Santiago, Chile. September 13th 2019.

Mrs. Cristiana Paşca Palmer, PhD
Executive Secretary
Secretariat of the Convention on Biological Diversity
United Nations Environment Programme
Montreal - Canada

REF: CBD Notification 2019-075 - Invitation to provide proposals on the post-2020 global biodiversity framework

Dear Mrs. Executive Secretary,

We would like to thank you for the positive outcomes from the Open-ended Working Group on the Post-2020 Global Biodiversity Framework (GBF). Our delegation appreciates and values the openness and the inclusion of different views of such an important process. As expressed in the statements from our delegation, Chile supports the 2050 vision, its objective of living in harmony with nature and most importantly we believe that this process must be oriented by concepts or principles that guide the concrete actions in order to conserve, preserve and value biodiversity.

In that spirit, you will find enclosed to this message a reviewed version of the structure of the GBF Post 2020, proposed by Chile. Previous versions of this document were presented informally during the last meeting in Nairobi, but we have included small changes that consider some important topics included in the debate and exchange of opinions.

Our proposal reflects, in general terms, the idea of a Global Biodiversity Framework, which contains an apex target aimed to halt biodiversity loss, and also milestones per decade until 2050 that will allow us to make evaluations and realize the results of the actions that will be conducted since 2020.

In this context, the targets should be aimed towards mainstreaming biodiversity in the productive sectors, planetary boundaries and the direct drivers of biodiversity loss. On the other hand, indicators should be based in the ones already developed and used in the 2030 Agenda, other related conventions and in the Aichi targets.

This scheme also wants to integrate crosscutting issues in the whole structure of the framework, noticing the importance of these key elements during its implementation. Chile supports the idea of a strong framework that is easy to communicate and that could also serve as a tool to foster the implementation of national policies and strategies.

We hope this proposal or some of its elements be considered during the next phases of this open dialogue.

Please accept, Mrs. Executive Secretary, the assurances of my highest consideration.

Rodrigo Olsen Olivares
