:

... cultural rights relate to a broad range of issues, such as ... language; identity ... the conduct of cultural practices and access to tangible and intangible cultural heritage. ... They may also be considered as *protecting access to cultural heritage and resources* that allow such identification and development processes to take place.<sup>39</sup>

33. In UNDRIP, article 31 is especially relevant and important. Article 31(1) affirms that Indigenous peoples have, *inter alia*, the “right to maintain, control, protect and develop their cultural heritage, traditional knowledge and traditional cultural expressions, ... including ... genetic resources”.
34. Article 31(2) provides: “In conjunction with indigenous peoples, States shall take effective measures to recognize and protect the exercise of these rights.” When article 31 is read in the context of the whole *Declaration*, States have a duty to “respect, protect and fulfill” such rights as required by international law.<sup>40</sup>
35. Article 31 affirms an essential aspect of Indigenous cultural rights and related State obligations in the *Declaration*, which together constitute a right to cultural integrity.<sup>41</sup> These cultural rights, when read together with Indigenous peoples’ “right to live in ... peace and security as distinct peoples” (art. 7(2)), constitute a right to cultural security.
36. In applying the *Convention* and *Nagoya Protocol*, the Treaty rights of Indigenous peoples must be fully respected. Such rights elaborate on the cultural and other human rights of Indigenous peoples and individuals, including land and resource rights.<sup>42</sup> Treaties between States and Indigenous peoples are also of “international concern, ... responsibility and character”.<sup>43</sup> State obligations under such international Treaties may not be adversely affected by the provisions of the *Convention* and *Protocol*.<sup>44</sup>

#### **IV. National Legislation Must Be Consistent with *Convention***

37. The *Convention on Biological Diversity* and *Nagoya Protocol* do not empower States to undermine the human rights of Indigenous peoples or related State obligations. Indigenous peoples’ rights are inherent<sup>45</sup> or pre-existing rights, which urgently require protection. Their existence is not dependent on national laws.<sup>46</sup>
38. It would be unconscionable for the *Convention* or the *Protocol* to attempt to convert Indigenous peoples’ inherent rights to traditional knowledge or genetic resources into rights that only exist in accordance with national laws. Such an approach would run directly counter to international human rights law.<sup>47</sup>
39. In addition to courts, “States bear ultimate responsibility as the guarantors of democracy, human rights, and rule of law”.<sup>48</sup> In the context of “fair and equitable” benefit sharing in the *Convention* and *Protocol*, States cannot adopt national laws that undermine such democratic rights as participation and consent or other human rights of Indigenous peoples. As international law expert Dinah Shelton has underlined:

... in a practical sense, democracy, rule of law and respect for human rights were indivisible and interdependent because democracy without human rights and the rule of law was oppression, human rights without democracy and rule of law was anarchy, and *rule of law without democracy and human rights was tyranny*.<sup>49</sup>

40. At the UN General Assembly, heads of State and government have recommitted themselves:

to actively protecting and promoting all human rights, the rule of law and democracy and recognize that they are interlinked and mutually reinforcing and that they belong to the universal and indivisible core values and principles of the United Nations ...<sup>50</sup>

41. The *Protocol* relies excessively on national legislation to achieve fair and equitable benefit-sharing, without sufficient elaboration on the *supportive* role that such legislation must play. This imbalance is further exacerbated in the context of Indigenous peoples and local communities, since the *Protocol* fails to specify that State legislative, administrative and other measures shall be developed and implemented together with them.<sup>51</sup>

42. Both currently and in the past, States have adopted measures to the detriment of Indigenous and local communities. In some States, the existence of specific Indigenous peoples is not recognized<sup>52</sup> – and even if they are, States often refuse to affirm Indigenous peoples’ resource rights in national legislation. As the UN Department of Economic and Social Affairs (DESA) has underlined:

... indigenous peoples continue to lobby governments for the full legal recognition of their traditional land rights. ... In fact, in many countries, indigenous peoples lack any legal title to their land, and in other instances, even if they count on a title, governments can revoke it at any time.<sup>53</sup>

43. In many regions of the world, States cannot be relied upon to safeguard the customary law and practices of Indigenous peoples through national legislation. For example, in Africa<sup>54</sup> and Asia,<sup>55</sup> customary law is often subjugated to national laws or is otherwise insufficiently protected. Such inadequacies occur, even in cases where there may be significant recognition of Indigenous legal systems.<sup>56</sup>

44. While significant progress is being made in international human rights law and international conservation policy, there continue to be severe abuses by States through unilateral national laws, policies and practices.<sup>57</sup> As described by the Forest Peoples Programme:

While recognition of indigenous peoples’ land rights has increased in international human rights law, in international conservation policy and in the internal guidelines of international conservation agencies, *national laws and policies and practice continue to disregard, undermine, limit and even extinguish such rights in many countries*.<sup>58</sup>

45. In both the *Convention* and *Protocol*, national legislation has a *supportive* role to play consistent with international law.<sup>59</sup> The preamble of the *Protocol* affirms that the Contracting Parties are: “*Determined to further support the effective implementation of the access and benefit-sharing*

provisions of the Convention”. Thus, national laws should ensure that the rights of Indigenous peoples and local communities are respected and protected in realizing the objective of “fair and equitable” benefit-sharing.

#### 4.1 Questionable phrases invite abuse and uncertainty

46. To achieve this central objective of fairness and equity, the *Convention* and *Protocol* should have stated clearly that States shall take positive measures in conjunction with Indigenous peoples and local communities, including *through* national legislation.

47. The *Protocol* repeatedly uses ambiguous and questionable phrases such as “subject to national legislation” and “in accordance with national legislation”. In view of the history of State violations, these phrases are likely to lead to serious abuses.

48. Some States insisted on repeating such problematic phrases in the negotiations of the *Nagoya Protocol*. Little or no regard was given to new developments in international standards that limit such phrases in favour of the rights of Indigenous peoples and local communities.

49. The *Convention* includes no authority for any State to dispossess Indigenous peoples of their human rights. Otherwise, such extreme and discriminatory action could unilaterally eliminate the universal and inherent nature of Indigenous human rights and make their existence contingent on each State “recognizing” such rights.

50. To allow States to determine whether Indigenous peoples’ ancestral rights to traditional knowledge or to resources should be recognized would be reminiscent of earlier eras of colonialism.<sup>60</sup> It would constitute the antithesis of “fair and equitable” benefit-sharing in the *Convention* and *Protocol*. As the UN General Assembly has declared:

... continuation of colonialism in all its forms and manifestations [is] a crime which constitutes a violation of the Charter of the United Nations ... and the principles of international law ...<sup>61</sup>

51. In the *Convention*, the phrase “subject to its legislation” is not used to enable States to determine whether Indigenous peoples’ rights exist or to what extent. Rather, the phrase is used in the context where the Parties are obliged by the *Convention* to take maximum beneficial action. For example, article 8(j) requires beneficial measures in support of Indigenous peoples in the broad context of conservation and biodiversity.<sup>62</sup>

Each Contracting Party shall, *as far as possible* and as appropriate:

(j) *Subject to its national legislation, respect, preserve and maintain knowledge, innovations and practices of indigenous and local communities* embodying traditional lifestyles relevant for the conservation and sustainable use of biological diversity and promote their wider application with the approval and involvement of the holders of such knowledge, innovations and practices and *encourage the equitable sharing of the benefits arising from the utilization of such knowledge, innovations and practices* ...<sup>63</sup>

52. The phrase “subject to national legislation” in article 8(j) must be interpreted in a manner compatible with the customary use of biological resources by Indigenous peoples and communities in article 10(c) of the *Convention*. This view is affirmed by the Executive Secretary of the *Convention*:

Article 10(c) provides for the protection and encouragement of customary uses of biological resources in accordance with traditional cultural practices and thus forms a critical link with Article 8 ...<sup>64</sup>

53. National legislation must serve to safeguard and not undermine Indigenous “knowledge, innovations and practices”. These elements are crucial to cultural and biological diversity. They are also critical to Indigenous peoples’ security and well-being, which include human, subsistence, cultural, environmental and territorial dimensions. The “rationale” for the “Strategic Plan for Biodiversity 2011-2020” emphasizes what is at stake:

Biological diversity underpins ecosystem functioning and the provision of ecosystem services essential for human well-being. It provides for food security, human health, the provision of clean air and water; it contributes to local livelihoods, and economic development, and is essential for the achievement of the Millennium Development Goals, including poverty reduction.<sup>65</sup>

54. Phrases such as “subject to national legislation” or “in accordance with national law” must be interpreted in a manner that is consistent with the *Convention*. In regard to such law-making, the *Nagoya Protocol* requires States to address special considerations such as the special role of genetic resources for food security – a matter of critical importance to Indigenous and local communities.<sup>66</sup> Article 8(c) of the *Protocol* emphasizes:

In the development and implementation of its access and benefit-sharing legislation or regulatory requirements, each Party shall: ... (c) Consider the importance of genetic resources for food and agriculture and their special role for food security.

55. The preamble of the *Protocol* speaks of “*Recognizing* the importance of providing legal certainty with respect to access to genetic resources and the fair and equitable sharing of benefits arising from their utilization”. Yet this approach is not applied in a fair and equal manner to the rights of Indigenous peoples and local communities.<sup>67</sup>
56. While the *Protocol* elaborates in detail on the rights and roles of States, it fails to fully affirm and protect the substantive and procedural rights of Indigenous peoples and local communities. As a result, some States might adopt national legislation that attempts to undermine such rights – despite its inconsistency with the *Convention*, *Protocol* and international human rights law.

## V. “Customary Use” of Genetic Resources Supported “As Far As Possible”

57. “Customary use” is a well-established basis for recognition of Indigenous peoples’ land and resource rights in international and domestic legal systems.<sup>68</sup> In regard to Indigenous peoples and local communities, article 10(c) of the *Convention* affirms:

The Contracting Parties shall *as far as possible* and as appropriate:

...

(c) *Protect and encourage* customary use of biological resources *in accordance with traditional cultural practices* that are compatible with conservation or sustainable development ...<sup>69</sup>

58. In order for States to “protect and encourage” such customary use, the necessary conditions for Indigenous peoples and local communities are said to include: “security of tenure over traditional terrestrial and marine estates; control over and use of traditional natural resources; and respect for the heritage, languages and cultures”.<sup>70</sup> Customary use entails customary laws, protocols and procedures. Yet the *Protocol* and COP Decisions do not address these conditions or implement article 10(c) in a manner that is “fair and equitable”.

59. The phrase “customary use of biological resources *in accordance with traditional cultural practices*” signifies that States have a positive obligation to safeguard and promote these practices. As indicated by the Executive Secretary of the Convention on Biological Diversity, the traditional purposes related to these practices should remain “paramount”:

Customary use of biological resources ... may also entail restrictions in accordance with customary laws: such restrictions must be respected as a necessary function of cultural survival. ... [I]t is the traditional purposes for such taking which should remain paramount in considering customary uses of biological resources and traditional cultural practices.<sup>71</sup>

60. The traditional knowledge of Indigenous peoples and local communities has far-reaching significance for their economies and cultures and for the conservation of biological diversity. TK and GR are interrelated and “inseparable”. The preamble of the *Protocol* highlights:

... the *interrelationship between genetic resources and traditional knowledge, their inseparable nature* for indigenous and local communities, the importance of the traditional knowledge for the conservation of biological diversity and the sustainable use of its components, and for the sustainable livelihoods of these communities ...<sup>72</sup>

61. The “customary use” of biological resources and “traditional practices” in article 10(c) of the *Convention* relate to TK as well as GR, particularly in view of their “inseparable” nature. As indicated in article 8(j), States are required to “*as far as possible ... respect, preserve and maintain* knowledge, innovations and *practices ... relevant for the conservation and sustainable use of biological diversity*”.

62. In contrast, article 12(1) of the *Protocol* understates State obligations in the *Convention*, UNDRIP and *Indigenous and Tribal Peoples Convention, 1989*.<sup>73</sup> Article 12(1) requires States to “take into consideration ... customary laws, .... protocols and procedures” with regard to TK associated with GR:

1. In implementing their obligations under this Protocol, Parties shall *in accordance with domestic law take into consideration* indigenous and local communities’ customary laws, community protocols and procedures, as applicable, with respect to traditional knowledge associated with genetic resources.

63. In regard to the customary use of biological resources (*Convention*, art. 10(c)), there is no such phrase as “subject to national legislation and relevant international obligations”. Without authority, the Conference of the Parties added this phrase to Aichi Biodiversity Target 18 in the Strategic Plan rather than the *Convention* phrase “*in accordance with traditional cultural practices*”:

**Target 18:** By 2020, the traditional knowledge, innovations and practices of indigenous and local communities relevant for the conservation and sustainable use of biodiversity, and their customary use of biological resources, are respected, subject to national legislation and relevant international obligations, and fully integrated and reflected in the implementation of the Convention with the full and effective participation of indigenous and local communities, at all relevant levels.<sup>74</sup>

64. In the *Convention*, Indigenous peoples’ human right to traditional knowledge is not “subject to ... relevant international obligations”. If such obligations include those in trade and other international agreements that may undermine traditional knowledge, then COP has acted without legal authority and in a manner that is inconsistent with the provisions of the *Convention*.<sup>75</sup>

## VI. Discriminatory Approach to Indigenous Rights to Genetic Resources

65. The *Convention*’s objective of fair and equitable sharing of benefits requires that “all rights” to genetic resources be taken into account. This requirement applies to both the “utilization” of and “access” to genetic resources. As Bolivia emphasized:

Mother Earth contains our biological heritage, our greatest wealth, for which we demand transparent actions that guarantee fair and equitable distribution of benefits and that at long last recognize *the true guardians of these resources* and the associated traditional knowledge: ... indigenous peoples.<sup>76</sup>

66. Yet in regard to fair and equitable benefit sharing arising from the use of genetic resources, article 5(2) of the *Protocol* only provides for benefit sharing in regard to “established” rights of Indigenous and local communities:

Each Party shall take legislative, administrative or policy measures, as appropriate, with the aim of ensuring that benefits arising from the utilization of genetic resources that are held by indigenous and local communities, in accordance with domestic legislation regarding the established rights of these indigenous and local communities over these genetic resources, are shared in a fair and equitable way with the communities concerned, based on mutually agreed terms.

67. Similarly, article 6(2) of the *Protocol* refers solely to situations where Indigenous peoples and local communities have the “established” right to grant access to genetic resources:

In accordance with domestic law, each Party shall take measures, as appropriate, with the aim of ensuring that the prior informed consent or approval and involvement of indigenous and local communities is obtained for access to genetic resources where they have the established right to grant access to such resources.

68. In both articles 5(2) and 6(2), the reference to “established” rights could prove highly limiting. The term “established” might only refer to situations where a particular Indigenous people or local community can demonstrate that its right to genetic resources is affirmed by domestic legislation, agreement or judicial ruling.<sup>77</sup> If such rights are not so proved, they might not receive any protection under the *Nagoya Protocol* – regardless of how strong the evidence that such rights exist.<sup>78</sup>

69. Should the term “established” be interpreted in such a restrictive manner, most Indigenous peoples worldwide could be denied their rights to genetic resources. If so, widespread dispossession and impoverishment would result. In light of such prejudicial factors, articles 5(2) and 6(2) are incompatible with the overall objectives and duties of States in the *Convention* and *Protocol*.

70. The Secretariat of the Convention on Biological Diversity has indicated that Indigenous and local communities’ rights to genetic resources have limited recognition and protection in the *Protocol*:

The Protocol ... contains significant provisions relating to ... genetic resources held by indigenous and local communities *where the rights of these communities over these resources have been recognized*.<sup>79</sup>

*... where they retain rights to genetic resources in accordance with domestic legislation*, prior and informed consent is ... required for access to genetic resources.<sup>80</sup>

71. Articles 5(2) and 6(2) of the *Protocol* run counter to article 10(c) of the *Convention* that requires States, as far as possible, to protect and encourage customary use of genetic resources “in accordance with traditional cultural practices”. Article 10(c) does not include any reference to national legislation or domestic law. Nor is there any reference to “established” rights in the *Convention*.

72. This raises the concern that, in disregarding the provisions of the *Convention*, the *Nagoya Protocol* is discriminatory.<sup>81</sup> It attempts to deprive Indigenous peoples of their rights to self-determination, culture and resources contrary to principles of equality and non-discrimination.<sup>82</sup> The *Protocol* is not authorized to interpret the *Convention* in a manner that runs counter to its provisions.
73. State approaches of solely taking measures in relation to “established” rights, and not all rights, over genetic resources of Indigenous and local communities is incompatible with the jurisprudence of the Committee on the Elimination of Racial Discrimination. For example, in regard to Guyana’s legislation distinguishing “titled” and “untitled” lands, the Committee “urges the State party to remove the *discriminatory distinction between titled and untitled communities* from the 2006 Amerindian Act and from any other legislation.”<sup>83</sup>
74. States cannot unilaterally separate genetic resources from traditional knowledge and other cultural heritage, with a view to limiting Indigenous rights to such resources. The cultural heritage of Indigenous peoples, including genetic resources, must be addressed holistically.<sup>84</sup> As Special Rapporteur Erica-Irene Daes emphasized: “All of the aspects of heritage are interrelated and cannot be separated from the traditional territory of the people concerned.”<sup>85</sup>
75. The prohibition against racial discrimination is a peremptory norm.<sup>86</sup> Therefore, even if articles 5(2) and 6(2) have been adopted by consensus among Contracting Parties, these articles have no legitimacy or validity.

### 6.1 Procedural injustices compound dishonourable approach

76. Canada played a lead role in seeking to limit fair and equitable sharing of benefits relating to genetic resources to situations of “established” rights. At home, the Canadian government has been unsuccessful<sup>87</sup> in its attempts to restrict its constitutional duty to consult Indigenous peoples to situations where their rights were already “established”. In this regard, the Supreme Court of Canada discredited Canada’s approach:

The Crown, acting honourably, cannot cavalierly run roughshod over Aboriginal interests ... It *must respect these potential, but yet unproven, interests*. ... To unilaterally exploit a claimed resource during the process of proving and resolving the Aboriginal claim to that resource, may be *to deprive the Aboriginal claimants of some or all of the benefit of the resource. That is not honourable.*<sup>88</sup>

77. Fair and equitable sharing of benefits is a means of promoting reconciliation among different rights-holders. However, attempts to limit Indigenous peoples and local communities to “established” rights to genetic resources are highly prejudicial. By the time such rights are proved, the genetic resources in question may have been exploited by others. The Supreme Court of Canada has generally characterized such approach to Indigenous peoples’ land and resource rights as risking “unfortunate consequences” and dishonourable:

To limit reconciliation to the *post-proof sphere* risks treating reconciliation as a distant legalistic goal, devoid of ... “meaningful content” ... It also risks unfortunate consequences. *When the distant goal of proof is finally reached, the*

*Aboriginal peoples may find their land and resources changed and denuded. This is not reconciliation. Nor is it honourable.*<sup>89</sup>

78. In negotiating the provisions addressing “established” rights, Canada joined other States in a meeting where representatives of Indigenous peoples were excluded.<sup>90</sup> Prior to the closed meeting, Canadian government representatives refused to disclose what Canada was about to propose. Following the meeting, Canada and other States refused to indicate the legal intent and meaning of “established” rights in the *Protocol*.

79. When these provisions were brought back to the main negotiations meeting, a representative of Indigenous and local communities was offered by the Co-Chair “one minute to speak now, or two minutes later”. In contrast, Contracting Parties were accorded as much time as necessary to address their concerns and negotiate revisions.<sup>91</sup>

80. Indigenous peoples’ inherent<sup>92</sup> right to resources includes genetic resources. Such rights to genetic resources are an integral part of their cultures and cultural heritage.<sup>93</sup> Any dispossession of genetic resources undermines both cultural and biological diversity, since the two are “inextricably linked”. As recognized in the *2010 Declaration on Bio-cultural Diversity*:

... biological and cultural diversity are intrinsically and inextricably linked and together hold the key to sustainable development and are critical for the achievement of the Millennium Development Goals ...<sup>94</sup>

81. Indigenous peoples and individuals have the right to “take part in cultural life”, as affirmed in the *International Covenant on Economic, Social and Cultural Rights*.<sup>95</sup> This cultural right includes “protecting access to cultural heritage and resources”.<sup>96</sup> According to the Committee on Economic, Social and Cultural Rights:

States parties should take measures to *guarantee* ... the exercise of th[at] right ... States parties must therefore take measures to recognize and protect the rights of indigenous peoples to own, develop, control and use their communal lands, territories and resources”.<sup>97</sup>

82. The Committee on Economic, Social and Cultural Rights has elaborated on the interpretation of the right to “take part in cultural life”. It has underlined that, “in accordance with the Covenant and other international instruments dealing with human rights and the protection of cultural diversity, ... article 15, paragraph 1 (a) ... of the Covenant ... includes the following *core obligations applicable with immediate effect*”:

To take legislative and any other necessary steps to *guarantee non-discrimination and gender equality* in the enjoyment of the right of everyone to take part in cultural life ...<sup>98</sup>

## **6.2 Disproportionate and prejudicial impacts must be avoided**

83. By arbitrarily imposing the criterion of “established” rights on Indigenous peoples and local communities, the *Protocol* exposes them to a wide range of disproportionate and prejudicial

impacts.<sup>99</sup> These impacts affect present and future generations and potentially include, *inter alia*: dispossession<sup>100</sup> of genetic resources; loss of identity, culture and cultural heritage; forced assimilation;<sup>101</sup> deprivation of fair and equitable benefit-sharing and impoverishment.

84. The Committee on Economic, Social and Cultural Rights identifies “the necessary conditions for the full realization of the right of everyone to take part in cultural life on the basis of equality and non-discrimination”.<sup>102</sup> These conditions include appropriate, relevant and respectful ways of implementation of this human right:

*Appropriateness* refers to the realization of a specific human right in a way that is pertinent and suitable to a given cultural modality or context, that is, respectful of the culture and cultural rights of individuals and communities, including minorities and indigenous peoples.<sup>103</sup>

85. The Contracting Parties cannot selectively decide that they shall respect the “established” rights of Indigenous and local communities to genetic resources but not all such rights based on customary use. Such actions are based on narrow self-interest and are incompatible with the international law principles of non-selectivity, impartiality and objectivity. As reaffirmed by the UN General Assembly:

... the promotion, protection and full realization of all human rights and fundamental freedoms, as a legitimate concern of the world community, should be guided by the principles of non-selectivity, impartiality and objectivity and should not be used for political ends.<sup>104</sup>

86. The Committee on the Elimination of Racial Discrimination has emphasized that “in many regions of the world *indigenous peoples have been, and are still being, discriminated against, deprived of their human rights ... and in particular that they have lost their land and resources to colonists, commercial companies and State enterprises.*”<sup>105</sup> To address such discrimination, the Committee calls upon States parties to:

ensure that members of indigenous peoples are free and equal in dignity and rights and free from any discrimination, in particular that based on indigenous origin or identity;<sup>106</sup>

provide indigenous peoples with conditions allowing for a sustainable economic and social development compatible with their cultural characteristics;<sup>107</sup>

ensure that indigenous communities can exercise their rights to practice and revitalize their cultural traditions and customs, to preserve and to practice their languages;<sup>108</sup>

... recognize and protect the rights of indigenous peoples to own, develop, control and use their communal lands, territories and resources ...<sup>109</sup>

87. Where a State has asserted rights over natural resources in its constitution, the Committee on the Elimination of Racial Discrimination has indicated that such State must still respect the resource rights of Indigenous and tribal peoples:

While noting the principle set forth in article 41 of the Constitution [of Suriname] that natural resources are the property of the nation and must be used to promote economic, social and cultural development, the Committee points out that *this principle must be exercised consistently with the rights of indigenous and tribal peoples*.<sup>110</sup>

88. It is unconscionable to run roughshod over Indigenous peoples' rights to genetic resources in situations where they do not meet the criterion of "established" rights. Such an approach serves to accelerate the commercialization of genetic resources at the expense of Indigenous rights.

89. Venezuela has indicated generally that the text of the *Protocol* "has suffered departures from its initial objectives and origins" and expressed the following concern:

We are greatly concerned that the documents relating to the protocol show a marked tendency towards the commercialization of biological diversity and the conversion of nature into a market product, which hinders progress towards our common objectives and vision.<sup>111</sup>

90. Even in cases in which States legitimately retain the ownership of mineral or sub-surface resources or rights to other resources pertaining to Indigenous lands, such States cannot unilaterally proceed with benefit-sharing to the detriment of Indigenous rights.

91. According to the *Indigenous and Tribal Peoples Convention, 1989*, such States have at least a prior duty to consult Indigenous and tribal peoples to determine the extent of prejudice that may result from programmes of exploration and exploitation. The peoples concerned also have a right to *participate in benefit-sharing* and a right to *receive fair compensation* for any resulting damages.

... governments shall establish or maintain procedures through which they shall consult these peoples, with a view to ascertaining whether and to what degree their interests would be prejudiced, before undertaking or permitting any programmes for the exploration or exploitation of such resources pertaining to their lands. The peoples concerned shall wherever possible participate in the benefits of such activities, and shall receive fair compensation for any damages which they may sustain as a result of such activities.<sup>112</sup>

92. Such standards in the *Indigenous and Tribal Peoples Convention* may well need to be upgraded. At the time of the revision process that led to the adoption of the *Convention*, the issue of self-determination was said to be "outside the competence of the ILO" and "no position for or against self-determination was or could be expressed in the Convention".<sup>113</sup> The right of self-determination, as provided in the international human rights Covenants, has since been confirmed to apply to the world's Indigenous peoples.<sup>114</sup>

93. Thus, the right of self-determination and other human rights affirmed in UNDRIP should now be used to interpret the *Indigenous and Tribal Peoples Convention*.<sup>115</sup> This is especially important since the right of peoples to self-determination is a prerequisite for the enjoyment of all other human rights.<sup>116</sup>

94. In international law, sovereign States do not enjoy full ownership and control over all genetic resources within their national boundaries.<sup>117</sup> States are required to act in accordance with their human rights obligations. Thus, the resources rights of Indigenous peoples and local communities must still be respected and protected.

## **VII. Indigenous Peoples' Human Rights Must Be Safeguarded**

95. The negotiations on the *Nagoya Protocol* included other double standards. When a Party indicated that their rights or obligations in an existing instrument would be undermined by a proposed text, such concerns were carefully considered. Revisions were generally made so that the text would complement and support existing instruments relevant to the *Protocol*.

96. In contrast, existing international standards in favour of Indigenous peoples were not fully respected in negotiating the *Nagoya* text – including those standards in the *Convention*.

97. Some States exploited the practice of seeking consensus among Contracting Parties, with a view to diminishing or ignoring the rights of Indigenous peoples and local communities.

### **7.1 UN Declaration on the Rights of Indigenous Peoples must be fully applied**

98. During the final negotiations in Nagoya in October 2010, the Co-Chairs proposed the following wording to be added to the preamble of the *Protocol*: “*Taking into account* the significance of the United Nations Declaration on the Rights of Indigenous Peoples”. Reneging on its previous commitment to similar wording,<sup>118</sup> Canada was the only country in the world to object and insist there be no reference whatsoever to UNDRIP in the preamble.

99. After widespread international criticism by Indigenous and civil society organizations,<sup>119</sup> Canada accepted to include in the preamble: “*Noting* the United Nations Declaration on the Rights of Indigenous Peoples”. This minimal reference was discussed and agreed to in a meeting that expressly excluded representatives of Indigenous organizations in Nagoya.

100. It is deeply troubling that, in regard to UNDRIP, it took only one State to exploit the practice of consensus in the negotiations so as to lower standards in the *Protocol*. Such a process requires fundamental reform.<sup>120</sup> States that violate the rule of law at home and internationally must not be permitted to play such a determinative role.<sup>121</sup>

101. According to the UN General Assembly, terms such as “noting” are *per se* “neutral terms that constitute neither approval nor disapproval.”<sup>122</sup> Canada’s insistence on simply “noting” UNDRIP in the preamble falls far short of the positive obligations of States in article 38 and 42 of the *UN Declaration*:

States in consultation and cooperation with indigenous peoples, shall take the appropriate measures, including legislative measures, to achieve the ends of this Declaration. (art. 38)

... States shall promote respect for and full application of the provisions of this Declaration and follow up the effectiveness of this Declaration. (art. 42)

102. In seeking to diminish the significance of UNDRIP in the *Nagoya Protocol*, Canada took unfair advantage of the practice of seeking consensus among the Parties by insisting on its "lowest-common-denominator" position. If other Parties did not agree to alter the existing proposal to "noting", there would be no reference to UNDRIP at all.
103. In regard to UNDRIP, the potential disadvantage of simply using the neutral term "noting" is not limited to the *Nagoya Protocol* and its implementation. It could set a precedent to try to minimize the significance and use of UNDRIP in other international negotiations and agreements. For example, a similar approach of "noting" was adopted at the climate change talks in December 2010 in Cancún, Mexico:

*Taking note* of relevant provisions of the United Nations Declaration on the Rights of Indigenous Peoples ...<sup>123</sup>

104. In Nagoya, actions to potentially diminish the importance of the *Declaration* were not limited to the negotiations of the *Protocol*. The Conference of the Parties – whose decisions generally are not legally binding<sup>124</sup> – exceeded its authority and unilaterally added the following wording that could be construed as lessening the standard in UNDRIP for its full and effective implementation:

*Invites* Parties to take note of the United Nations Declaration on the Rights of Indigenous Peoples in the implementation of the Strategic Plan for Biodiversity 2011-2020, as appropriate, and in accordance with national legislation ...<sup>125</sup>

105. Attempts by Parties to devalue UNDRIP in the *Protocol* should not prove successful. To interpret UNDRIP in a diminished manner contrary to its terms would run counter to the central objective of fair and equitable benefit sharing. Both the *Convention* and the *Protocol* require that their respective provisions "shall not affect the rights and obligations of any Party deriving from any existing international agreement ..." <sup>126</sup> The term "noting" cannot neutralize the legal effect of UNDRIP.
106. The *UN Declaration* was overwhelmingly adopted by States at the General Assembly in September 2007. Since that time, each of the four opposing States – Australia, New Zealand, Canada and the United States – has reversed its position and endorsed UNDRIP. The Office of the High Commissioner for Human Rights has highlighted the far-reaching significance of UNDRIP as a universal human rights instrument which now has achieved global consensus:

The Declaration is now among the most widely accepted UN human rights instruments. It is the most comprehensive statement addressing the human rights of indigenous peoples to date, establishing collective rights and minimum standards on survival, dignity, and wellbeing to a greater extent than any other international text.<sup>127</sup>

107. UN treaty bodies are increasingly using UNDRIP to interpret Indigenous rights and State obligations in existing human rights treaties, as well as encouraging endorsement of the

*Declaration* and its implementation.<sup>128</sup> States cannot avoid Indigenous peoples' human rights and related State obligations in UNDRIP by attempting to disregard the legal significance of the *Declaration* when addressing biodiversity, climate change and other crucial international issues.

108. UNDRIP was adopted as an Annex to a General Assembly resolution, which is generally non-binding. However the *Declaration* has diverse legal effects.<sup>129</sup> UN Special Rapporteur on the rights of indigenous peoples, James Anaya, describes UNDRIP as “a political, moral and legal imperative ... within the framework of the human rights objectives of the Charter of the United Nations”.<sup>130</sup> Anaya further concludes:

... the Declaration builds upon fundamental human rights and principles, such as non-discrimination, self-determination and cultural integrity, which are incorporated into widely ratified human rights treaties. In addition, core principles of the Declaration can be seen to be generally accepted within international and State practice, and hence to that extent the Declaration reflects customary international law.<sup>131</sup>

109. In 2008, the Permanent Forum on Indigenous Issues affirmed that the *Declaration* “will be its legal framework” and will therefore ensure that the *Declaration* is integrated in all aspects of its work.<sup>132</sup> The Food and Agricultural Organization (FAO) – which includes genetic resources and Indigenous knowledge as priority areas of work<sup>133</sup> – has indicated that it has a “responsibility to observe and implement UNDRIP”.<sup>134</sup>

FAO activities that affect indigenous peoples will be guided by the human rights-based approach to development, premised on the notion that everyone should live in dignity and attain the highest standards of humanity guaranteed by international human rights law. It will be guided in particular by the core principles expressed in this policy document and by the UN Declaration on the Rights of Indigenous Peoples.<sup>135</sup>

110. In February 2011, IFAD (International Fund for Agricultural Development) announced the establishment of an “indigenous peoples’ forum”. The new forum “will be guided by the principles of mutual respect, promoting complementarities, *adherence to UNDRIP*, inclusiveness, pluralism, reciprocity, accountability and solidarity.”<sup>136</sup>

111. At the regional level, the African Commission on the Human and Peoples’ Rights has officially sanctioned and used UNDRIP to interpret Indigenous peoples’ rights.<sup>137</sup> Also, the Inter-American Commission on Human Rights (IACHR) has highlighted the legal “relevance and importance” of UNDRIP in construing Indigenous rights within the Inter-American system:

The IACHR and the Inter-American Court, in their elaboration of the right to

indigenous property, view as relevant and important the United Nations Declaration on the Rights of Indigenous Peoples. ... Its provisions, together with the System’s jurisprudence, constitute a corpus iuris which is applicable in

relation to indigenous peoples' rights ... The Inter-American Court has resorted to its provisions in order to construe specific rights.<sup>138</sup>

## 7.2 Failure to use term “peoples”

112. The *Convention on Biological Diversity* was adopted in 1992, with little participation of Indigenous peoples or local communities in its formulation. Since that time, numerous international standards have emerged that are relevant to the *Convention* and reinforce the interpretation of its provisions – particularly those relating to Indigenous peoples' rights and related State obligations.

113. During the negotiations of the *Nagoya Protocol*, the *Convention* was not consistently interpreted in accordance with contemporary standards. In regard to Indigenous peoples, some Parties refused to accept key changes in terminology based on new international developments. Some sought to minimize Indigenous peoples' status and human rights.<sup>139</sup>

114. The Protocol uses the term “indigenous and local communities”, as this is the expression used in the *Convention on Biological Diversity*. Since 1992, significant advancements have occurred in international law and “indigenous peoples” is the term now used.

115. According to international law, the term “peoples” has a particular legal status and all “peoples” have the right of self-determination.<sup>140</sup> This same legal status and right are not recognized in regard to “minorities” or “communities” *per se*.

116. States that seek to restrict or deny Indigenous peoples their status as “peoples”, in order to impair or deny their rights, are violating the *International Convention on the Elimination of All Forms of Racial Discrimination*.<sup>141</sup>

In this Convention, the term ‘racial discrimination’ shall mean any distinction, *exclusion, restriction* or preference based on race, colour, descent, or national or ethnic origin which has the *purpose or effect of nullifying or impairing the recognition, enjoyment or exercise, on an equal footing*, of human rights and fundamental freedoms in the political, economic, social, cultural or any other field of public life.<sup>142</sup>

117. Such action would also violate the principle of “equal rights and self-determination of peoples” under the *Charter of the United Nations*<sup>143</sup> and as affirmed in UNDRIP.<sup>144</sup> In its 2010 Report, the Permanent Forum on Indigenous Issues urged the Parties to the *Convention on Biological Diversity* to use the term “peoples” in relation to Indigenous peoples.<sup>145</sup> This recommendation was not followed in the *Nagoya Protocol* negotiations.

118. The term “indigenous peoples” is used in both the 2003 *Convention for the Safeguarding of the Intangible Cultural Heritage*<sup>146</sup> and the 2005 *Convention on the Protection and Promotion of*

*the Diversity of Cultural Expressions*.<sup>147</sup> Most recently, the term “Indigenous peoples and local communities” is used in the agreements reached on climate change in Cancún, Mexico.<sup>148</sup>

119. Indigenous peoples have strived for decades to be recognized as “peoples” under international law. With the historic adoption of the *UN Declaration on the Rights of Indigenous Peoples* in September 2007, the issue of “peoples” was resolved. Today, the term “indigenous peoples” is used consistently by the General Assembly, Office of the High Commissioner for Human Rights, Human Rights Council, treaty monitoring bodies, specialized agencies, special rapporteurs and other mechanisms within the international system.
120. Failure to use the term “Indigenous peoples” or “Indigenous peoples and local communities” in the *Nagoya Protocol* is not consistent with international practice.<sup>149</sup> It is disrespectful and diminishes respect for the *Protocol*. This issue is slated for discussion at the 7<sup>th</sup> meeting of the Working Group on article 8(j) and at COP 11 in October 2012.<sup>150</sup>

### VIII. Special Measures Essential for Indigenous Peoples

121. Instead of increasing the vulnerability of Indigenous peoples through possible dispossessions, the *Protocol* should have required “special measures” to promote and safeguard their rights to genetic resources and other cultural heritage. Such special measures are crucial in international human rights law.<sup>151</sup>
122. In light of the key role of Indigenous peoples and local communities in conserving biodiversity, the imperative of ensuring special protections is reinforced. Special measures are required in general terms in the *Convention on Biological Diversity*, where necessary “to conserve biological diversity”:

Each Contracting Party shall, as far as possible and as appropriate:

(a) Establish a system of protected areas or *areas where special measures need to be taken to conserve biological diversity* ...<sup>152</sup>

123. In the Americas, the Inter-American Court of Human Rights has ruled:

... as regards indigenous peoples, it is essential for the States to grant effective protection that takes into account their specificities, their economic and social characteristics, as well as their situation of special vulnerability, their customary law, values, and customs.<sup>153</sup>

124. In regard to Indigenous and tribal peoples, the Inter-American Court called for special measures to “guarantee the full exercise of their rights”:

... members of indigenous and tribal communities require special measures that *guarantee the full exercise of their rights*, particularly with regards to their enjoyment of property rights, in order to safeguard their physical and cultural

survival.<sup>154</sup> Other sources of international law have similarly declared that such special measures are necessary.<sup>155</sup>

125. The African Commission on Human and Peoples' Rights has relied significantly on the jurisprudence of the Inter-American Court in requiring special measures to safeguard the land and resource rights of "traditional African communities".

The African Commission is of the view that the first step in the protection of traditional African communities is the acknowledgement that the rights, interests and benefits of such communities in their traditional lands constitute 'property' under the Charter and that special measures may have to be taken to secure such 'property rights'.<sup>156</sup>

### IX. Challenges to "Free, Prior and Informed Consent" (FPIC)

126. In regard to Indigenous and local communities, article 8(j) is the sole provision in the *Convention on Biological Diversity* that includes reference to the terms "approval" and "involvement":

Each Contracting Party shall, as far as possible and as appropriate:

...

(j) Subject to its national legislation, respect, preserve and maintain knowledge, innovations and practices of indigenous and local communities embodying traditional lifestyles relevant for the conservation and sustainable use of biological diversity and promote their wider application with the approval and involvement of the holders of such knowledge, innovations and practices and encourage the equitable sharing of the benefits arising from the utilization of such knowledge, innovations and practices ...

127. During the eighteen years following the adoption of the *Convention*, the meaning of the terms "approval" and "involvement" has been elaborated in international law. In the Indigenous context, "approval" is most widely understood as "free, prior and informed consent"; and "involvement" is more substantively described as "full and effective participation".

128. UNDRIP consistently uses the standard of FPIC.<sup>157</sup> This is the standard relating to Indigenous cultural heritage, including traditional knowledge and genetic resources<sup>158</sup> and is consistent with Indigenous peoples' right of self-determination.<sup>159</sup>

129. FPIC is further reinforced by Indigenous peoples' human right to development.<sup>160</sup> This right "implies the full realization of the right of peoples to self-determination".<sup>161</sup> As affirmed in UNDRIP, "Indigenous peoples have the right to determine and develop priorities and strategies for exercising their right to development."<sup>162</sup>

130. In international law, Indigenous peoples have a right to sustainable and equitable development.<sup>163</sup> Such equitable development is consistent with the objective of "fair and equitable" benefit sharing in the *Convention and Protocol* and entails FPIC.<sup>164</sup>

131. FPIC is the standard required or supported by the UN General Assembly,<sup>165</sup> international treaty bodies,<sup>166</sup> regional human rights bodies,<sup>167</sup> UN special rapporteurs<sup>168</sup> and specialized agencies.<sup>169</sup>
132. In article 8(j) of the *Convention*, the phrase “approval and involvement” is less than satisfactory. Genuine “approval” constitutes a consensual process that includes such crucial elements as good faith consultation with Indigenous peoples and their full and effective participation.<sup>170</sup> The term “involvement” appears redundant and may have been added for emphasis.

### 9.1 Meaning of “prior and informed consent or approval and involvement”

133. In the *Nagoya Protocol*, the Parties retained the phrase “approval and involvement” used in article 8(j) of the *Convention* with an expanded formulation. In relation to Indigenous and local communities, the new phrase used repeatedly is “*prior and informed consent or approval and involvement*”.<sup>171</sup>
134. In regard to the new phrase, the “or” between “prior and informed consent” (PIC) and “approval” suggests that the two terms are synonymous. This interpretation is reinforced by article 6(3)(f) of the *Protocol*.<sup>172</sup> Thus, the “involvement” of Indigenous peoples and local communities is required in addition to such consent or approval.
135. Some States, such as Canada, are claiming another interpretation – namely, that there are two different standards that could apply. One standard is “prior and informed consent”; the other is “approval and involvement”. This could suggest that there would only be “involvement” in relation to situations of “approval” and not “PIC”. Such an interpretation would not be coherent and would be inconsistent with international and domestic law.<sup>173</sup>
136. The Tkarihwaí:ri Code of Ethical Conduct (adopted by COP 10) refers to “prior informed consent and/or approval and involvement”.<sup>174</sup> This wording derogates from the *Protocol*, which consistently uses the phrase “prior and informed consent or approval and involvement”. Such action is detrimental to Indigenous peoples and communities. It has no place in a Code of Ethical Conduct – even if the Code cannot be used to interpret the *Protocol*.<sup>175</sup>

## X. Indigenous Peoples’ Decision-Making Processes Require Respect

137. In deciding whether to give or withhold their consent, Indigenous peoples have the right to freely determine their own criteria and decision-making processes consistent with the right of self-determination.
138. Paragraph (f) of article 6(3) of the *Nagoya Protocol* was initially approved at the Montreal meeting in July 2010– against the wishes of the International Indigenous Forum on Biological Diversity (IIFB). Article 6(3)(f) provides:

3. ... each Party requiring prior informed consent shall take the necessary legislative, administrative or policy measures, as appropriate, to:

...

(f) Where applicable, and subject to national legislation, set out criteria and/or processes for obtaining prior informed consent or approval and involvement of indigenous and local communities for access to genetic resources ...

139. According to article 6(2), the measures to be taken by States in article 6(3)(f) may only be for situations where Indigenous and local communities have “established” rights to grant access to genetic resources.<sup>176</sup> Such an arbitrary limitation would be discriminatory and invalid.<sup>177</sup>

140. Article 6(3)(f) calls on States to “set out criteria and/or processes for obtaining prior informed consent ... and involvement” of Indigenous and local communities. This broad and general phrasing invites invasive and excessive State actions.

141. Article 6(3)(f) includes three possible limitations – “as appropriate”, “where applicable” and “subject to national legislation” – in addressing consent and involvement issues relating to Indigenous peoples and local communities. Such phrases serve to encourage State inaction or denial of rights.

142. In regard to access to genetic resources, article 6 of the *Protocol* should have required States to ensure the effective protection of the rights of Indigenous peoples and local communities and respect for their right relating to FPIC. Such duties are consistent with UNDRIP and other international human rights law. As indicated by the Committee on Economic, Social and Cultural Rights:

States parties should adopt measures to *ensure the effective protection of the interests of indigenous peoples* relating to their productions, which are often expressions of their cultural heritage and traditional knowledge. ... In implementing these protection measures, States parties should *respect the principle of free, prior and informed consent* of the indigenous authors concerned  
...<sup>178</sup>

143. In the drafting of article 6(3)(f), Canada, Australia and New Zealand jointly played a key role<sup>179</sup> demonstrating no flexibility to Indigenous representatives. At the Montreal meeting, a formal request made by the IIFB to allow more time for consultations was rejected by the Co-Chair. When no Party objected to paragraph (f) of article 6(3), it was declared officially approved.<sup>180</sup>

## **XI. “Mutually Agreed Terms” Reaffirms Indigenous “Consent”**

144. Indigenous peoples and local communities have been and continue to be customary users of genetic resources. In this context, they have acquired critical knowledge and developed important innovations and practices. Aside from being “users” of GR and TK, they are also “providers” in relation to third parties that seek access and use.

145. In addition to prior and informed consent (PIC) in various provisions of the *Nagoya Protocol*, there are requirements for “mutually agreed terms” (MAT). As providers, Indigenous and local communities may require third party users to fulfill specific conditions or obligations.
146. In the *Nagoya Protocol*, the sharing of benefits arising from use of TK associated with GR is subject to mutually agreed terms, as is access to such TK.<sup>181</sup> MAT is also required for the sharing of benefits arising from the use of GR held by Indigenous and local communities, but only for so-called “established” rights.<sup>182</sup>
147. In its preamble, the *Nagoya Protocol* recognizes the “importance of promoting equity and fairness in negotiation of mutually agreed terms between providers and users of genetic resources”. Such agreements underline the importance of Indigenous “consent”, in regard to TK and GR.
148. A permit or its equivalent is only issued to third party users *after* prior and informed consent and MAT are obtained from Indigenous and local communities.<sup>183</sup> This process reinforces the need for free, prior and informed consent at every stage. If MAT is carried out fairly and in good faith, it would constitute another step in ensuring such prior and informed consent.

## **XII. “Full and Effective Participation” Must Be Respected**

149. In regard to Indigenous peoples and local communities, the *Nagoya Protocol* fails to affirm their right to full and effective participation when Parties take legislative, administrative or other measures in relation to genetic resources and traditional knowledge. In the Indigenous and local community context, the only reference in the operative provisions to the term “participation” is in article 12(2):

Parties, with the *effective participation* of the indigenous and local communities concerned, shall establish mechanisms to inform potential users of traditional knowledge associated with genetic resources about their obligations ...<sup>184</sup>

150. “Full and effective participation” and FPIC are important elements of Indigenous peoples’ right of self-determination.<sup>185</sup> Such participation is also a crucial aspect of FPIC.<sup>186</sup> Yet the *Protocol* fails to affirm these key relationships. It uses repeatedly the term “involvement” from the 1992 *Convention*, without fair and equitable consideration as to what the term entails.<sup>187</sup>
151. The negotiations on the *Protocol* took place without acknowledging or ensuring the right to full and effective participation of Indigenous peoples – which must include “full and meaningful” participation under international law.<sup>188</sup> Involvement inconsistent with their right of self-determination often leads to severe injustices or other tragic results.
152. States generally viewed the negotiations as being among the Parties.<sup>189</sup> Interventions by Indigenous peoples or local communities were largely treated as a limited privilege.
153. The Parties were clearly aware of the importance of “full and effective participation”, since this standard is included in some COP decisions relating to Indigenous peoples and local

communities.<sup>190</sup> These COP decisions generally are not legally binding. Yet such participation was still crafted in weak terms and with inappropriate qualifying language.<sup>191</sup>

154. Indigenous peoples and local communities continue to face dispossession, marginalization, biopiracy and other forms of exploitation.<sup>192</sup> Yet the COP Decision X42 that adopts the Tkarihwaí:ri Ethical Code of Conduct provides little or no incentive for the Parties to “ensure respect for the cultural and intellectual heritage of indigenous and local communities relevant to the conservation and sustainable use of biological diversity” (as stated in the Code’s title). The Code stipulates:

The following elements of a *code of ethical conduct are voluntary* ... They should *not be construed as altering or interpreting the obligations of Parties to the Convention of Biological Diversity or any other international instrument*. They should not be interpreted as altering domestic laws, treaties, agreements or other constructive arrangements that may already exist.<sup>193</sup>

155. In regard to cultural heritage, biodiversity and a wide range of other matters, the participation of Indigenous peoples in decision-making is of paramount significance in terms of both human rights and democracy.<sup>194</sup> In general terms, the UN Expert Mechanism on the Rights of Indigenous Peoples has emphasized:

... indigenous participation in decision-making on the full spectrum of matters that affect their lives *forms the fundamental basis for the enjoyment of the full range of human rights*. This principle is a corollary of a myriad of universally accepted human rights, and at its core enables indigenous peoples to be freely in control of their own destinies in conditions of equality. *Without this foundational right, the human rights of indigenous peoples, both collective and individual, cannot be fully enjoyed.*<sup>195</sup>

156. Without explicitly using the term, UNDRIP requires the “full and effective participation” of Indigenous peoples to realize all of its provisions.<sup>196</sup> UNDRIP contains “more than 20 provisions affirming indigenous peoples’ right to participate in decision-making”.<sup>197</sup>

157. The international community is widely supportive of this right and principle, including the General Assembly,<sup>198</sup> specialized agencies,<sup>199</sup> national human rights institutions<sup>200</sup> and Indigenous peoples.<sup>201</sup> As the African Commission on Human and Peoples’ Rights has concluded: “

The Declaration ... prohibits discrimination against indigenous peoples and promotes their full and effective participation in all matters that concern them.<sup>202</sup>

158. In its preamble, UNDRIP is proclaimed “as a standard of achievement to be pursued in a spirit of partnership and mutual respect”. This standard can only be attained if there are genuine partnerships – particularly between States and Indigenous peoples. Such relationships must be consistent with the principle of equal rights and self-determination of peoples<sup>203</sup> and must fully respect Indigenous peoples’ right to participate in decision-making.

159. With regard to its *Indigenous and Tribal Peoples Convention, 1989*, the International Labour Organization (ILO) emphasizes: “The principles of participation and consultation are the cornerstone of the Convention.”<sup>204</sup> In regard to implementation of this Convention, cooperation with Indigenous and tribal peoples is required at every stage:

(a) the *planning, co-ordination, execution and evaluation, in co-operation with the peoples concerned*, of the measures provided for in this Convention;

(b) the *proposing of legislative and other measures* to the competent authorities and supervision of the application of the measures taken, *in co-operation with the peoples concerned*.<sup>205</sup>

160. The duty to cooperate with Indigenous peoples necessarily entails both consultation and negotiation.<sup>206</sup> In the context of cultural heritage, genetic resources and biodiversity, the duty to consult – including consent – is a human rights and democratic imperative. As Special Rapporteur on the rights of Indigenous peoples, James Anaya explains:

This duty is a corollary of a myriad of universally accepted human rights, including the right to cultural integrity, the right to equality and the right to property ... More fundamentally, it derives from the overarching right of indigenous peoples to self-determination and from related principles of democracy and popular sovereignty.<sup>207</sup>

### **XIII. Capacity-Building Crucial for Democratic Participation**

161. In matters related to the *Nagoya Protocol*, a major factor impeding the full and effective participation of Indigenous peoples and local communities is their lack of financial and other support.<sup>208</sup> Such lack of capacity remains a concern both in terms of the past negotiations on the *Protocol* and its implementation.

162. According to the Secretariat, the *Convention on Biological Diversity* “remains the only Multilateral Environmental Treaty to have established a voluntary fund for indigenous and local community participation in meetings held under the Convention. ... The programme of work for article 8(j) and related provisions for the 2011-12 biennium has twenty-one projects” specific for Indigenous peoples and local communities.<sup>209</sup>

163. Negotiation of a new international treaty, such as the *Protocol*, can result in significant impacts on Indigenous peoples’ rights. International institutions and Parties have a responsibility to ensure adequate funding for Indigenous representatives from each region.

164. The voluntary fund was insufficient to ensure that adequate numbers of Indigenous peoples had the capacity to prepare for and attend the negotiations on the *Protocol*. Unless Parties significantly increase their contributions, the voluntary fund will be unable to meet the participatory needs of Indigenous peoples and local communities during the implementation phase.

165. There was an inadequate number of representatives at the negotiations to ensure proper research and timely development of positions and discussions with the States and European Union. There was also an insufficient number of spokespersons at the negotiations table, with the necessary technical and legal expertise on a wide range of matters. It was virtually impossible to effectively participate in the large number of meetings that took place at the same time in Nagoya, Japan during the final stages.
166. Indigenous peoples are not simply stakeholders. They are rights-holders with the right of self-determination.<sup>210</sup> During the years of negotiating UNDRIP, Indigenous representatives from around the world were funded from various sources and democratically included in significant numbers that far exceeded what transpired with the *Protocol*.
167. Based on the specific provisions in the *Protocol*, there is little indication that the Parties are committed to ensuring the full and effective participation of Indigenous peoples and local communities in its implementation.
168. For example, in regard to developing States, the Parties “shall cooperate in the capacity-building, capacity development and strengthening of human resources and institutional capacities to effectively implement this Protocol” (article 21(1)). Yet in the same paragraph, there is no binding commitment in relation to Indigenous peoples and local communities:

Parties should facilitate the involvement of indigenous and local communities and relevant stakeholders, including non-governmental organizations and the private sector.<sup>211</sup>

169. The ongoing lack of human and financial resources precludes full and effective participation of Indigenous peoples in decision-making processes at the international level.<sup>212</sup> It undermines the achievement of a democratic and fair process.
170. In regard to international processes relating to biodiversity and climate change, the Expert Mechanism’s Progress Report emphasizes “full and direct participation ... since [these negotiations] often *have a disproportionate impact on indigenous peoples and their territories*. However, consistent financial and administrative support is needed to ensure that indigenous peoples maintain appropriate participation in international bodies”.<sup>213</sup>
171. It is essential to apply principles of democracy to international and regional processes and not solely to those in domestic contexts. As concluded in a 2003 expert seminar on the interdependence between democracy and human rights:

In the current context of globalization, whereby decisions affecting people’s lives are often taken outside the national context, the application of the principles of democracy to the international and regional levels has taken on added importance.<sup>214</sup>

#### **XIV. “Consensus” Exploited in Undermining Indigenous Rights**

172. In the negotiations on the *Nagoya Protocol*, there was no legal obligation to require consensus<sup>215</sup> among the Parties. Even if such a duty existed, it could not prevail over the obligations of States to respect the *Charter of the United Nations*, *Convention on Biological Diversity* and international human rights law.
173. The same was true for the Conference of the Parties. On matters of substance, there was no legal requirement to obtain consensus.<sup>216</sup> In any event, such a rule could not prevail over the Parties' international human rights obligations.
174. There are compelling reasons for not establishing rigid rules requiring consensus. Crucial measures on such global issues as biodiversity, climate change, environmental security and human rights are too important to be held back or paralyzed by a lack of consensus.<sup>217</sup>
175. In the negotiations on the *Protocol*, the Parties chose to proceed by way of consensus. The process proved especially onerous for Indigenous peoples, since the procedural rules were weighted in favour of States. Throughout the negotiations, Indigenous peoples remained vulnerable to State discretion.
176. Indigenous peoples were not permitted to table any proposed amendments to the *Protocol*. In order to add Indigenous proposals to the text, they had to be supported by at least one Party. Indigenous peoples were not part of any consensus on provisions relating to Indigenous rights and concerns.
177. In July 2010, one of the Co-chairs in the negotiations announced that, from now on, only Parties could propose and accept text. After the IIFB left the negotiations in protest, the decision was reversed.<sup>218</sup>
178. Since the final text was intended to reflect a consensus among the Parties, it was often the *lowest common denominator* among their positions that was reflected in the *Protocol*. Such a substandard dynamic did not serve to fulfill the key objectives of the *Convention on Biodiversity*.
179. The practice of seeking consensus solely among the Parties is especially unjust in relation to Indigenous peoples. States continue to be major violators of Indigenous peoples' human rights. They should not be accorded procedural advantages that enable them to further undermine Indigenous peoples' status and rights.
180. International human rights standards were largely disregarded by the Parties. Such conduct was facilitated by exploiting the "need" for consensus.
181. Positions were repeatedly taken to excessively reinforce State sovereignty, while attempting to circumscribe Indigenous peoples' rights through national legislation. If successful, such actions could perpetuate State domination. They could impair the universality of Indigenous peoples' human rights and undermine the international system.
182. Consensus can show a unity of purpose, but it loses its significance and validity if achieved at the expense of human rights. Even where a consensus "rule" exists, the UN Secretary-General has described consensus as a "privilege ... [and] that this privilege comes with responsibility".<sup>219</sup> Concerns relating to consensus have also surfaced at the General Assembly.

... unfortunately, consensus (often interpreted as requiring unanimity) has become an end in itself. ... This has *not proved an effective way of reconciling the interests of Member States*. Rather, it prompts the Assembly to retreat into generalities, abandoning any serious effort to take action. Such real debates as there are tend to focus on process rather than substance and *many so-called decisions simply reflect the lowest common denominator of widely different opinions.*<sup>220</sup>

183. Similarly, James Anaya has commented on the problems generated by consensus when the lowest common denominator is a prevailing factor:

In the process of negotiation, however, the goal of consensus should not be used to impede progress on a progressive text. *Consensus does not imply a veto power of every participant at every step* ... Consensus does not mean perfect unanimity of opinion nor bowing to the lowest common denominator. It means coming together in a spirit [of] mutual understanding and common purpose to build and settle upon common ground.<sup>221</sup>

184. In relation to the standard-setting process on the *UN Declaration*, it was agreed that any consensus on the draft text would need to include both States and Indigenous peoples. Otherwise, it would not have been possible to reach a compromise and achieve a just and balanced human rights instrument.

185. The Chair of the working group on the *Declaration* made it clear that any consensus would include both States and Indigenous peoples. *While achieving consensus was desirable, no strict requirement was imposed.* State and Indigenous representatives had equal rights to make interventions and propose text.

186. Thus, in regard to the negotiations on the *UN Declaration*, an inclusive and democratic process of participation<sup>222</sup> was established within the United Nations. It still constitutes today an impressive precedent and best practice.

187. For the July and September 2010 meetings in Montreal, substantive and procedural objections relating to the negotiation of the draft Protocol were elaborated in advance by Indigenous and civil society organizations from different regions of the world.<sup>223</sup> There was no substantive response to these objections. Consensus among the Parties continued to be the dominant consideration, at the expense of Indigenous peoples' status and human rights.

188. In contrast, consensus was not a rigid requirement in the climate change talks in Cancún, Mexico in December 2010. When Bolivia objected and insisted that improvements be made to the text that had majority support, the Chair of the meeting indicated that consensus did not mean that a State had a right of veto and declared the text adopted.<sup>224</sup>

## **XV. Adverse Impacts of Consensus Approach**

189. In relation to the negotiations of the *Protocol*, it is beneficial to identify some adverse impacts that arose from rigidly adopting a consensus approach. With regard to Indigenous peoples and local communities, these prejudicial impacts include, *inter alia*:

- a) **Objective of *Convention* not attained.** The objective of “fair and equitable” benefit-sharing in the *Convention* was not achieved, since consensus appeared to be a main focus of the Parties, at the expense of Indigenous peoples’ human rights. Little effort was made in the negotiations to include a rights-based approach.<sup>225</sup>
- b) ***UN Charter* and UNDRIP not fairly considered.** Parties paid little attention to their human rights obligations under the *Charter of the United Nations* and principles of international law. In regard to UNDRIP, they failed to fairly reflect the principles, Indigenous rights and related State obligations affirmed in this human rights instrument.<sup>226</sup>
- c) **Imbalance in use of national legislation.** Phrases – such as “subject to national legislation” and “in accordance with national legislation” – were repeatedly used that could give significant discretion to States to dominate Indigenous peoples and restrict their rights. Yet Indigenous peoples’ inherent rights are not dependent on national legislation for their existence.<sup>227</sup> According to the *Convention*, these phrases are intended to be used in a *supportive* manner to achieve the objectives of the *Convention* and *Protocol*.<sup>228</sup>
- d) **Discriminatory action to restrict Indigenous rights.** Consensus was also used to approve discriminatory proposals that contradicted the *Convention* and sought to solely address “established rights” to genetic resources.<sup>229</sup>
- e) **Legal certainty not realized.** There are over 45 references to such phrases as “where appropriate”, “as appropriate”, “as applicable” and “where applicable” that make it unclear as to what are the obligations of the Parties.<sup>230</sup> “Appropriateness” is described by the Committee on Economic, Social and Cultural Rights so as to be “respectful of the culture and cultural rights of ... Indigenous peoples”.<sup>231</sup>
- f) **Publicly available traditional knowledge unprotected.** In Nagoya, the Parties deleted the draft provision to protect traditional knowledge that was “publicly available”,<sup>232</sup> but for which no Indigenous consent had been given for commercial use. The absence of safeguards in the *Protocol* may “significantly reduce the scope for benefit-sharing as much traditional knowledge has already been documented and is freely accessible”.<sup>233</sup>
- g) **No authority for COP decisions to derogate from treaties.** On key issues, COP 10 decisions derogated from the text of the *Convention* and *Protocol* to the possible detriment of Indigenous peoples and local communities. Such actions lack validity and legitimacy.<sup>234</sup>
- h) **Parties unwilling to commit to ethical conduct.** The application of the Tkarihwaié:ri Ethical Code of Conduct was severely constrained by COP. It is stipulated that the Code “should not be construed as altering or interpreting the obligations of Parties to the

Convention of Biological Diversity or any other international instrument.”<sup>235</sup> Similarly, domestic laws are also exempted from ethical scrutiny based on the Code of Conduct.

The above shortcomings resulted from the unbalanced consensus process. Thus, the rights, security and well-being of Indigenous peoples and local communities are not assured in the *Protocol*.

## XVI. Conclusions and Recommendations

190. **Biodiversity must be protected globally.** There is an urgent need for effective measures to safeguard the world’s biodiversity and natural environment. The severe and increasing loss of biodiversity must be reversed. In this context, Indigenous peoples and local communities play a key role. Their rights must be respected, protected and fulfilled.
191. **Need for a principled regime.** The central purpose of the *Nagoya Protocol* is to implement one of the three key objectives in the *Convention on Biological Diversity* – namely, “fair and equitable” sharing of benefits arising from the use of genetic resources. With respect to such resources, the importance of achieving a principled and effective international regime is beyond question.
192. **Respect for principles of international law.** The *Convention* requires consistency with *principles of international law*. These would include, *inter alia*, justice, democracy, respect for human rights, equality, non-discrimination, good governance and good faith. According to the *Convention*, principles of international law must be respected when States exercise their right to exploit their own resources.
193. These core international principles are an integral part of the *United Nations Declaration on the Rights of Indigenous Peoples* (UNDRIP).
194. **UNDRIP must be fully applied.** The *Convention* and *Protocol* are international environmental agreements. It is erroneous for States to argue that human rights issues should be addressed in other instruments and forums. The Parties – as well as the Conference of the Parties (COP) – have largely failed to “promote respect for and *full application* of the provisions of the Declaration and follow up [its] effectiveness”.<sup>236</sup>
195. UNDRIP is a universal human rights instrument. According to its own terms, the *Protocol* “shall be implemented in a mutually supportive manner with other international instruments relevant to the Protocol”.<sup>237</sup> The obligations of Parties under any existing international agreement – such as UNDRIP – cannot be undermined by the *Convention* or *Protocol*.<sup>238</sup>
196. In view of these legal requirements, the *Protocol* cannot be interpreted or implemented by solely considering its own provisions. *In relation to Indigenous peoples, their rights and related State obligations must be read together with UNDRIP and other international human rights instruments.* UNDRIP cannot be segregated from rule of law issues relating to Indigenous peoples’ human rights.<sup>239</sup>

197. **UNDRIP interprets international treaties.** When Indigenous issues arise, UNDRIP is widely used to interpret international human rights conventions.<sup>240</sup> These conventions remain relevant to the *Protocol* and reinforce the significance of UNDRIP in the biodiversity context.
198. Any interpretation that undermines Indigenous rights would be inconsistent with “fair and equitable” benefit sharing. It would also be incompatible with the other legal requirements in the *Protocol*.<sup>241</sup>
199. **Need for “full and effective participation”.** National legislative and other measures were included in the *Protocol* with little or no regard for the progressive development of international standards. In relation to the formulation and adoption of such measures, the democratic requirement of “full and effective participation” of Indigenous peoples and local communities was virtually unaddressed.<sup>242</sup>
200. **Domestic measures must support central objective.** In regard to its implementation, the *Protocol* does not permit national legislation or other measures by the Parties to derogate from the treaty’s central objective of “fair and equitable” benefit sharing and other legal requirements. National legislation cannot mean arbitrary State power over Indigenous peoples and local communities. Consistent with the general rule in international law, international human rights standards take precedence over contradictory national law and standards.<sup>243</sup>
201. **Discriminatory limitation of “established” rights.** In regard to access and benefit sharing arising from the use of genetic resources, the *Protocol* only addresses “established”<sup>244</sup> rights of Indigenous and local communities. Other rights based on customary use of genetic resources appear to be excluded from benefit sharing.<sup>245</sup>
202. Failure to extend benefit sharing to such other rights is discriminatory.<sup>246</sup> Such discrimination violates the *Charter of the United Nations*, *Convention on Biological Diversity* and international human rights law, including UNDRIP.
203. Since the prohibition against racial discrimination is a peremptory norm, the articles that distinguish on the basis of “established” rights have no legitimacy or validity.<sup>247</sup> Such articles require urgent revision.
204. **Urgent need for capacity-building.** In matters related to the *Nagoya Protocol*, the full and effective participation of Indigenous peoples and local communities was severely impeded by their lack of capacity. This remains a concern both in terms of the past negotiations on the *Protocol* and its upcoming implementation.
205. **Democratic participation not yet achieved.** The negotiation of a new international treaty often has significant impacts on Indigenous peoples’ rights. The relevant international institutions and Parties have a responsibility to ensure adequate funding for Indigenous representatives from each region. Failure to respect principles of democracy and human rights – as in the *Protocol* – severely detracts from the legitimacy of the negotiations and resulting treaty.
206. Indigenous peoples’ rights and related State obligations are increasingly impacted in negotiations at the international level. It is imperative to ensure the full and effective

participation of Indigenous peoples in international forums, in accordance with democratic principles. This is especially urgent in respect to such global issues as biodiversity, climate change and intellectual property.<sup>248</sup>

207. **Repeated abuse of consensus.** In international negotiations, consensus can show a unity of purpose but it loses its significance and validity if achieved at the expense of human rights. Such a substandard approach repeatedly occurred during the negotiations of the *Protocol*. As a result, there have been numerous substantive and procedural injustices that are likely to affect present and future generations.
208. In relation to Indigenous peoples and local communities, inflexible consensus practices among the Parties are not an appropriate way to achieve uplifting and effective international standards. States continue to be major violators of Indigenous peoples' human rights and too often lack sufficient resolve to live up to their *UN Charter* and other international obligations. Experience shows that consensus in the biodiversity context has led to a "lowest-common-denominator" dynamic.<sup>249</sup>
209. It is deeply troubling that, in regard to UNDRIP, it took only a single State to exploit the practice of consensus in the negotiations so as to lower standards in the *Protocol*. Such a process requires fundamental change.<sup>250</sup>
210. In relation to the *Protocol*, the practice of seeking consensus solely among the Parties is prejudicial to Indigenous peoples and local communities.<sup>251</sup> It is not consistent with the status of Indigenous peoples as subjects of international law<sup>252</sup> or with international standards on democratic participation.
211. **Special protections required.** Instead of increasing the vulnerability of Indigenous peoples through possible dispossessions and other injustices, the *Protocol* should have required special measures to promote and safeguard their rights to genetic resources and other cultural heritage. Such special measures are crucial in international human rights law.
212. Biodiversity is critical to the health and well-being of Indigenous peoples and local communities.<sup>253</sup> Parties sought to consolidate their own discretionary powers in the *Protocol*, rather than ensure a principled, balanced and effective international regime.
213. **Regressive aspects of *Protocol*.** In relation to Indigenous peoples and local communities, the *Protocol* is regressive in key respects that need redress. In disregarding the *Charter of the United Nations* and principles of international law, such as in UNDRIP, the Parties are violating the rule of law. In ignoring the standards in UNDRIP and other human rights instruments, the progressive development of international law is being denied. The discriminatory aspects of the *Protocol* must be revised.
214. In December 2010, Member States in the General Assembly adopted by consensus a resolution on the rule of law. The resolution reiterates the following approach for the General Assembly, but it is not the standard that is applied to Indigenous peoples and local communities in the *Protocol*:

*Reaffirms* the role of the General Assembly in encouraging the progressive development of international law and its codification, and reaffirms further that States shall abide by all their obligations under international law ...<sup>254</sup>

215. **Undermining confidence in the international system.** States made solemn commitments in endorsing UNDRIP that must be fully respected. They must be held accountable on Indigenous rights to traditional knowledge and genetic resources in the *Protocol*.<sup>255</sup> States must not renege on their commitments to Indigenous peoples in a human rights instrument that now enjoys global consensus.
216. For more than 20 years, UNDRIP was discussed and negotiated in a democratic process that included Indigenous peoples. It is imperative that States fully honour their commitments in good faith. Otherwise, confidence and trust in the international system and international negotiations may be severely eroded.

### 16.1 Specific recommendations

217. During the negotiations of the *Protocol*, Parties repeatedly indicated that the human rights concerns of Indigenous peoples would be more appropriately raised in other international forums.
218. Specific recommendations in this Submission respectfully include the following.
219. In relation to the rights of Indigenous peoples and local communities, the UN Secretary-General should review violations of the rule of law occurring in the context of the *Convention* and the *Nagoya Protocol*. Additional concerns include: abuse of consensus procedures to undermine human rights; and failure to apply international standards that have progressively developed since the adoption of the *Convention* in 1992.
220. With regard to its current “Study on indigenous peoples and the right to participate in decision-making”, the Expert Mechanism on the Rights of Indigenous Peoples is including processes at the international and regional levels.<sup>256</sup> The Expert Mechanism should pay particular attention to the current challenges and shortcomings elaborated in this Joint Submission.
221. The Special Rapporteur on the rights of indigenous peoples, James Anaya, should review the broad range of concerns raised in this Joint Submission that are within his mandate. Such issues include, *inter alia*, Indigenous rights and related obligations pertaining to UNDRIP; self-determination; resource development; fair and equitable benefit-sharing; duty of States to consult and cooperate with Indigenous peoples; free, prior and informed consent; full and effective participation; and democracy.
222. The independent expert in the field of cultural rights, Ms. Farida Shaheed, should review the concerns raised in this Joint Submission relating to the cultural rights of Indigenous peoples and local communities. The right to participate in cultural life and related issues of non-discrimination and free, prior and informed consent would be of particular interest in the context of biodiversity and cultural heritage.

223. Widespread dispossession in different regions of the world may result from the discriminatory distinction based on “established” rights to genetic resources in the *Protocol*. Indigenous peoples and local communities should consider a request to the Committee on the Elimination of Racial Discrimination for early warning and urgent action procedures.<sup>257</sup>

224. In its 2010 report, the UN Permanent Forum on Indigenous Issues has addressed concerns relating to the *Convention* and the negotiations on the *Protocol*. The recommendations made by the Permanent Forum have not been fully implemented, especially in relation to genetic resources, UNDRIP and the use of the term “peoples”. This Joint Submission is being submitted to the Permanent Forum for consideration and action.

225. The above steps should provide authoritative instruction and guidance for fair and equitable implementation of the *Protocol*, as well as possible revisions to its text. Regressive and other unjust dimensions of the *Protocol* should be addressed under article 31 of this treaty, among other ways:

The Conference of the Parties serving as the meeting of the Parties to this Protocol shall undertake, four years after the entry into force of this Protocol ... an *evaluation of the effectiveness of this Protocol*.<sup>258</sup>

226. Some concerns should not wait for the evaluation in four years. For example, matters of discrimination, exceeding the authority of the *Convention* and other pressing or priority issues should be accommodated in the COP 11 meeting in India, in October 2012, with a view to amending the *Protocol*.

227. In preparation for the evaluation in four years and COP 11, representatives of Indigenous peoples and local communities should be ensured full and effective participation at all stages – including through advance meetings and written submissions.

228. In relation to Indigenous peoples and local communities, concerns that should be considered for further action include, *inter alia*, the following:

- i) Take into account “all rights” through a rights-based approach, as required by the central objective of the *Convention* and *Protocol*;
- ii) clarify unequivocally that national legislation must be *supportive* of the objective of “fair and equitable” benefit sharing, consistent with Indigenous peoples’ human rights and related State obligations;
- iii) eliminate discriminatory elements in the *Protocol*, particularly the refusal to refer to Indigenous peoples as “peoples” and the restriction of genetic resource rights to “established” rights;
- iv) redress procedural injustices, including unfair restrictions on interventions and tabling of proposed amendments;<sup>259</sup> and exclusion of representatives of Indigenous peoples from negotiation meetings where their rights may be undermined;<sup>260</sup>

- v) fully respect the *UN Declaration on the Rights of Indigenous Peoples*, in interpreting and implementing the *Convention* and *Protocol*;
- vi) reiterate the importance of “prior and informed consent”, eliminating questionable and ambiguous interpretations;
- vii) include specific safeguards for “publicly available” traditional knowledge;
- viii) ensure that provisions of the *Protocol* “shall not affect the ... obligations of any Party deriving from any existing international agreement”,<sup>261</sup> particularly those relating to human rights;
- ix) ensure that Parties fully respect the rule of law, including their international human rights obligations;
- x) enhance significantly the “full and effective participation” of Indigenous peoples and local communities in all aspects of the *Protocol*, through legal commitments to capacity-building and democratic, inclusive processes; and
- xi) provide an effective process to hold Parties accountable in fulfilling their obligations in respect to the *Protocol*.

229. The Conference of the Parties should consider revising those decisions made in October 2010, where it altered the terms of the *Protocol* to the detriment of Indigenous peoples and local communities. Such actions exceed the authority of COP.

230. International solidarity with Indigenous peoples and local communities should also be reinforced, in a manner that fully implements UNDRIP. As concluded by the UN Independent expert on human rights and international solidarity:

*International solidarity ... encompasses the values of social justice and equity ... and integrity of the international community ... International ... solidarity ... includes ... refraining from doing harm or posing obstacles to the greater well-being of others, including ... to our common ecological habitat, for which all are responsible. ... Special attention must be given to the human rights of vulnerable groups, including ... indigenous peoples ....*<sup>262</sup>

<sup>8</sup> Permanent Forum on Indigenous Issues, *Report on the ninth session (16 – 30 April 2010)*, Economic and Social Council, Official Records, Supplement No. 23, United Nations, New York, E/2010/43-E/C.19/2010/15, para. 113. [emphasis added]

<sup>9</sup> Office of the High Commissioner for Human Rights, “Combating Discrimination against Indigenous Peoples”, online: [http://www.ohchr.org/EN/Issues/Discrimination/Pages/discrimination\\_indigenous.aspx](http://www.ohchr.org/EN/Issues/Discrimination/Pages/discrimination_indigenous.aspx):

Indigenous peoples face many challenges and their human rights are frequently violated: they are denied control over their own development based on their own values, needs and priorities; they are politically under-represented and lack access to social and other services. They are often marginalized when it comes to projects affecting their lands and have been the victims of forced displacement as a result of ventures such as the exploitation of natural resources.

<sup>10</sup> See, e.g., Valeria A. Gheorghiu, “Sailing The Seas of Treaties: Biopiracy in the Wake of the International Treaty on Plant Genetic Resources for Food and Agriculture”, (2006) 7 *Fourth World Journal* 1 at 1:

Rather than outright theft of physical property, neo-imperialists have “discovered” intellectual property, or indigenous knowledge of bioresources, such as medicinal plants or seed varieties. Instead of supporting the theft of indigenous knowledge using the doctrine of discovery to promote their view of progress as they had with indigenous lands, they use their patent systems to rationalize the theft of indigenous knowledge because of their “inventive” genetic advancements thereupon in a form of “intellectual colonization.” Using their intellectual property regime, they *secure the profits of their genetic advancements based upon indigenous knowledge without compensating the original indigenous holders of that knowledge for their initial discoveries and developments*. [emphasis added]

<sup>11</sup> Krystyna Swiderska, *Banishing The Biopirates: A New Approach To Protecting Traditional Knowledge*, Gatekeeper Series 129, International Institute for Environment and Development (London: IIED, 2006) at 5. Biopiracy may also take place for non-commercial purposes, such as by researchers and universities, where no free, prior and informed consent has been obtained from the Indigenous peoples concerned.

See also Humberto Márquez, “Biopiracy leaves Venezuela's native groups out in the cold”, *Caribbean 360* (17 February 2011), online [http://www.caribbean360.com/index.php/news/venezuela\\_news/237847.html](http://www.caribbean360.com/index.php/news/venezuela_news/237847.html):

Millions of cancer patients around the world benefit from a medication called Paclitaxel (Taxol), which may begin to be produced from a new source: fungi found at the summit of Venezuela's flat-topped mountains. But the indigenous communities who have lived in that area since time immemorial will receive no benefits, and were not even consulted on the matter.

Network of the Indigenous Peoples – Solomons (NIPS), “NIPS urges withdrawal of US patent application”, Press Statement, Honiara, Solomon Islands, 11 March 2011, where it is said that Indigenous individuals who supplied genetic samples were not aware of the patent application and would not have consented to taking part had they known the research would be used in such manner. The application was subsequently withdrawn: see NIPS, “NIPS welcomes abandonment of patent application involving SI samples”, Press Statement, 6 April 2011. However, “questions ... need

[to] be answered including whether any cell lines of the Solomon Islanders were immortalized, and if any samples were shared with other researchers or institutions in Taiwan and abroad.”

<sup>12</sup> See, e.g., African Centre for Biosafety, “Pirating African Heritage: The Pillaging Continues”, Briefing paper, Johannesburg, South Africa, 2009 at 4:

Although traditional knowledge is held by local and indigenous people and published in journals, databases, periodicals and so forth, patent examiners rarely consider this. ... [P]atent systems in Europe and the United States are being used to promote the misappropriation of traditional knowledge and biological resources from the South. It is also our contention that the illegality of a patent cannot be cured by the existence of prior informed consent, benefit sharing or so called fair trade agreements.”

Indigenous peoples in Taiwan face widespread abuses of their rights in the commercialization of biotechnology: see, e.g., Mark Munsterhjelm & Frederic Gilbert, “How do researcher duties conflict with Aboriginal rights?: Genetics research and biobank problems in Taiwan”, *DILEMATA*, año 2 (2010), n° 4, 33. In regard to patent applications for human genetic samples, the authors describe at 42-44 how Indigenous rights are violated by researchers.

<sup>13</sup> Ad Hoc Open-Ended Inter-Sessional Working Group on Article 8(j) and Related Provisions of the Convention on Biological Diversity, “Composite Report on the Status and Trends Regarding the Knowledge, Innovations and Practices of Indigenous and Local Communities – Regional report: North America: Note by the Executive Secretary”, UN Doc. UNEP/CBD/WG8J/3/INF/8 (7 October 2003), at 12. [italics in original]

<sup>14</sup> See, e.g., “Updated Global Strategy for Plant Conservation 2011-2020” in Conference of the Parties to the Convention on Biological Diversity, *Consolidated update of the Global Strategy for Plant Conservation 2011-2020*, Decision X/17, UN Doc. UNEP/CBD/COP/DEC/X/17 (29 October 2010), Annex, para. 9:

... plant diversity is of special concern to indigenous and local communities, and these communities have a vital role to play in addressing the loss of plant diversity.

European Council, “Indigenous peoples within the framework of the development cooperation of the Community and the Member States”, Resolution, 30 November 1998:

... many indigenous peoples inhabit areas crucial for the conservation of biodiversity, and maintain social and cultural practices by way of which indigenous peoples have a special role in maintaining and enhancing biological diversity and in providing unique sustainable development models.

<sup>15</sup> Office of the High Commissioner for Human Rights, “It’s not enough to support the Declaration on the Rights of Indigenous Peoples, says UN expert”, statement issued by UN Special Rapporteur on the situation of human rights and fundamental freedoms of indigenous people, James Anaya, on the occasion of the International Day of the World’s Indigenous Peoples, Geneva, 9 August 2010: “[Indigenous peoples] have preserved, generation after generation, an extraordinary wealth of knowledge, culture, and spirituality in the common benefit of humankind, contributing significantly to the world’s diversity and environmental sustainability”.

<sup>16</sup> “Opening address by Mr. Ahmed Djoghla, Executive Secretary of the Convention on Biological Diversity” in Conference of the Parties to the Convention on Biological Diversity, *Report of the Tenth Meeting of the Conference of the Parties to the Convention on Biological Diversity*, Nagoya, Japan, 18-29 October 2010, UN Doc. UNEP/CBD/COP/10/27 (19 December 2010) at 10, para. 24:

The current generation ... failed to meet the pledge made at the World Summit on Sustainable Development in Johannesburg in 2002 to reduce the loss of biodiversity by 2010. Indeed, according to the third edition of Global Biodiversity Outlook, the *rate of biodiversity loss was one thousand times higher than the background and historical rate of extinction*. If that loss rate was allowed to continue, it would soon lead to a tipping point with irreversible damage to the capacity of the planet to continue sustaining life. [emphasis added]

<sup>22</sup> General Assembly, *Convention on Biological Diversity*, UN Doc. A/RES/65/161 (11 March 2011) (res. adopted without vote 20 December 2010), para. 12.

<sup>23</sup> Forest Peoples Programme, “People, Poverty, Livelihoods, Ecosystems and Biodiversity: a rights based approach”, 31 October 2003, <http://www.swedbio.com/dokument/FPPreport%20to%20swedbio.pdf>, at 1:

Securing biodiversity conservation through the empowerment of local communities and indigenous peoples, *requires a rights-based approach* to ecosystem management and community development. Without secure rights and tangible benefits, local communities are inevitably marginalised by development and conservation impositions and are forced into opposition to such schemes. [emphasis added]

<sup>24</sup> Article 1 of the *Convention on Biological Diversity* and the *Nagoya Protocol* [emphasis added]. Indigenous peoples’ human rights must be an integral part of any “fair and equitable” benefit sharing regime. See also Dalee Sambo Dorough, “Brief statement on human rights”, Permanent Forum on Indigenous Issues, 10<sup>th</sup> session, (19 May 2011):

Regardless of what issues may arise in any given situation - the human rights of Indigenous peoples are always relevant if such rights are at risk of being undermined. In this regard, it is difficult to remove from or segregate Indigenous human rights for any discussion. ... [O]ne of the fundamental elements of human rights is that they are indivisible, inter-dependent, and inter-related and are therefore, relevant in any context specifically concerning Indigenous peoples, from environment to development to peace and security and many other issues.

<sup>25</sup> United Nations Development Group, “United Nations Development Group Guidelines on Indigenous Peoples’ Issues”, February 2008, [www2.ohchr.org/english/issues/indigenous/docs/guidelines.pdf](http://www2.ohchr.org/english/issues/indigenous/docs/guidelines.pdf), at 24:

The human rights standards contained in, and principles derived from, the Universal Declaration of Human Rights, the United Nations Declaration on the Rights of Indigenous Peoples and other international human rights instruments, as well as the recognition of indigenous peoples’ collective rights, provide the framework *for adopting a human rights-based and culturally sensitive approach* when addressing the specific situation of indigenous peoples. [emphasis added]

See also Commission on Human Rights, *Report of the United Nations High Commissioner for Human Rights and Follow-up to the World Conference on Human Rights*, UN Doc. E/CN.4/2003/14 (26 February 2003), para. 53:

---

*The rights-based approach must be the starting point for all our endeavours, whatever our spheres of operation: trade, finance, development, security, in both the public and private sectors. In a sense, this is an approach that involves human rights strategies of governance, namely, that we take the basic human rights as the starting point for governmental programmes and the programmes of national, regional and international institutions. [emphasis added]*

<sup>26</sup> In the context of access and benefit-sharing, dispossession of the rights of Indigenous peoples and local communities is precisely what the *Convention and Nagoya Protocol* is supposed to address. See, e.g., Forest Peoples Programme, “Environmental Governance”, online: <http://www.forestpeoples.org/topics/environmental-governance>:

... forest peoples do not have secure tenure over these areas [of high biodiversity] and are denied access and use of their territories because of inadequate government policies, extractive industries’ activities, or conservation initiatives, such as protected areas. At the same time, many indigenous territories are increasingly threatened by unsustainable activities such as logging, mining, and plantations while the communities are not, or are only minimally, involved in official decision-making and management of these areas.

<sup>27</sup> UN Sub-Commission on the Promotion and Protection of Human Rights, *Indigenous peoples’ permanent sovereignty over natural resources: Final report of the Special Rapporteur, Erica-Irene A. Daes*, UN Doc. E/CN.4/Sub.2/2004/30 (13 July 2004), para. 56 (Principal conclusions): “The right of indigenous peoples to permanent sovereignty over natural resources may be articulated as follows: it is a collective right by virtue of which States are obligated to respect, protect, and promote the governmental and property interests of indigenous peoples (as collectivities) in their natural resources.”

*A Circumpolar Inuit Declaration on Sovereignty in the Arctic*, adopted by the Inuit Circumpolar Conference on behalf of Inuit in Greenland, Canada, Alaska, and Chukotka (April 2009), para. 2.1: “Sovereignties overlap and are frequently divided within federations in creative ways to recognize the right of peoples.”

See also Neva Collings, “Environment” in United Nations (Department of Economic and Social Affairs), *State of the World’s Indigenous Peoples* (New York: United Nations, 2009) 84, at 98: “... the Convention on Biological Diversity ... reaffirms that “states have sovereign rights over their own biological resources”. On the international and domestic stages, the challenge for indigenous peoples is to assert their sovereign rights as peoples to natural resources, decisions concerning resources, and the way in which states engage with them.”

*Haida Nation v. British Columbia (Minister of Forests)*, [2004] 3 S.C.R. 511 (Supreme Court of Canada), para. 20:

Where treaties remain to be concluded, the honour of the Crown requires negotiations leading to a just settlement of Aboriginal claims ... Treaties serve to reconcile pre-existing Aboriginal sovereignty with assumed Crown sovereignty ... sovereignty claims [are] reconciled through the process of honourable negotiation.

<sup>28</sup> *Charter of the United Nations*, arts. 55c and 56. These articles reinforce the purposes of the *UN Charter*, which includes in art. 1(3): “To achieve international cooperation ... in promoting and encouraging respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion.”

<sup>29</sup> United Nations, *New Voices: National Perspectives on Rule of Law Assistance*, 2011, <http://www.unrol.org/files/FINAL%20National%20Perspectives%20Report.pdf> at 8, where it is added: “[The rule of law] requires, as well, measures to ensure adherence to the principles of supremacy of law, equality before the law, accountability to the law, fairness in the application of the law, separation of powers, participation in decision-making, legal certainty, avoidance of arbitrariness and procedural and legal transparency.”

<sup>30</sup> See, e.g., *Cal et al. v. Attorney General of Belize and Minister of Natural Resources and Environment*, Claim No. 171, and *Coy et al. v. Attorney General of Belize and Minister of Natural Resources and Environment*, Claim No. 172, Consolidated Claims, Supreme Court of Belize, judgment rendered on 18 October 2007 by the Hon. Abdulai Conteh, Chief Justice, para. 131, where UNDRIP was cited and relied upon: “...where these ... Declarations contain principles of general international law, states are not expected to disregard them.”

<sup>31</sup> UNDRIP, article 46(3).

<sup>32</sup> In regard to Indigenous peoples' right to cultural diversity, see UNDRIP, preambular para. 2 (right to be different) and the many provisions relating to culture, including arts. 3, 4, 8, 9, 11–16, 25, 31–34, 36, 37, 38, 40 and 41. The provisions on lands, territories and resources are also of central importance.

In relation to Indigenous peoples' right to biological diversity, see UNDRIP, arts. 29(1) (right to conservation and protection of the environment and the productive capacity of their lands or territories and resources) and 31(1) (right to maintain, control, protect and develop their cultural heritage, traditional knowledge and traditional cultural expressions, as well as the manifestations of their sciences, technologies and cultures, including human and genetic resources, seeds, medicines, etc.).

<sup>33</sup> UNDRIP, art. 7(2) (right to live in peace and security, as distinct peoples), read together with arts. 29(1) (right to conservation and protection of environment and the productive capacity of their lands, territories and resources); 32(1) (right to determine and develop priorities and strategies for development or use of their lands, territories and resources); 32(2) (State duty to consult and cooperate in good faith, in order to obtain free and informed consent); and 32(3) (State duty to mitigate adverse environmental, economic, social, cultural or spiritual impacts).

See also *African Charter of Human and Peoples' Rights*, art. 23(1): "All peoples shall have the right to national and international peace and security"; and art. 24: "All peoples shall have the right to a general satisfactory environment favorable to their development."

<sup>34</sup> UNDRIP, art. 7(2) (peace and security), read together with arts. 3 (right to self-determination); and 20 (right to own means of subsistence and development). See also identical art. 1(2) in the two international human rights Covenants: "All peoples may, for their own ends, freely dispose of their natural wealth and resources ... In no case may a people be deprived of its own means of subsistence."

See also *Convention on Biological Diversity*, preamble: "Aware that conservation and sustainable use of biological diversity is of *critical importance for meeting the food, health and other needs* of the growing world population, for which purpose *access to and sharing of both genetic resources and technologies* are essential". [emphasis added]

<sup>35</sup> See generally UNDRIP. John B. Henriksen, "Implementation of the Right of Self-Determination of Indigenous Peoples Within the Framework of Human Security", in M.C. van Walt van Praag & O. Seroo, eds., *The Implementation of the Right to Self-Determination as a Contribution to Conflict Prevention* (Barcelona: Centre UNESCO de Catalunya, 1999) 226, at 226: "'indigenous peoples human security' . . . encompasses many elements, inter alia physical, spiritual, health, religious, cultural, economic, environmental, social and political aspects."

<sup>36</sup> *Nagoya Protocol*, Art. 4(3). See also preamble: "Recognizing that international instruments related to access and benefit-sharing should be mutually supportive with a view to achieving the objectives of the Convention".

<sup>37</sup> See, generally, Ronald Mitchell, "International Environmental Agreements: A Survey of Their Features, Formation and Effects" in Charlotte Ku & Paul F. Diehl, eds., *International Law: Classic and Contemporary Readings*, 3<sup>rd</sup> ed. (Boulder, Colorado: Lynne Rienner Publishers, 2009) 341.

<sup>38</sup> Human Rights Council, *Report of the independent expert in the field of cultural rights, Ms. Farida Shaheed, submitted pursuant to resolution 10/23 of the Human Rights Council*, UN Doc. A/HRC/14/36 (22 March 2010), para. 10.

<sup>39</sup> *Ibid.*, para. 9. [emphasis added]

<sup>40</sup> UNDRIP, especially arts. 38 (legislative and other measures), 40 (effective remedies) and 42 (full application and follow-up). See also Committee on Economic, Social and Cultural Rights, General Comment No. 17, *The right of everyone to benefit from the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he is the author (article 15, paragraph 1 (c), of the Covenant)*, UN Doc. E/C.12/GC/17 (12 January 2006), para. 28: "The right of everyone to benefit from the protection of the moral and material benefits resulting from any scientific, literary or artistic production of which he or she is the author, like all human rights, imposes three types or levels of obligations on States parties: the obligations to respect, protect and fulfil."

---

African Commission on Human and Peoples' Rights, *The Social and Economic Rights Action Centre and the Centre for Economic and Social Rights v Nigeria*, Comm. No. 155/96, 15<sup>th</sup> Activity Report 2001-02, 31 at para. 44:

Internationally accepted ideas of the various obligations engendered by human rights indicate that all rights-both civil and political rights and social and economic-generate at least four levels of duties for a State that undertakes to adhere to a rights regime, namely the *duty to respect, protect, promote, and fulfil these rights*. These obligations universally apply to all rights ... [emphasis added]

<sup>41</sup> In regard to Indigenous cultural rights and related obligations, see UNDRIP, preambular paras. 2-4, 7, 9, 11 and arts. 3, 4, 8, 9, 11-16, 25, 31-34, 36, 37, 38, 40 and 41. See also General Assembly, *Second International Decade of the World's Indigenous People: Note by the Secretary-General*, Report of the Special Rapporteur on the situation of human rights and fundamental freedoms of indigenous people, James Anaya, in accordance with paragraph 1 of General Assembly resolution 63/161, UN Doc. A/64/338 (4 September 2009), para. 45: "...the Declaration affirms rights of a collective character in relation to ... cultural integrity".

Human Rights Council, *Report of the Special Rapporteur on the situation of human rights and fundamental freedoms of indigenous people*, S. James Anaya, UN Doc. A/HRC/9/9 (11 August 2008), para. 22: "The [Human Rights] Committee's general comment No. 23 (1994) on article 27 of ICCPR advances a broad interpretation of the international norm of cultural integrity in the context of indigenous peoples, understanding that norm to encompass all aspects of indigenous culture including rights to lands and resources."

<sup>42</sup> In regard to the Aboriginal and Treaty rights of the Western Shoshone, see, e.g., *Mary and Carrie Dann v. United States*, I/A Comm. H.R., Case N° 11.140, Report No. 75/02 (27 December 2002), at para. 124: "in determining the claims currently before it, the Commission considers that this broader corpus of international law includes the developing norms and principles governing the human rights of indigenous peoples. As the following analysis indicates, these norms and principles encompass distinct human rights considerations relating to the ownership, use and occupation by indigenous communities of their traditional lands. See also UNDRIP, preambular paras. 7 and 14; and art. 37.

Paul Joffe & Willie Littlechild, "Administration of Justice and How to Improve it: Applicability and Use of International Human Rights Norms" in Commission on First Nations and Métis Peoples and Justice Reform, *Submissions to the Commission*, Final Report, vol. 2 (Saskatchewan: 2004), Section 12 at p. 12-14: "Indigenous peoples' ... treaties often entail a wide range of human rights considerations. Whether in general or specific terms, Indigenous peoples' treaties constitute an elaboration of arrangements relating to the political, economic, social, cultural or spiritual rights and jurisdictions of the Indigenous peoples concerned."

<sup>43</sup> UNDRIP, preambular para. 14: "...the rights affirmed in treaties, agreements and other constructive arrangements between States and indigenous peoples are, in some situations, matters of international concern, interest, responsibility and character".

The human rights content of Indigenous peoples' Treaties reinforces them as an international concern and responsibility. See, e.g., *Vienna Declaration and Programme of Action*, World Conference on Human Rights, adopted 25 June 1993, reprinted in (1993) 32 I.L.M. 1661, Part I, para. 4: "the promotion and protection of all human rights is a legitimate concern of the international community".

<sup>44</sup> *Convention on Biological Diversity*, art. 22(1); *Nagoya Protocol*, art. 4(1).

<sup>45</sup> Louis Henkin, "Introduction" in L. Henkin, ed., *The International Bill of Rights: The Covenant on Civil and Political Rights* (New York: Columbia University Press, 1981) 1 at 13: "International human rights are inherent". UNDRIP, preambular para. 7: "*Recognizing* the urgent need to respect and promote the inherent rights of indigenous peoples which derive from their political, economic and social structures and from their cultures, spiritual traditions, histories and philosophies, especially their rights to their lands, territories and resources".

Human Rights Committee, *Concluding observations of the Human Rights Committee: Canada*, UN Doc. CCPR/C/CAN/CO/5 (27-28 October 2005), para. 8: "The State party should re-examine its policy and practices to ensure they do not result in extinguishment of inherent aboriginal rights."

---

<sup>46</sup> United States, *Initial reports of States parties due in 1993: United States of America*, UN Doc. CCPR/C/81/Add.4 (24 August 1994) (State Party Report), para. 62: “Aboriginal Indian interest in land derives from the fact that the various tribes occupied and exercised sovereignty over lands at the time of occupation by white people. This interest does not depend upon formal recognition of the aboriginal title”. In Canada, see *Calder v. A.G. British Columbia*, [1973] S.C.R. 313 (Supreme Court of Canada) at 390, per Hall J.: “The aboriginal Indian title does not depend on treaty, executive order or legislative enactment.”

See also Permanent Forum on Indigenous Issues (Secretariat), “Presentation by Mattias Åhrén”, International Expert Group Meeting, Indigenous Peoples and Forests, UN Doc. PFII/2011/EGM, New York, 12 - 14 January 2011 paras. 4.2 and 4.3, where it is described that, in the Norwegian cases of *Selbu*, Rt. 2001 side 769 and *Svartskogen*, Rt. 2001 side 1229, the Supreme Court has most recently confirmed that Saami property rights to land follows from traditional use and are not contingent upon formal recognition in national legislation. Similarly, the Swedish Supreme Court has determined in *Taxed Lapp Mountain Case*, NJA 1981 s 1, that the right to pursue reindeer husbandry follows from use since time immemorial and is not contingent on formal recognition in law.

<sup>47</sup> See also *Media Rights Agenda and Constitutional Rights Project v. Nigeria*, African Commission on Human and Peoples’ Rights, Communications 105/93, 128/94, 130/94, 152/96, Twelfth Activity Report, 1998-1999, Annex V, 52 at 58, para. 66: “To allow national law to have precedent over the international law of the [African] Charter would defeat the purpose of the rights and freedoms enshrined in the Charter. International human rights standards must always prevail over contradictory national law.”

<sup>48</sup> Commission on Human Rights, *Report of the second expert seminar “Democracy and the rule of law” (Geneva, 28 February-2 March 2005): Note by the secretariat*, UN Doc. E/CN.4/2005/58 (18 March 2005), para. 32 (Conclusions and Recommendations).

<sup>49</sup> UN Commission on Human Rights, *Report of the second expert seminar “Democracy and the rule of law” (Geneva, 28 February-2 March 2005): Note by the secretariat*, UN Doc. E/CN.4/2005/58 (18 March 2005), para. 8 [attributed to Professor Dinah Shelton, emphasis added]

<sup>50</sup> General Assembly, *2005 World Summit Outcome*, UN Doc. A/RES/60/1, 16 September 2005, adopted without vote, para. 119.

<sup>51</sup> In contrast, see, e.g., *Indigenous and Tribal Peoples Convention, 1989*, art. 2(2): “1. Governments shall have the responsibility for developing, with the participation of the peoples concerned, co-ordinated and systematic action to protect the rights of these peoples and to guarantee respect for their integrity.”

<sup>52</sup> General Assembly, *Midterm assessment of the progress made in the achievement of the goal and objectives of the Second International Decade of the World’s Indigenous People: Report of the Secretary-General*, UN Doc. A/55/166 (23 July 2010), para. 20: “The Asian and Pacific region is home to about 70 per cent of the world’s indigenous people, yet only a handful of States in that region have officially recognized the existence of indigenous peoples in their countries”. See also Comité pour l’élimination de la discrimination raciale, *Observations finales du Comité pour l’élimination de la discrimination raciale: Rwanda*, UN Doc. CERD/C/RWA/CO/13-17 (11 March 2011) (advanced unedited version), para. 11, where the Committee recommends Rwanda to revise its position and recognize the Batwa as an Indigenous people; and Comité des droits de l’homme, *Observations finales du Comité des droits de l’homme: Togo*, UN Doc. CCPR/C/TGO/CO/4 (28 March 2011) (advance unedited version), para. 21.

“Human chain formed across the country demanding constitutional recognition as indigenous peoples”, Bangladesh, 19 March 2011, [http://indigenouspeoplesissues.com/index.php?option=com\\_content&view=article&id=9490:bangladesh-human-chain-formed-across-the-country-demanding-constitutional-recognition-as-indigenous-peoples&catid=63:central-asia-indigenous-peoples&Itemid=85](http://indigenouspeoplesissues.com/index.php?option=com_content&view=article&id=9490:bangladesh-human-chain-formed-across-the-country-demanding-constitutional-recognition-as-indigenous-peoples&catid=63:central-asia-indigenous-peoples&Itemid=85): “The leaders of the country’s indigenous communities called upon the government to seriously consider the issue of constitutional recognition as indigenous instead of small ethnic group; otherwise, the process of amendment of constitution will remain incomplete.”

---

United Nations (Department of Economic and Social Affairs), “Presentation by Grand Chief Edward John”, International Expert Group Meeting on Indigenous Peoples and Forests, PFII/2011/EGM, New York, 12 - 14 January 2011, at 5, para. 10:

In the courts [of Canada], government lawyers routinely deny the very existence of Indigenous Peoples and their rights, stating in their pleadings and legal arguments that, unless proven by Indigenous Peoples in the courts, neither Indigenous Peoples nor their rights exist. This means Indigenous Peoples must bring their elders, histories, cultures, ways of life and stories into a legal system foreign to them ...

<sup>53</sup> UN Department of Economic and Social Affairs (DESA), “Indigenous peoples participation vital to forest preservation”, 17 January 2011, New York, <http://www.un.org/en/development/desa/news/social/indigenous-peoples-participation-vital-for-forest-preservation.html>.

See also Committee on Economic, Social and Cultural Rights, *Concluding observations of the Committee on Economic, Social and Cultural Rights: Russian Federation*, UN Doc. E/C.12/RUS/CO/5 (20 May 2011) (advance unedited version), para. 7:

The Committee is ... concerned that changes to federal legislation regulating the use of land, forests and water bodies ... deprive indigenous peoples of the right to their ancestral lands, fauna and biological as well as aquatic resources, on which they rely for their traditional economic activities, through granting of licenses to private companies for development of projects such as the extraction of subsoil resources ...

<sup>54</sup> George Mukundi Wachira, “Applying Indigenous Peoples’ Customary Law in Order to Protect their Land Rights in Africa”, *Indigenous Affairs*, IWGIA, 1-2/2010, 6 at 7: “... States’ constitutions – which are the supreme laws – often subjugate African customary law to written laws.” And at 9: “... Namibia’s Constitution ... still subjugates African customary law to all other written laws.”

Wilmien Wicomb, “The Emancipatory Potential of Customary Law for the Rights of Women to Access Land”, *Indigenous Affairs*, IWGIA, 1-2/2010, 22 at 23: “In countries such as Ethiopia, where *customary law was entirely repealed*, rural communities are forced to regulate their lives outside the only legal system that can provide recognised and regulated protection through formal courts.” [emphasis added]

<sup>55</sup> Raja Devasish Roy, *Traditional Customary Laws and Indigenous Peoples of Asia*, Minority Rights Group International, March 2005, at 5:

Indigenous peoples’ customary laws and institutions continue to suffer from de-recognition and policy neglect due to discriminatory or assimilationist state policies. Like indigenous peoples in other parts of the world, indigenous peoples in Asia have been subject to social, political and economic marginalization, especially through conquest and colonization. In only a few cases have Asian indigenous peoples been able to retain a substantive level of political and legal autonomy.

<sup>56</sup> See, e.g., Jannie Lasimbang, “Indigenous Peoples and Customary Law in Sabah, Malaysia”, *Indigenous Affairs*, IWGIA, 1-2/2010, 38 at 39: “... indigenous peoples’ pursuit of the promotion of their distinct ways of life and social traditions is not well supported by either federal or state governments.”

Raja Devasish Roy, *Traditional Customary Laws and Indigenous Peoples of Asia*, *supra* note 55, at 19:

... customary land-related practices are stronger in autonomous systems (Malaysian Borneo, Mizoram) or in systems with strong constitutional and legal safeguards (Cordilleras). Conversely, the erosion of autonomy, and the formalized de-recognition of land rights, such as in Jharkhand state in India, north-west Bangladesh or northern Thailand, is largely responsible for the erosion of customary land rights ...

<sup>57</sup> For example, in regard to water security, the Canadian government is currently exploiting the urgent need of First Nations for safe drinking water in their communities so as to undermine their human rights. National legislation has been proposed that would enable the government to adopt regulations to “abrogate or derogate” from constitutionally-protected Aboriginal and Treaty rights. See *Safe Drinking Water for First Nations Act*, 3rd Sess., 40th Parl. 2010 (Bill S-11). (second reading 14 December 2010), s. 4(1)(r):

4. (1) The regulations may:

...

(r) provide for the relationship between the regulations and aboriginal and treaty rights referred to in section 35 of the *Constitution Act, 1982*, including the extent to which the regulations may abrogate or derogate from those aboriginal and treaty rights ...

The Canadian government has not used national legislation or other domestic measures to effectively deal with climate change, although it is a major threat to biodiversity. See, e.g. Louis-Gilles Francoeur and H  l  ne Buzzetti, “Un plafond de GES serait «dangereux», selon Baird”, *Le Devoir* (6 April 2011) A1 (According to the government, a ceiling on greenhouse gases would be “dangerous” and “un-Canadian”). See also Peggy Curran, “Our earth's a hot potato”, *The [Montreal] Gazette* (16 April 2011) B1:

‘Canada has played an embarrassing role in international climate discussions in the last five years,’ says [Damon] Matthews, a professor at Concordia University and one of the authors of a major report on climate targets and projections published by the U.S. National Academy of Sciences. ... ‘The Harper government has not wanted to take a stand on climate change and ... has acted as an obstructing force.’

<sup>58</sup> Forest Peoples Programme, “People, Poverty, Livelihoods, Ecosystems and Biodiversity: a rights based approach”, 31 October 2003, <http://www.swedbio.com/dokument/FPPreport%20to%20swedbio.pdf>, at 5.

Chandra K. Roy, “Indigenous Peoples in Asia: Rights and Development Challenges”, Claire Charters and Rodolfo Stavenhagen, eds., *Making the Declaration Work: The United Nations Declaration on the Rights of Indigenous Peoples* (Copenhagen: IWGIA, 2009), 216 at 226: “Indigenous lands have long been threatened by colonialism, settlement, encroachment and exploitation ... and land dispossession continues to this day”.

<sup>59</sup> See, for example, *Indigenous and Tribal Peoples Convention, 1989*, article 2:

1. Governments shall have the responsibility for developing, with the participation of the peoples concerned, co-ordinated and systematic action to protect the rights of these peoples and to guarantee respect for their integrity.

2. Such action shall include measures for:

...

(b) promoting the *full realisation of the social, economic and cultural rights of these peoples with respect for their social and cultural identity, their customs and traditions and their institutions...* [emphasis added]

And at article 33, it is added that government programmes in regard to the matters in the *Convention* shall include “the proposing of legislative and other measures to the competent authorities and supervision of the application of the measures taken, *in co-operation with the peoples concerned.*” [emphasis added]

<sup>60</sup> Rodolfo Stavenhagen, *The Ethnic Question: Conflicts, Development, and Human Rights* (Tokyo: United Nations Univ. Press, 1990) at 118: “The *subordination* of indigenous peoples to the nation-state, their *discrimination* and *marginalization*, has historically, in most cases, been the *result of colonization and colonialism.*” [emphasis added]

<sup>61</sup> General Assembly, *Programme of action for the full implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples*, Resolution 2621 (XXV), October 12, 1970, para. 1.

<sup>62</sup> Johanna von Braun and Kabir Bavikatte (Natural Justice), “No narrowing of the definition of TK”, <http://www.naturaljustice.org/images/naturaljustice/eco%20-%20abs3%202009%20-%20tk%20definition.pdf>: “Art. 8j protects all TK of indigenous people and local communities within the mandate of the CBD. This includes TK associated with GR but much more, such as TK associated with biological resources relevant in the context of cosmetics or oils.” [emphasis added]

Convention on Biological Diversity (Ad Hoc Working Group on Access and Benefit-sharing), *Report of the Meeting of the Group of Technical and Legal Experts on Traditional Knowledge associated with Genetic Resources in the Context of the International Regime on Access and Benefit-Sharing*, UN Doc. UNEP/CBD/WG-ABS/8/2 (15 July 2009), Annex (Outcome of the Meeting of the Group of Technical and Legal Experts on Traditional Knowledge associated with Genetic Resources in the Context of the International Regime on Access and Benefit-Sharing), at para. 18:

Article 8(j) as a stand alone provision protects all traditional knowledge of indigenous and local communities, within the mandate of the Convention on Biological Diversity, including traditional knowledge associated with genetic resources. Furthermore associated traditional knowledge does not necessarily have to be associated with genetic resources, as it can also include the use of traditional knowledge associated with biological resources.

<sup>63</sup> Emphasis added. The phrase “subject to national legislation” is also used in relation to “access to genetic resources” in article 15(1): “Recognizing the sovereign rights of States over their natural resources, the authority to determine access to genetic resources rests with the national governments and is subject to national legislation.” Article 15(2) requires States to adopt national legislation in a positive direction: “Each Contracting Party shall endeavour ... not to impose restrictions that run counter to the objectives of this Convention.”

<sup>64</sup> Convention on Biological Diversity, *Traditional knowledge and Biological Diversity: Note by the Executive Secretary*, UN Doc. UNEP/CBD/TKBD/1/2 (18 October 1997), para. 76. This background document was prepared by the Executive Secretary of the Convention on Biological Diversity, at the request of COP, in Decision III/14, para. 10.

<sup>65</sup> “Strategic Plan for Biodiversity 2011-2020 and the Aichi Biodiversity Targets”, in Conference of the Parties to the Convention on Biological Diversity, *The Strategic Plan for Biodiversity 2011-2020 and the Aichi Biodiversity Targets*, Decision X/2, UN Doc. UNEP/CBD/COP/DEC/X/2 (29 October 2010), Annex, para. 3.

See also *Nagoya Protocol*, preamble:

Recognizing the importance of genetic resources to food security, public health, biodiversity conservation, and the mitigation of and adaptation to climate change,

...

Recognizing the interdependence of all countries with regard to genetic resources for food and agriculture as well as their special nature and importance for achieving food security worldwide and for sustainable development of agriculture in the context of poverty alleviation and climate change ...

<sup>66</sup> IFAD (International Fund for Agricultural Development), *Engagement with Indigenous Peoples: Policy* (Rome: IFAD, November 2009), at 12: “Indigenous peoples’ knowledge, especially that of indigenous women, may hold the key to increased food security, adaptation capability, protection of natural resources, disaster prevention and other challenges related to climate change.”

<sup>67</sup> In regard to the importance of ensuring fairness and legal certainty for Indigenous peoples’ land and resource rights, see, e.g., Human Rights Council, *Report of the Special Rapporteur on the situation of human rights and fundamental freedoms of indigenous people, James Anaya: Addendum: Situation of indigenous peoples in the Russian Federation*, UN Doc. A/HRC/15/37/Add.5 (23 June 2010), para. 83:

It is essential that the State urgently bring coherence, consistency and certainty to the various laws that concern the rights of indigenous peoples and particularly their access to land and resources. In accordance with international standards, guarantees for indigenous land and resource rights should be legally certain; implemented fully and fairly for all indigenous communities ...

<sup>68</sup> At the international and national levels, Indigenous peoples' rights are most often determined on the basis of traditional occupation or other use of their traditional lands, territories and resources. See also Human Rights Council, *Report of the Special Rapporteur on the situation of human rights and fundamental freedoms of indigenous people, James Anaya: Addendum: Situation of indigenous peoples in Australia*, UN Doc. A/HRC/15/37/Add.4 (1 June 2010), para. 29:

The strengthening of legislative and administrative protections for indigenous peoples' rights over lands and natural resources should involve aligning those protections with applicable international standards, in particular those articulated in the Declaration on the Rights of Indigenous Peoples. Of note is ... the Declaration ... affirming simply that rights exist by virtue of "traditional ownership or other traditional occupation or use" (art. 26).

<sup>69</sup> Emphasis added. For the purposes of the *Convention on Biological Diversity*, "biological resources" includes, *inter alia*, genetic resources (art. 2).

Indigenous peoples' cultural well-being is an integral part of sustainable development: see, e.g., *Declaration on the Establishment of the Arctic Council*, Ottawa, 19 September 1996, (1996) 35 I.L.M. 1387, preamble: "Affirming our commitment to sustainable development in the Arctic region, including economic and social development, improved health conditions and cultural well-being".

<sup>70</sup> *Convention on Biological Diversity, Traditional knowledge and Biological Diversity: Note by the Executive Secretary*, *supra* note 64, para. 99. At para. 101, it is added: "Customary use of biological resources must take into account the spiritual and ceremonial dimensions of such use in addition to the more strictly economic and subsistence functions."

<sup>71</sup> *Ibid.*, para. 101. [emphasis added]

<sup>72</sup> See also *Convention on Biological Diversity (Ad-Hoc Working Group on Access and Benefit-sharing), Report of the Meeting of the Group of Technical and Legal Experts on Traditional Knowledge*, *supra* note 62, para. 10: "In discussing the relationship between traditional knowledge and genetic resources, the history of co-evolution (of biological and cultural systems) reinforces the inseparability of traditional knowledge and genetic resources."

<sup>73</sup> See, e.g., UNDRIP, arts. 31, 38 and 42; and *Indigenous and Tribal Peoples Convention, 1989*, arts. 2(2)(b) and 5.

<sup>74</sup> "Strategic Plan for Biodiversity 2011-2020 and the Aichi Biodiversity Targets", *supra* note 65 at Annex, para. 13 (Target 18). [underline added]

<sup>75</sup> *Convention*, art. 3. In addition, art. 4(1) of the *Nagoya Protocol* indicates that there is no intention in para. 4(1) to create a "hierarchy" between this *Protocol* and other existing international instruments.

<sup>76</sup> Conference of the Parties to the Convention on Biological Diversity, *Report of the Tenth Meeting of the Conference of the Parties to the Convention on Biological Diversity*, *supra* note 6 at 26. [emphasis added] See also "Statement by Ahmed Djoghlaif, Executive Secretary of the Convention on Biological Diversity on the occasion of World Day for Cultural Diversity for Dialogue and Development", 21 May 2011, <http://www.cbd.int/doc/speech/2011/sp-2011-05-21-cdd-en.pdf>:

... for the world's indigenous peoples, "Mother Earth" is a sacred place.

... Most indigenous and local communities are situated in areas where the vast majority of the world's plant genetic resources are found. Many such communities have cultivated and used biodiversity in a sustainable way for thousands of years. Knowledge about the use of specific plants and their healing and therapeutic attributes for treating diseases has mostly been passed down orally from generation to generation.

<sup>77</sup> In Canada, see for example *Rio Tinto Alcan Inc. v. Carrier Sekani Tribal Council*, 2010 SCC 43, where the Supreme Court of Canada made the distinction between "established" rights and "unproven" rights. The Court indicated at para.

41that, in the face of proposed government action, both types of “existing” rights require prior consultation to protect such rights from harm:

The claim or right must be one which actually exists and stands to be affected by the proposed government action. This flows from the fact that the purpose of consultation is to *protect unproven or established rights from irreversible harm* as the settlement negotiations proceed ... [emphasis added]

<sup>78</sup> *Haida Nation v. British Columbia (Minister of Forests)*, [2004] 3 S.C.R. 511, para. 37: “The law is capable of differentiating between tenuous claims, claims possessing a strong prima facie case, and established claims.”

<sup>79</sup> Permanent Forum on Indigenous Issues, *Information provided by the Secretariat of the Convention on Biological Diversity to the Tenth Session of the United Nations Permanent Forum on Indigenous Issues*, 2011, at 3. [emphasis added]

<sup>80</sup> *Ibid.*, at 19. [emphasis added]

<sup>81</sup> Human Rights Committee, *General Comment No. 18, Non-discrimination*, 37<sup>th</sup> sess., (1989), para. 1: “Non-discrimination, together with equality before the law and equal protection of the law without any discrimination, constitute a basic and general principle relating to the protection of human rights.”

Committee on the Elimination of Racial Discrimination, General Recommendation 32, *The meaning and scope of special measures in the International Convention on the Elimination of Racial Discrimination* (adopted at the Committee’s 75<sup>th</sup> session, August 2009), para. 7: “Discrimination under the Convention includes purposive or *intentional discrimination* and *discrimination in effect*. Discrimination is constituted ... by an unjustifiable ‘distinction, exclusion or restriction’ ...” [emphasis added]

See also *Withler v. Canada (Attorney General)*, 2011 SCC 12 (Supreme Court of Canada, preliminary version), para. 2, where the Court describes violations of substantive equality as follows: “To determine whether the law violates this norm [of substantive equality], the matter must be considered in the full context of the case, including the law’s real impact on the claimants and members of the group to which they belong.”

<sup>82</sup> See, e.g., *Case of the Saramaka People v. Suriname, (Preliminary Objections, Merits, Reparations, and Costs)*, I/A Court H.R. Series C No. 172 (Judgment) 28 November 2007, para. 93, where the Inter-American Court interpreted the Indigenous peoples’ right to property under Article 21 of the *American Convention on Human Rights* in a manner consistent with international human rights law:

... by virtue of the right of indigenous peoples to self-determination recognized under said Article 1 [of the two international Covenants], they may “freely pursue their economic, social and cultural development”, and may “freely dispose of their natural wealth and resources” so as not to be “deprived of [their] own means of subsistence”. Pursuant to Article 29(b) of the American Convention, this Court may not interpret the provisions of Article 21 of the American Convention in a manner that restricts its enjoyment and exercise to a lesser degree than what is recognized in said covenants.

<sup>83</sup> Committee on the Elimination of Racial Discrimination, *Concluding observations of the Committee on the Elimination of Racial Discrimination: Guyana*, UN Doc. CERD/C/GUY/CO/14 (4 April 2006), para. 15. [emphasis added]

<sup>84</sup> Jannie Lasimbang, “Indigenous Peoples and Customary Law in Sabah, Malaysia”, *Indigenous Affairs*, IWGIA, 1-2/2010, 38 at 39:

For the indigenous peoples of Sabah, the indigenous legal system revolves around the *adat*, which encompasses customary laws, concepts, principles and practices, and the customary institution that implements and regulates the *adat*. In short, it can be called an holistic indigenous system of governance.

---

See also Convention on Biological Diversity (Ad Hoc Working Group on Access and Benefit-sharing), *Report of the Meeting of the Group of Technical and Legal Experts*, *supra* note 62, Annex, para. 37:

Indigenous and local communities ... perceive traditional knowledge and genetic resources/biological resources in a holistic manner. Traditional knowledge is hence generally considered as cohesive and integral to genetic resources.”

<sup>85</sup> Sub-Commission on Prevention of Discrimination and Protection of Minorities, *Study on the protection of the cultural and intellectual property of indigenous peoples*, by Erica-Irene Daes, *Special Rapporteur of the Sub-Commission on Prevention of Discrimination and Protection of Minorities and Chairperson of the Working Group on Indigenous Populations*, UN Doc. E/CN.4/Sub.2/1993/28 (28 July 1993), para. 164.

<sup>86</sup> Ian Brownlie, *Principles of Public International Law*, 5<sup>th</sup> ed. (Oxford: Clarendon Press, 1998) at 515: “[Peremptory norms or *jus cogens*] are rules of customary law which cannot be set aside by treaty or acquiescence but only by the formation of a subsequent customary rule of contrary effect.” The least controversial examples of [peremptory norms] are the prohibition of the use of force, the law of genocide, the principle of racial non-discrimination, crimes against humanity, and the rules prohibiting trade in slaves and piracy.”

<sup>87</sup> *Haida Nation*, *supra* note 78, para. 31: “The government’s arguments do not withstand scrutiny. Neither the authorities nor practical considerations support the view that a duty to consult and, if appropriate, accommodate arises only upon final determination of the scope and content of the right.”

<sup>88</sup> *Ibid.*, para. 27. [emphasis added]

<sup>89</sup> *Ibid.*, para. 33. [emphasis added]

<sup>90</sup> See, e.g., Quebec Native Women, “Canada Accepts Reference to UN Declaration – And Continues to Undermine It”, Press Release, 27 October 2010, Nagoya, Japan.

<sup>91</sup> See also text accompanying note 188 *infra*.

<sup>92</sup> UNDRIP, preambular para. 7; and *International Covenant on Economic, Social and Cultural Rights*, art. 1 (right of self-determination includes right to natural resources) and art. 25: “Nothing in the present Covenant shall be interpreted as impairing the *inherent right of all peoples to enjoy and utilize fully and freely their natural wealth and resources*.” [emphasis added] Similarly, see *International Covenant on Civil and Political Rights*, art. 1 (self-determination) and art. 47 (inherent right to natural resources).

See also Human Rights Committee, *Concluding observations of the Human Rights Committee: Canada*, UN Doc. CCPR/C/79/Add.105 (7 April 1999), para. 8: “... the Committee emphasizes that the right to self-determination requires, *inter alia*, that all peoples must be able to freely dispose of their natural wealth and resources and that they may not be deprived of their own means of subsistence (art. 1, para. 2).”

<sup>93</sup> UNDRIP, art. 31. See also Jingsong Li and Yiching Song, *Use it or Lose it: Protecting the Traditional Knowledge, Genetic Resources and Customary Laws of Marginal Farmers in Southwest China*, Centre for Chinese Agricultural Policy (CCAP, China) (September 2010), online: <http://pubs.iied.org/pdfs/G02787.pdf> at 2:

‘Collective Bio-Cultural Heritage’ means “knowledge, innovations and practices of indigenous peoples and local communities which are often held collectively and are inextricably linked to traditional resources and territories; including the diversity of genes, varieties, species and ecosystems; cultural and spiritual values; and customary laws shaped within the socio-ecological context of communities”.

<sup>94</sup> *2010 Declaration on Bio-cultural Diversity*, adopted at the International Conference on Cultural and Biological Diversity for Development, June 2010, Montreal, Canada, in Permanent Forum on Indigenous Issues, *Information*

<sup>115</sup> International Labour Organization, *Monitoring indigenous and tribal peoples’ rights through ILO Conventions: A compilation of ILO supervisory bodies’ comments 2009-2010* (Geneva: ILO, 2010), at 4: “The Convention and the UN Declaration on the Rights of Indigenous Peoples adopted in 2007 are mutually reinforcing instruments providing the framework for the universal protection of indigenous and tribal peoples’ rights.”

Manuela Tomei & Lee Swepston, “Indigenous and Tribal Peoples: A Guide to ILO Convention No. 169”, International Labour Office, Geneva, 1996, at 7: “... there is nothing in Convention No. 169 which would be incompatible with any international legal instrument which may establish or define the right of indigenous and tribal peoples to self-determination.”

<sup>116</sup> UN General Assembly, *Universal realization of the right of peoples to self-determination*, Res. 63/163 (18 December 2008) (adopted without vote), para. 1: “Reaffirms that the universal realization of the right of all peoples, including those under colonial, foreign and alien domination, to self-determination is a fundamental condition for the effective guarantee and observance of human rights and for the preservation and promotion of such rights”.

Human Rights Committee, *General Comment No. 12, Article 1*, 21<sup>st</sup> sess., A/39/40 (1984), para. 1: “The right of self-determination is of particular importance because its realization is an essential condition for the effective guarantee and observance of individual human rights and for the promotion and strengthening of those rights.”

<sup>117</sup> UNDRIP, arts. 3 (self-determination); 26(2) (use, develop and control natural resources); and 31 (cultural heritage, including genetic resources). Committee on Economic, Social and Cultural Rights, General Comment No. 21, *Right of everyone to take part in cultural life*, *supra* note 97, para. 37 affirms:

Indigenous peoples have the right to act collectively to ensure respect for their right to maintain, control, protect and develop their cultural heritage, traditional knowledge and traditional cultural expressions, as well as the manifestations of their sciences, technologies and cultures, including human and genetic resources, seeds, medicines, knowledge of the properties of fauna and flora, oral traditions ...

<sup>118</sup> At an earlier meeting in Cali, Colombia in March 2010, Indigenous peoples had originally proposed: “Noting the significance of the United Nations Declaration on the Rights of Indigenous Peoples in this Protocol”. At that time, the Canadian government confirmed to representatives of Indigenous organizations that it would not object to this wording.

<sup>119</sup> See, e.g., Quebec Native Women, “Canada Accepts Reference to UN Declaration – And Continues to Undermine It”, Press Release, 27 October 2010, Nagoya, Japan.

<sup>120</sup> See, generally, Avinash Gavai, “Canada 'part of the problem' when it comes to human rights: Amnesty”, *Embassy*, Daily Update, 1 April 2011. Canada has continued to undermine UNDRIP, even after its endorsement in November 2010.

Grand Council of the Crees (Eeyou Istchee) *et al.*, “Implementation of the *UN Declaration on the Rights of Indigenous Peoples*: Positive Initiatives and Serious Concerns”, Expert Mechanism on the Rights of Indigenous Peoples, 2<sup>nd</sup> sess., Geneva (joint global statement by Indigenous and human rights organizations delivered 12 August 2009), para. 36: “During its three-year term [on the Human Rights Council], Canada pursued the lowest standards of any Council member within the Western European group of States.”

<sup>121</sup> See, e.g., Ed John, Matthew Coon Come *et al.*, “UN Security Council – Did Canada Merit a Seat?”, *Windspeaker*, Vol. 28, Issue 9, December 2010 at 12: “The Canadian government continues to opt for an ideological course that betrays core Canadian principles and values. This is especially evident in relation to the human rights of those most disadvantaged – the 370 million Indigenous people in over 70 countries. ... Canada’s actions serve to undermine the international human rights system and the rule of law”.

Paul Joffe, “*UN Declaration on the Rights of Indigenous Peoples*: Canadian Government Positions Incompatible with Genuine Reconciliation”, (2010) 26 N.J.C.L. 121, online: <http://www.cfsc.quaker.ca/pages/un.html>:

[The Canadian government] has ... violated repeatedly the rule of law in Canada and internationally; misled Parliament and the Canadian public; and undermined the human rights of Indigenous peoples. Such conduct fails to uphold the honour of the Crown and is inconsistent with the constitutional objective of reconciliation with Indigenous peoples.

<sup>122</sup> Annex to General Assembly Decision 55/488 of 7 September 2001 provides: “The General Assembly ... reiterates that the terms ‘takes note of’ and ‘notes’ are neutral terms that constitute neither approval nor disapproval.”

<sup>123</sup> Conference of the Parties, “Outcome of the work of the Ad Hoc Working Group on long-term Cooperative Action under the Convention”, Draft decision -/CP.16, UN Climate Change Conference, Cancun, Mexico (Advance unedited version), preamble.

<sup>124</sup> The *Nagoya Protocol* affirms that COP serving as the meeting of the Parties has the power to: “Consider and adopt, as required, amendments to this Protocol”. According to the *Convention*, article 29, any proposed amendment to the *Protocol* by COP is subject to a formal procedure that includes notice of such proposal to the Parties by the Secretariat “at least six months before the meeting at which it is proposed for adoption” (para. 2); and “ratification, acceptance or approval” by the Parties (paras. 3 and 4).

See also Foundation for International Environmental Law and Development (FIELD), “Treaties, protocols, and decisions by the Conference of the Parties (COP) of the UNFCCC and the Conference of the Parties serving as the Meeting of the Parties (CMP) of the Kyoto Protocol”, Briefing Paper, October 2009: “As a general rule, COP ... decisions are not legally binding – they are political decisions. ... Exceptions exist in some treaties, where the decision making body (COP or equivalent body) has been granted the authority to take certain legally binding decisions”.

CAN International, “COP Decisions: Binding or Not?”, CAN Ad-Hoc Legal Working Group, 8 June 2009: “The binding nature of a COP decision eventually rests on the powers ascribed to the COP in the treaty text. There is some acceptance that the supreme treaty body has “substantive powers” of decision-making where these powers are delegated by the Parties and provided for in the treaty text.”

<sup>125</sup> Conference of the Parties to the Convention on Biological Diversity, “The Strategic Plan for Biodiversity 2011-2020 and the Aichi Biodiversity Targets”, *supra* note 65, para. 4 [underline added].

<sup>126</sup> *Convention*, article 22(1); and *Protocol*, article 4(1), quoted in the paragraph accompanying note 37 *supra*.

<sup>127</sup> Office of the High Commissioner for Human Rights, “Indigenous rights declaration universally endorsed”, 2010, online: <http://www.ohchr.org/EN/NewsEvents/Pages/Indigenousrightsdeclarationendorsed.aspx>. In October when COP 10 adopted Decision X/2, Canada and the United States had not yet reversed their opposing positions. However, Canada had already announced its intention to endorse UNDRIP and the U.S. was in the process of reviewing its position.

Permanent Forum on Indigenous Issues, *Information on recent activities of the Office of the High Commissioner for Human Rights related to the rights of indigenous peoples: Contribution to the tenth session of the UN Permanent Forum on Indigenous Issues*, 8 April 2011, at 1: “The UN Declaration on the Rights of Indigenous Peoples serves as OHCHR’s framework for action to further the advancement and protection of indigenous peoples’ rights. The main priority of the Office is to contribute to the promotion and implementation of this key instrument, along with relevant recommendations, comments and observations of UN human Rights treaty bodies, and Special Procedures.”

<sup>138</sup> Inter-American Commission on Human Rights, “Indigenous and Tribal Peoples’ Rights over their Ancestral Lands and Natural Resources: Norms and Jurisprudence of the Inter-American Human Rights System”, OEA/Ser.L/V/II. Doc.

56/09 (30 December 2009), para. 19. See *Case of the Saramaka People v. Suriname*. 2007, *supra* note 82, para. 131.

<sup>139</sup> For example, at the July 2010 negotiations on the draft Protocol in Montreal, the head of the delegation of one group of States indicated to the International Indigenous Forum on Biodiversity that it would have to reconsider its support on all Indigenous issues if the IIFB continued to raise such matters as “peoples”, human rights or the right of self-determination.

<sup>140</sup> In regard to the right of self-determination, see identical article 1 of the *International Covenant on Civil and Political Rights*, G.A. Res 2200 (XXI), 21 U.N. GAOR, Supp. (No. 16) at 52, U.N. Doc. A/6316, Can. T.S. 1976 No. 47 (1966) (entered into force March 23, 1976); and *International Covenant on Economic, Social and Cultural Rights*, G.A. Res.

2200 (XXI), 21 U.N. GAOR, Supp. (No. 16) at 49, U.N. Doc. A/6316 (1966); Can. T.S. 1976 No. 46 (entered into force 3 January 1976).

S. James Anaya, “The Right of Indigenous Peoples to Self-Determination in the Post-Declaration Era” in Claire Charters and Rodolfo Stavenhagen, eds., *Making the Declaration Work*, *supra* note 58, 184 at 185: “... indigenous peoples have the same right of self-determination enjoyed by other peoples. This follows from the principle of equality that runs throughout the text of the Declaration”.

<sup>141</sup> *International Convention on the Elimination of All Forms of Racial Discrimination*, 21 December 1965, 660 U.N.T.S. 195 at 216, 5 I.L.M. 352 (entered into force 4 January 1969).

<sup>142</sup> *Ibid.*, art. 1. [emphasis added] See also Human Rights Committee, General Comment No. 18, *Non-discrimination*, 37<sup>th</sup> sess., (1989), at para. 7:

... the term “discrimination” as used in the Covenant should be understood to imply any distinction, exclusion, restriction or preference which is based on any ground such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status, and which has the purpose or effect of nullifying or impairing the recognition, enjoyment or exercise by all persons, on an equal footing, of all rights and freedoms. [emphasis added]

<sup>143</sup> See *Charter of the United Nations*, arts. 1(2) and 55c. R. Wolfrum, “Chapter 1. Purposes and Principles” in B. Simma, ed., *The Charter of the United Nations: A Commentary* (New York: Oxford University Press, 1994) 49 at 53:

*The term “equality of peoples” [in Art. 1(2) of the U.N. Charter] was meant to underline that no hierarchy existed between the various peoples. To this extent, the prohibition of racial discrimination was transferred from the national level to the international level of international relations. Apart from that, the principle of equality of peoples and the right to self-determination are united. With this, it is assured that no peoples can be denied the right to self-determination on the basis of any alleged inferiority. [emphasis added]*

<sup>144</sup> UNDRIP, preambular paras. 1, 2, 4, 5, 16, 17 and arts. 1-3 and 46.

<sup>145</sup> Permanent Forum on Indigenous Issues, *Report on the ninth session (16 – 30 April 2010)*, Economic and Social Council, Official Records, Supplement No. 23, United Nations, New York, E/2010/43-E/C.19/2010/15, para. 112: “The Permanent Forum calls upon the parties to the Convention on Biological Diversity to adopt the terminology “indigenous peoples and local communities” as an accurate reflection of the distinct identities developed by those entities since the adoption of the Convention almost 20 years ago.”

<sup>146</sup> Adopted at the General Conference of UNESCO, 32<sup>nd</sup> sess., Paris, 17 October 2003, *entered into force* on 20 April 2006. The objectives include protecting and ensuring respect for intangible cultural heritage of Indigenous peoples. Such heritage includes “knowledge and practices concerning nature and the universe” (art. 2(2)(d)).

<sup>147</sup> Adopted at the General Conference of UNESCO, 33<sup>rd</sup> sess., Paris, 20 October 2005. The preamble recognizes the “importance of traditional knowledge as a source of intangible and material wealth, and in particular the knowledge systems of indigenous peoples, and its positive contribution to sustainable development, as well as the need for its adequate protection and promotion”.

A/RES/55/2, 8 September 2000, para. 24; and *Vienna Declaration and Programme of Action*, *supra* note 43, Part I, para. 10:

The World Conference on Human Rights reaffirms the right to development, as established in the Declaration on the Right to Development, as a universal and inalienable right and an integral part of fundamental human rights.

For various interrelated and mutually reinforcing dimensions of the Indigenous peoples' right to development that may be relevant in the context of the *Convention* and *Nagoya Protocol*, see UNDRIP, *inter alia*, preambular paragraphs 6, 9-12, 16 and 22 and Articles 3, 11-13, 18, 20, 23-29, 31, 32, 34, 36 and 37.

<sup>161</sup> *Declaration on the Right to Development*, article 1(2).

<sup>162</sup> UNDRIP, article 23. See also *Indigenous and Tribal Peoples Convention, 1989*, art. 7(1): "The peoples concerned shall have the right to decide their own priorities for the process of development as it affects their lives, beliefs, institutions and spiritual well-being and the lands they occupy or otherwise use, and to exercise control, to the extent possible, over their own economic, social and cultural development."

<sup>163</sup> UNDRIP, preambular para. 11: "*Recognizing* that respect for indigenous knowledge, cultures and traditional practices contributes to sustainable and equitable development and proper management of the environment"; *Indigenous and Tribal Peoples Convention, 1989*, art. 23(2) ("importance of sustainable and equitable development"); *Rio Declaration on Environment and Development*, UN Doc. A/Conf. 151/5/Rev. 1 (13 June 1992), Principle 3: "The right to development must be fulfilled so as to equitably meet developmental and environmental needs of present and future generations"; *Vienna Declaration and Programme of Action*, *supra* note 43, para. 11: "The right to development should be fulfilled so as to meet equitably the developmental and environmental needs of present and future generations"; and *Inter-American Democratic Charter*, signed by the 34 countries of the Americas, 28<sup>th</sup> special session of the OAS

General Assembly, Lima, Peru, 11 September 2001: "... economic growth and social development based on justice and equity, and democracy are interdependent and mutually reinforcing".

<sup>164</sup> Dalee Sambo Dorough, "The Indigenous Human Right to Development", *Indigenous Affairs*, IWGIA, 1-2/2010, 76 at 81: "...principles that should be included in the understanding of "equitable development" are: ... development must not be imposed on Indigenous peoples without their free, prior and informed consent and must fully accommodate Indigenous values and concerns".

Sub-Commission on the Promotion and Protection of Human Rights, *Indigenous peoples and their relationship to land: Final working paper prepared by the Special Rapporteur, Mrs. Erica-Irene A. Daes*, UN Doc. E/CN.4/Sub.2/2001/21 (11 June 2001), para. 144 (d): "All State and international actions and legal measures in regard to indigenous lands, territories and resources must assure that all indigenous peoples have lands, territories and resources sufficient to assure their well-being and equitable development as peoples ..."

<sup>165</sup> General Assembly, *Draft Programme of Action for the Second International Decade of the World's Indigenous People: Report of the Secretary-General*, UN Doc. A/60/270 (18 August 2005) (adopted without vote by General Assembly, 16 December 2005). At para. 9, one of the five objectives of the Decade is:

Promoting full and effective participation of indigenous peoples in decisions which directly or indirectly affect their lifestyles, traditional lands and territories, their cultural integrity as indigenous peoples with collective rights or any other aspect of their lives, considering the principle of free, prior and informed consent ...

<sup>166</sup> See, e.g., Committee on the Elimination of Racial Discrimination, *Concluding Observations on the Elimination of Racial Discrimination: Guatemala*, UN Doc. CERD/C/GTM/CO/12-13 (19 May 2010), para. 11: "In the light of its general recommendation No. 23 (para. 4 (d)), the Committee recommends that the State party consult the indigenous population groups concerned at each stage of the process and that it obtain their consent before executing projects involving the extraction of natural resources".

Comité des droits de l'homme, *Observations finales du Comité des droits de l'homme: Togo*, UN Doc. CCPR/C/TGO/CO/4 (28 March 2011) (advance unedited version), para. 21 (ensure Indigenous peoples can exercise their right to free, prior and informed consent); Human Rights Committee, *Poma v. Peru*, Case No. 1457/2006, *Report of the Human Rights Committee*, GAOR, 64<sup>th</sup> Sess., Supp. No. 40, Vol. I, UN Doc. A/64/40 (2008-09), para. 202: "Participation in the decision-making process must be effective, which requires not mere consultation but the free, prior and informed consent of the members of the community."

Committee on Economic, Social and Cultural Rights, General Comment No. 21, *Right of everyone to take part in cultural life (art. 15, para. 1 (a), supra note 97*, para. 5, indicating that: a "core obligation applicable with immediate effect" includes the following: "States parties should obtain their free and informed prior consent when the preservation of their cultural resources, especially those associated with their way of life and cultural expression, are at risk."

<sup>167</sup> See, e.g., African Commission on Human and Peoples' Rights, *Centre for Minority Rights Development (Kenya)*, *supra* note 137, para. 226: "In terms of consultation, the threshold is especially stringent in favour of indigenous peoples, as it also *requires that consent be accorded*. Failure to observe the obligations to consult and to seek consent – or to compensate – ultimately results in a violation of the right to property." [emphasis added]

*Case of the Saramaka People v. Suriname*. 2007, *supra* note 82, para. 134: "... the Court considers that, regarding large-scale development or investment projects that would have a major impact within Saramaka territory, the State has a duty, not only to consult with the Saramakas, but also to obtain their free, prior, and informed consent, according to their customs and traditions."

<sup>168</sup> General Assembly, *Situation of human rights and fundamental freedoms of indigenous people: Note by the Secretary-General*, Interim report of the Special Rapporteur on the situation of human rights and fundamental freedoms of indigenous people, UN Doc. A/65/264 (9 August 2010), para. 27:

... article 32 of the Declaration, with its call for the free and informed consent of indigenous peoples prior to the approval of any project affecting their lands or territories and other resources, particularly in connection with the development, utilization or exploitation of mineral, water or other resources, provides an important template for avoiding these problems in the development context.

Human Rights Council, *Report of the Special Rapporteur on the right to food, Olivier De Schutter - Crisis into opportunity: reinforcing multilateralism*, UN Doc. A/HRC/12/31 (21 July 2009), para. 21:

These [core] principles are based on the right to food ... They also call for the respect of the right to self-determination of peoples and on the right to development. They may be summarized as follows:

...

(j): States shall consult and cooperate in good faith with the indigenous peoples concerned in order to obtain their free and informed consent prior to the approval of any project affecting their lands or territories and other resources, particularly in connection with the development, utilization or exploitation of mineral, water or other resources ...

<sup>169</sup> See, e.g., Food and Agriculture Organization, “FAO Policy on Indigenous and Tribal Peoples”, *supra* note 134, at 5: “The principle and right of ‘free, prior and informed consent’ demands that states and organizations of all kinds and at all levels obtain indigenous peoples’ authorization before adopting and implementing projects, programmes or legislative and administrative measures that may affect them.”

IFAD (International Fund for Agricultural Development), *Engagement with Indigenous Peoples: Policy*, *supra* note 66, at 13 (Principles of engagement): “When appraising such projects proposed by Member States, in particular those that may affect the land and resources of indigenous peoples, the Fund shall examine whether the borrower or grant recipient consulted with the indigenous peoples to obtain their free, prior and informed consent.”

Permanent Forum on Indigenous Issues, *Information received from the United Nations system and other intergovernmental organizations: United Nations Children’s Fund*, UN Doc. E/C.19/2011/7 (25 February 2011), para. 52: “While the free, prior and informed consent approach is considered by UNICEF to be inherent in its human rights-based approach to programming, it is also used as a specific methodology to conduct projects and studies.”

International Finance Corporation (member of the World Bank Group), “IFC Updates Environmental and Social Standards, Strengthening Commitment to Sustainability and Transparency”, 12 May 2011, <http://www.ifc.org/ifcext/media.nsf/content/SelectedPressRelease?OpenDocument&UNID=0ADE5C1923DC4CF48525788E0071FAAA>: “For projects with potential significant adverse impacts on indigenous peoples, IFC has adopted the principle of ‘Free, Prior, and Informed Consent’ informed by the 2007 United Nations Declaration on the Rights of Indigenous Peoples.”

<sup>170</sup> Extractive Industries Review, *Striking a Better Balance: The Final Report of the Extractive Industries Review*, Vol. I (*The World Bank Group and Extractive Industries*), December 2003, at 21: “The EIR concludes that indigenous peoples and other affected parties do have the right to participate in decision-making and to give their free prior and informed consent throughout each phase of a project cycle.”

United Nations Development Group, “United Nations Development Group Guidelines on Indigenous Peoples’ Issues”, *supra* note 25, at 28: “Consultation and participation are crucial components of a consent process. Consultation should be undertaken in good faith.”

<sup>171</sup> Emphasis added. See articles 6(2), 3(f) (access to genetic resources); 7 (access to traditional knowledge associated with genetic resources); 13(1)(b) (National focal points and competent national authorities); and 16(1) (Compliance with domestic legislation or regulatory requirements on access and benefit-sharing for traditional knowledge associated with genetic resources).

<sup>172</sup> Where each Party requires the “prior informed consent” of Indigenous and local communities for access to genetic resources, the Party shall take the necessary measures to “set out criteria and/or processes for obtaining prior informed consent or approval” Thus, “PIC” and “approval” are synonymous. In this regard, art. 6(3)(f) of the *Protocol* provides:

3. ... each Party requiring prior informed consent shall take the necessary legislative, administrative or policy measures, as appropriate, to:

...

(f) Where applicable, and subject to national legislation, set out criteria and/or processes for obtaining prior informed consent or approval and involvement of indigenous and local communities for access to genetic resources ... [emphasis added]

<sup>173</sup> See also *Black’s Law Dictionary*, 9th ed. (St. Paul, Minn.: Thomson Reuters, 2009) at 346:

Consent, *n.* ... Agreement, approval, or permission as to some act or purpose, esp. voluntarily by a competent person; legally effective assent.

...

*informed consent*, ... A person’s agreement to allow something to happen, made with full knowledge of the risks involved and the alternatives. [emphasis in original]

<sup>174</sup> “Tkarihwaié:ri Code of Ethical Conduct to Ensure Respect for the Cultural and Intellectual Heritage of Indigenous and Local Communities Relevant to the Conservation and Sustainable Use of Biological Diversity” in Conference of the Parties to the Convention on Biological Diversity, *The Tkarihwaié:ri Code of Ethical Conduct to Ensure Respect for the Cultural and Intellectual Heritage of Indigenous and Local Communities*, Decision X/42, UN Doc. UNEP/CBD/COP/DEC/X/42 (29 October 2010), Annex, para. 11:

Any activities/interactions related to traditional knowledge associated with the conservation and sustainable use of biological diversity, occurring on or likely to impact on sacred sites and on lands and waters traditionally occupied or used by indigenous and local communities and impacting upon specific groups, should be carried out with the prior informed consent and/or approval and involvement of indigenous and local communities. [underline added]

To suggest in para. 11 that both “prior and informed consent” and “approval” may be required in some situations does not make any sense. The Code is inconsistent and simply uses “approval” in para. 18. The term “and/or” is also inserted in Conference of the Parties to the Convention on Biological Diversity, *Global Taxonomy Initiative*, Decision X/39, UN Doc. UNEP/CBD/COP/DEC/X/39 (29 October 2010), para. 15:

... *urges* Parties and *invites* other Governments and relevant organizations to support and implement, as appropriate, in accordance with all three objectives of the Convention on Biological Diversity and, where applicable, with prior informed consent and/or approval and involvement of indigenous and local communities, as well as relevant national legislation, the following recommendations for scaling up and sustaining taxonomy resulting from this Conference ... [underline added]

<sup>175</sup> *Ibid.*, Annex, para. 1, quoted *infra* note 193.

<sup>176</sup> See text accompanying notes 77 *et seq. supra*.

<sup>177</sup> See text accompanying notes 78-83 *supra*.

<sup>178</sup> Committee on Economic, Social and Cultural Rights, General Comment No. 17, *The right of everyone to benefit from the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he is the author* (article 15, paragraph 1 (c), of the Covenant), UN Doc. E/C.12/GC/17 (12 January 2006), para. 32. [emphasis added]

<sup>179</sup> See, e.g., IISD Reporting Services, “Summary of the Resumed Ninth Meeting of the Working Group on Access and Benefit-Sharing of the Convention on Biological Diversity: 10-16 July 2010”, *Earth Negotiations Bulletin*, vol. 09, no. 527, 19 July 2010, at 7.

<sup>180</sup> Following increased objections from the IIFB, the co-Chairs opened up para. (f) for possible amendment at the next meeting in September 2010. However, no further discussions took place at the negotiations table and no revisions were made. Some representatives within the IIFB had proposed an alternative formulation of para. (f): “Provide national law to recognize and affirm the need to obtain the prior and informed consent of indigenous and local communities for access to their genetic resources and associated traditional knowledge”.

<sup>181</sup> *Nagoya Protocol*, article 5(5) (sharing of benefits arising from use of TK); and 7 (access to TK).

<sup>182</sup> *Protocol*, article 5(2).

<sup>183</sup> See, e.g., *Protocol*, articles 6(3)(e), 12(3)(b), 13(1)(b) and 17(2).

<sup>184</sup> In the preamble, the sole reference to “participation” pertains to women: “*Recognizing also* the vital role that women play in access and benefit-sharing and *affirming* the need for the full participation of women at all levels of policymaking and implementation for biodiversity conservation”

<sup>185</sup> United Nations Development Group, “United Nations Development Group Guidelines on Indigenous Peoples’ Issues”, *supra* note 25, at 13: “The right to self-determination may be expressed through: ... Respect for the principle of free, prior and informed consent ... Full and effective participation of indigenous peoples at every stage of any action that may affect them direct or indirectly.”

<sup>186</sup> *Ibid.* at 28: “Consultation and participation are crucial components of a consent process.”

<sup>187</sup> In relation to Indigenous and local communities, the *Protocol* uses the term “involvement” in articles 6(2) & 3(f), 7, 11, 13(1)(b), 16(1), 21(h) and 22(1).

<sup>188</sup> General Assembly, *Draft Programme of Action for the Second International Decade of the World's Indigenous People: Report of the Secretary-General*, UN Doc. A/60/270 (18 August 2005) (adopted by the General Assembly on 16 December 2005), para. 62.

General Assembly, *Keeping the promise: a forward-looking review to promote an agreed action agenda to achieve the Millennium Development Goals by 2015: Report of the Secretary-General*, UN Doc. A/64/665 (12 February 2010), para. 99: “The norms and values embedded in the Millennium Declaration and international human rights instruments must continue to provide the foundation for engagement, in particular the *key human rights principles of non-discrimination, meaningful participation and accountability.*” [emphasis added]

<sup>189</sup> Little or no consideration was given by the Parties to international rights and standards relating to democratic participation.

<sup>190</sup> See, e.g., Tkarihwaí:ri Code of Ethical Conduct, *supra* note 174, Annex, para. 30. See also Conference of the Parties to the Convention on Biological Diversity, *Mechanisms to promote the effective participation of indigenous and local communities in the work of the Convention*, Decision X/40, UN Doc. UNEP/CBD/COP/DEC/X/40 (29 October 2010).

<sup>191</sup> See, e.g., Conference of the Parties to the Convention on Biological Diversity, *Protected Areas*, Decision X/31, UN Doc. UNEP/CBD/COP/DEC/X/31 (29 October 2010), para. 31: *Invites* the Parties to: ... (c) Establish effective processes for the full and effective participation of indigenous and local communities, in full respect of their rights and recognition of their responsibilities, in the governance of protected areas, consistent with national law and applicable international obligations”.

As repeatedly demonstrated in the negotiations and final text of the *Nagoya Protocol*, Contracting Parties have attempted to exert national control over virtually all matters relating to access and benefit sharing.

<sup>192</sup> See, e.g., S. Vedavathy, *Displaced and Marginalised: Protecting the Traditional Knowledge, Customary Laws and Forest Rights of the Yanadi Tribals of Andhra Pradesh*, Herbal Folklore Research Centre, Tirupati, Andhra Pradesh, India, (September 2010), online: <http://pubs.iied.org/pdfs/G02788.pdf>.

*Africa: Declaration Of Indigenous Peoples At The Second International Forum Of Indigenous Peoples Of Central Africa (FIPAC 2)*, adopted by participants, Impfondo, 15 March 2011: “In conclusion, ... despite efforts and the progress already achieved, the status of [Indigenous peoples] continues to be that of marginalized and excluded peoples, which are unfairly treated and shamelessly exploited by our neighbors, traders and even development and conservation partners.”

<sup>193</sup> Tkarihwaí:ri Code of Ethical Conduct, *supra* note 174, Annex, para. 1. [emphasis added]

<sup>194</sup> Committee on the Elimination of Racial Discrimination, *Concluding observations of the Committee on the Elimination of Racial Discrimination: Russian Federation*, UN Doc. CERD/C/RUS/CO/19 (20 August 2008), para. 20:

The Committee recommends that the State party ... ensure that the small indigenous peoples of the North, Siberia and the Russian Far East are represented in the legislative bodies, as well as in the executive branch and in public service, at the regional and federal levels, and ensure their effective participation in any decision-making processes affecting their rights and legitimate interests.

<sup>195</sup> Human Rights Council, “Progress report”, *supra* note 159, UN Doc. A/HRC/15/35 (23 August 2010), para. 2. [emphasis added]

<sup>196</sup> UNDRIP includes a wide range of interrelated or mutually reinforcing provisions that, in their effect, require the full and effective participation of Indigenous peoples: see, e.g., preambular para. 24 and arts. 3, 4, 5, 10, 18, 19, 22, 23, 26, 27, 29, 30, 31, 32, 34, 38, 41, 42, 43, 45 and 46.

<sup>197</sup> Human Rights Council, *Progress Report*, *supra* note 159, where such provisions are said to be “articulated as, *inter alia*: (a) the right to self-determination; (b) the right to autonomy or self-government; (c) indigenous peoples’ “right to participate”; (d) their “right to be actively involved”; (e) States’ duty to “obtain their free, prior and informed consent”; (f) the duty to seek “free agreement” with indigenous peoples; (g) the duty to “consult and cooperate” with indigenous peoples; (h) the duty to undertake measures “in conjunction” with indigenous peoples; and (i) the duty to pay due “respect to the customs” of indigenous peoples.”

<sup>198</sup> General Assembly, *Draft Programme of Action for the Second International Decade of the World's Indigenous People: Report of the Secretary-General*, *supra* note 165, at para. 9, where two of the five objectives of the Decade relate to “full and effective participation”:

(i) Promoting non-discrimination and inclusion of indigenous peoples in the design, implementation and evaluation of international, regional and national processes regarding laws, policies, resources, programmes and projects;

(ii) Promoting *full and effective participation* of indigenous peoples in decisions which directly or indirectly affect their lifestyles, traditional lands and territories, their cultural integrity as indigenous peoples with collective rights or any other aspect of their lives, considering the principle of free, prior and informed consent ... [emphasis added]

<sup>199</sup> IFAD (International Fund for Agricultural Development), *Engagement with Indigenous Peoples: Policy*, *supra* note 66, at 7: “The Declaration addresses both individual and collective rights. It outlaws discrimination against indigenous peoples and promotes their full and effective participation in all matters that concern them.”

<sup>200</sup> New Zealand Human Rights Commission, “United Nations Declaration on the Rights of Indigenous Peoples”, <<http://www.hrc.co.nz/home/hrc/humanrightsandthetreatyofwaitangi/unitednationsdeclarationontherightsofindigenousp>

eoples.php>: “The Declaration ... declares discrimination against indigenous peoples unlawful and promotes their full and effective participation in all matters that concern them.”

<sup>201</sup> International Indigenous Peoples’ Forum on Climate Change (IIPFCC), “Indigenous Groups Announce Grave Concern on Possible Cancun Outcome”, Press release, 10 December 2010:

As members of the IIPFCC, ... we want to reiterate our determination to ensure protection of our rights, as laid out in the UN Declaration on the Rights of Indigenous Peoples, our right to free, prior, and informed, consent, the recognition and protection of our traditional knowledge, and ensure the *full and effective participation* of Indigenous Peoples in all climate change processes. [emphasis added]

<sup>202</sup> African Commission on Human and Peoples’ Rights, “Communiqué on the United Nations Declaration on the Rights of Indigenous Peoples”, Brazzaville, Republic of Congo, 28 November 2007.

<sup>203</sup> All UN member States have a duty to respect the purposes and principles of the *Charter of the United Nations*. This requires actions “promoting and encouraging respect” for human rights (*UN Charter*, art. 1(3)). This duty is based on “respect for the principle of equal rights and self-determination of peoples” (*UN Charter*, art. 55 c).

The *UN Charter*’s purposes and principles are also highlighted in UNDRIP, preambular para. 1. The principle of equal rights of peoples is affirmed in UNDRIP, preambular para. 2 and art. 2. The right of self-determination is affirmed in art. 3.

<sup>204</sup> International Labour Organization, *Monitoring indigenous and tribal peoples’ rights through ILO Conventions: A compilation of ILO supervisory bodies’ comments 2009-2010* (Geneva: ILO, 2010), at 4. And at 46-47, para. 44: “consultation and participation are the cornerstone of the Convention and that such mechanisms are not merely a formal requirement but are intended to enable indigenous peoples to participate effectively in their own development.”

<sup>205</sup> *Indigenous and Tribal Peoples Convention, 1989*, article 33(2).

<sup>206</sup> Rights Council, *Report of the Special Rapporteur on the situation of human rights and fundamental freedoms of indigenous people, James Anaya*, UN Doc. A/HRC/12/34 (15 July 2009), para. 38.

<sup>207</sup> *Ibid.*, para. 41. At para. 40, Anaya adds: “The duty of States to effectively consult with indigenous peoples is also grounded in the core human rights treaties of the United Nations”.

<sup>208</sup> Convention on Biological Diversity, *Traditional knowledge and Biological Diversity: Note by the Executive Secretary, supra* note 64, para. 93: “... special needs regarding participation ... may include the need for capacity building (e.g., negotiation skills, understanding of the environmental management issues under review and of the reasons behind the outside interest in their knowledge, legal support) and mechanisms for compensating the real costs of participation”. In regard to the efforts of the Secretariat, see also Conference of the Parties to the Convention on Biological Diversity, *Mechanisms to promote the effective participation of indigenous and local communities in the work of the Convention, supra* note 190.

<sup>209</sup> Permanent Forum on Indigenous Issues, *Information provided by the Secretariat of the Convention on Biological Diversity to the Tenth Session of the United Nations Permanent Forum on Indigenous Issues*, 2011, at 7-8. At 8, the Secretariat cautions against simply assessing the number of indigenous specific programmes being carried out: “Such an approach will not capture mainstreaming efforts and could potentially ghettoize indigenous issues.”

<sup>210</sup> See, for example, Stefan Disko, “World Heritage Sites in Indigenous Peoples’ Territories: Ways of Ensuring Respect for Indigenous Cultures, Values and Human Rights” in Dieter Offenhäuser, Walther Ch. Zimmerli & Marie-Theres Albert, eds., *World Heritage and Cultural Diversity* (German Commission for UNESCO, 2010) 167 at 174:

The Committee should ensure that indigenous peoples are treated as rights-holders and key decision-makers, whose consent must be obtained, and not merely lumped together with a wide variety of “stakeholders” to be “consulted” in decision-making processes. The stakeholder

---

approach negates indigenous peoples' status and rights under international law, including their right to self-determination and their collective rights to their lands, territories and resources.

<sup>211</sup> In relation to the funding mechanism in the *Protocol*, see also article 25(3).

<sup>212</sup> Convention on Biological Diversity, *Report of the International Expert Group Meeting on the International Regime on Access and Benefit-Sharing and Indigenous Peoples' Human Rights of the Convention on Biological Diversity: Note by the Executive Secretary*, UN Doc. UNEP/CBD/GTLE-ABS/3/INF/4 (25 May 2009), at para. 40 (Conclusions and recommendations):

... the lack of adequate resources for indigenous peoples to engage in effective participation in the international access and benefit-sharing process was an *obstacle to effective outcomes for indigenous peoples*. ... In addition, indigenous peoples often lack the technical skills to negotiate access and benefit-sharing arrangements with outside interests. [emphasis added]

<sup>213</sup> Human Rights Council, "Progress report", *supra* note 159, UN Doc. A/HRC/15/35 (23 August 2010), para. 2. [emphasis added], para. 97.

<sup>214</sup> UN Commission on Human Rights, *Continuing dialogue on measures to promote and consolidate democracy: Report of the High Commissioner for Human Rights submitted in accordance with Commission resolution 2001/41*, UN Doc. E/CN.4/2003/59 (27 January 2003), (expert seminar on the interdependence between democracy and human rights, Office of the High Commissioner for Human Rights, 25-26 November 2002, Geneva), at 19 (Chair's final conclusions). [bold in original]

<sup>215</sup> "Consensus", as understood within the United Nations, refers to acceptance of a proposal where no objection is formally raised.

<sup>216</sup> See Convention on Biodiversity, *Rules of Procedure for Meetings of the Conference of the Parties to the Convention on Biological Diversity*, <http://www.cbd.int/doc/legal/cbd-rules-procedure.pdf>, Rule 40, para. 1, where the brackets indicate there has been no agreement on the proposed text:

[1. The Parties shall make every effort to reach agreement on all matters of substance by consensus. If all efforts to reach consensus have been exhausted and no agreement reached, the decision [, except a decision under paragraph 1 or 2 of article 21 of the Convention] shall, as a last resort, be taken by a two-thirds majority vote of the Parties present and voting, unless otherwise provided by the Convention, the financial rules referred to in paragraph 3 of article 23 of the Convention, or the present rules of procedure. [Decisions of the Parties under paragraphs 1 and 2 of article 21 of the Convention shall be taken by consensus.]]

<sup>217</sup> For an example of paralysis resulting from a consensus rule, see Paul Meyer, "A path to nuclear disarmament leadership", *Embassy, Canada's Foreign Policy Newsweekly*, 2 February 2011, at 8: "... the Conference on Disarmament has not been able to agree on a functioning program of work since 1998. ... A key feature and flaw of the conference is that it operates on a strict consensus basis, which means that no substantive or procedural decision can be taken if even a single member state opposes it."

<sup>218</sup> See IISD Reporting Services, "Resumed ABS 9 Highlights", *Earth Negotiations Bulletin*, vol. 09, no. 522 – 12 July 2010, online: <http://www.iisd.ca/vol09/enb09522e.html>.

<sup>232</sup> Convention on Biological Diversity (Ad Hoc Working Group on Access and Benefit-sharing), *Report of the Meeting of the Group of Technical and Legal Experts on Traditional Knowledge associated with Genetic Resources in the Context of the International Regime on Access and Benefit-Sharing*, UN Doc. UNEP/CBD/WG-ABS/8/2 (15 July 2009), Annex (Outcome of the Meeting of the Group of Technical and Legal Experts on Traditional Knowledge associated with Genetic Resources in the Context of the International Regime on Access and Benefit-Sharing), at para. 122:

... experts recognized a critical distinction between traditional knowledge associated with genetic resources being in the “public domain” versus being “publically available”. ... The common understanding of publicly available does not mean available for free. The common understanding

---

of public availability could mean that there is a condition to impose *mutually agreed terms* such as paying for access. ... Within the concept of public availability, *prior informed consent* from a traditional knowledge holder that is identifiable, could still be required, as well as provisions of *benefit-sharing* made applicable ... [emphasis added]

<sup>233</sup> International Institute for Environment and Development (Krystyna Swiderska), “Equitable benefit-sharing or self-interest?”, IIED Opinion, September 2010. The author indicates: “Inclusion of publicly available traditional knowledge in the protocol is opposed by industrialised countries.”

<sup>234</sup> In relation to derogations by COP, see text accompanying notes 74 and 174 *supra*.

<sup>235</sup> See text accompanying note 193 *supra*.

<sup>236</sup> UNDRIP, article 42. [emphasis added]

<sup>237</sup> *Protocol*, article 4(3).

<sup>238</sup> The only exception is where the exercise of those obligations would cause a serious damage or threat to biological diversity: see *Convention*, article 22(1); and *Protocol*, article 4(1).

<sup>239</sup> In regard to “UN rule of law guidance and policy material”, the United Nations Rule of Law Unit lists UNDRIP as one of the instruments that is relevant for the promotion and protection of human rights: see [http://www.unrol.org/document/browse.aspx?xd=1&cat\\_id=26](http://www.unrol.org/document/browse.aspx?xd=1&cat_id=26). The UN Rule of Law Unit is in the Executive Office of the Secretary-General.

<sup>240</sup> See note 128 *supra* and accompanying text.

<sup>241</sup> See text accompanying notes 237 and 238 *supra*. See also *Protocol*, preamble: “Affirming that nothing in this Protocol shall be construed as diminishing or extinguishing the existing rights of indigenous and local communities”.

<sup>242</sup> Some references to “full and effective participation” of Indigenous and local communities were included in COP decisions. However, such decisions generally are not legally binding: see *supra* note 124.

See Secretary-General Ban Ki-moon, “Remarks to the opening of the Permanent Forum on Indigenous Issues”, 16 May 2011, [http://www.un.org/apps/news/infocus/sgspeeches/statments\\_full.asp?statID=1185](http://www.un.org/apps/news/infocus/sgspeeches/statments_full.asp?statID=1185):

From the forests to the oceans, from the mountains to the deserts, around our world you are guardians of nature. We need you to help influence the decisions we make today on energy and the environment, decisions which will affect generations to come.

...

We must end the oppression, and we must ensure that indigenous peoples are always heard. Raise your voices here at this Forum and beyond. I will urge the world to listen to your voices.

<sup>243</sup> See, e.g., *supra* note 47.

<sup>244</sup> “Established” rights may only refer to those that are recognized or affirmed by domestic legislation, agreement or judicial ruling: see text accompanying note 77 *supra*.

<sup>245</sup> In regard to “established” rights relating to genetic resources, see *Protocol*, articles 5(2) and 6(2).

<sup>246</sup> See text accompanying notes 81-83 *supra*.

<sup>247</sup> See text accompanying note 86 *supra*.

<sup>248</sup> See, e.g., *Anchorage Declaration*, agreed by consensus of the participants in the Indigenous Peoples’ Global Summit on Climate Change, Anchorage, Alaska (24 April 2009), para. 4: “We call upon the UNFCCC’s decision-making bodies

---

to establish formal structures and mechanisms for and with the full and effective participation of Indigenous Peoples.” The UNFCCC is the UN Framework Convention on Climate Change.

<sup>249</sup> See text accompanying notes 219 *et seq. supra*.

<sup>250</sup> In regard to Canada’s actions, see text accompanying notes 118-120 *supra*.

<sup>251</sup> See also Grand Council of the Crees (Eeyou Istchee) *et al.*, “Indigenous Peoples’ Right to Participate in Decision-Making: International and Regional Processes”, Joint Statement of Indigenous and civil society organizations, Expert Mechanism on the Rights of Indigenous Peoples, 3<sup>rd</sup> sess., Geneva (13 July 2010), para. 77 ii): “While it can be positive for State and Indigenous parties to aspire towards consensus, such an objective should remain flexible. In no case should consensus be achieved at the expense of Indigenous peoples’ human rights. As such, it is our recommendation that the consensus based framework be re-examined and alternative negotiation frameworks be considered as needed.”

<sup>252</sup> Romeo Saganash and Paul Joffe, “The Significance of the UN Declaration to a Treaty Nation: A James Bay Cree Perspective” in Jackie Hartley, Paul Joffe & Jennifer Preston (eds.), *Realizing the UN Declaration on the Rights of Indigenous People*, *supra* note 129, 135 at 140-141.

<sup>253</sup> Convention on Biological Diversity, “Statement by Ahmed Djoghlaif Executive Secretary of the Convention on Biological Diversity on the occasion of World Health Day 2011”, 6 April 2011: “You cannot have healthy societies without healthy ecosystems. Environmental risk factors for human health often act in concert and their effects are exacerbated by adverse social and economic conditions. The poorest and most marginalized, and particularly children, suffer first and most severely when the environment is degraded.”

<sup>254</sup> General Assembly, *The rule of law at the national and international levels*, UN Doc. A/RES/65/32 (10 January 2011) (res. adopted without vote 6 December 2010), para. 2.

<sup>255</sup> General Assembly, *Midterm assessment of the progress made in the achievement of the goal and objectives of the Second International Decade of the World’s Indigenous People*, *supra* note 52, para. 82 (Conclusions):

At the intergovernmental level, the Declaration has played a crucial role as a reference for the application of other binding intergovernmental mechanisms. Thus, Governments are increasingly encouraged to be accountable on specific issues pertinent to indigenous peoples, as for example under the Convention on Biological Diversity.

See, *e.g.*, Francesca Thornberry and Frans Viljoen, *Overview report of the research project by the International Labour Organization and the African Commission on Human and Peoples’ Rights on the constitutional and legislative protection of the rights of indigenous peoples in 24 African countries* (Geneva: International Labour Office, 2009) at 153 (Conclusions): “...major challenge lies in the lack of adequate measures for implementation of such provisions for the benefit of indigenous peoples, lack of capacity to address indigenous issues in an adequate and consultative/participatory manner, as well as in general attitudes towards indigenous peoples, among other things.”

<sup>256</sup> The critical need for such a study is evident. See, *e.g.*, *Africa: Declaration Of Indigenous Peoples At The Second International Forum Of Indigenous Peoples Of Central Africa (FIPAC 2)*, adopted by participants, Impfondo, 15 March 2011, at para. 2:

Given the low participation of indigenous peoples in national and international decision making, we ask States, projects and programs to develop various levels of effective mechanisms to ensure the presence and active participation of [Indigenous peoples in] ... decision-making bodies on issues and concerns affecting them.

<sup>257</sup> See Committee on the Elimination of Racial Discrimination, “Guidelines for the Early Warning and Urgent Action Procedures”, 71<sup>st</sup> session, Annual report A/62/18, Annexes, Chapter III, August 2007. Of particular relevance are the following criteria: “Presence of a significant and persistent pattern of racial discrimination, as evidenced in social and economic indicators”; and “Encroachment on the traditional lands of indigenous peoples ... in particular for the purpose of exploitation of natural resources”.

<sup>258</sup> Emphasis added. Article 31 of the *Protocol* also provides that additional evaluations of its effectiveness can be set at intervals determined by the Conference of the Parties serving as the meeting of the Parties to this Protocol.

<sup>259</sup> See text accompanying notes 91 and 218 *supra*.

<sup>260</sup> See text accompanying notes 90 and 119 *supra*.

<sup>261</sup> *Convention*, article 22(1); and *Protocol*, article 4(1). The sole exception is “where the exercise of those rights and obligations would cause a serious damage or threat to biological diversity”.

<sup>262</sup> Human Rights Council, *Report of the independent expert on human rights and international solidarity*, Rudi Muhammad Rizki, UN Doc. A/HRC/15/32 (5 July 2010), para. 58 (Conclusions). [emphasis added]
