# Research Activities

- TK awareness workshop
- Prior informed consent (PIC)
- Socio-economic survey
- Documentation & specimen collection training
- Sampel collection
- Phytochemical & bioactivity studies of selected species (Semelai, RPS Iskandar, Bera, Pahang)

# TRADITIONAL KNOWLEDGE (TK) DOCUMENTATION PROCESS

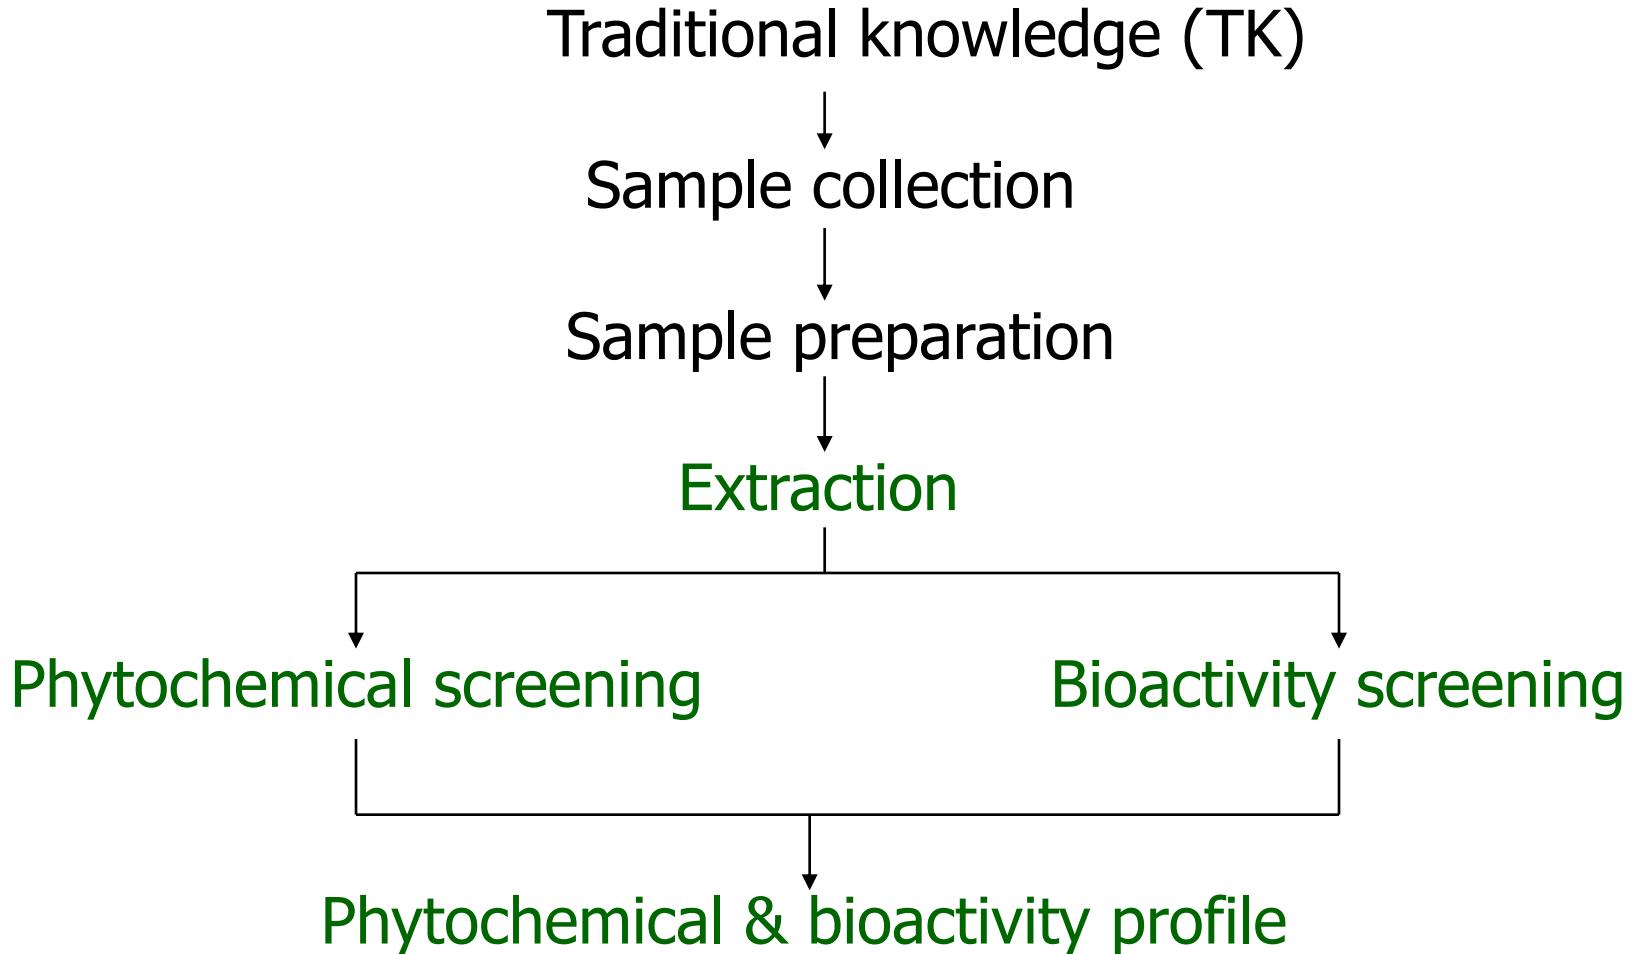

# Selection of species

## Criteria:

- Commonly used/popular among people in the community
- Medicinal uses - not publicly available
- Traditionally used for fever, infection, diabetes, personal care etc.
- Part used (leaf, bark, stem)
- Availability (enough sample: 3-5kg)

# Phytochemical profile

To screen chemicals content:

- Saponins
- Flavonoids
- Tannin
- Triterpenes
- Sterols

## Essential oil analysis

# Bioactivity profile

To validate & assess the potential as therapeutic / nutraceutical / cosmeceutical agents

# 2<sup>nd</sup> Phase Study

Discussion/Meeting with the community to inform the results gain from the lab analysis (19 Jan 2012)

## Project

Development of product prototype from TSBR087 based on traditional knowledge of Semelai sub-ethnic (NRE)

2012/2013

# Conclusions

- Preserve & maintain - TK
- Empower local orang asli
- Potential product development
- Possible benefit-sharing with the communities
