BUSINESS, BIODIVERSITY AND CLIMATE CHANGE CONFERENCE

**16 AND 17 MAY 2018,
GLOBAL EXHIBITION ON SERVICES,
BOMBAY EXHIBITION CENTRE, MUMBAI**

ABOUT THE CONFERENCE

Biodiversity loss and climate change are critical to sustainable business operations. To tackle these aspects, businesses are trying to evolve their operations through valuation of natural capital, circular economy, resource efficiency and are making a move from geological energy sources to renewable energy sources. All these initiatives are directly or indirectly linked to conservation and sustainable management of biodiversity resulting into a stalemate in climate change.

This conference is designed to encourage discussion and exchange of ideas on how to leverage existing technology, innovation and available tools of various platforms with cross-sector collaboration involving businesses, government, NGOs and academia in sustainable management of businesses. This could be achieved through managing our natural capital. The conference will provide a forum to showcasing best practices in businesses and bring out the positive effects of mainstreaming biodiversity conservation in achieving sustainable development.

BUSINESS CHALLENGES ADDRESSED

- Integration of biodiversity management in business decisions for greater conservation and sustainable management
- Linking climate change, biodiversity conservation and control of desertification to address over-all environmental aspects
- Natural capital valuation models to analyse the current state of natural capital accounting and how it can be used to communicate the economic benefits of businesses
- Adaptation of biodiversity-friendly solutions, smart cities and industrial rating in building a future for business and society that harness the benefits of nature and contributes towards continuous sustainability.
- Circular economy and renewable energy in achieving national and international targets of emissions, biodiversity conservation and sustainable development. It is time to re-think and re-design businesses in terms of securing raw materials, cost-efficiency and resource management

WHY ATTEND?

- Understand the role of businesses in achieving India's commitments towards national and multilateral agreements in addressing climate change and biodiversity issues
- Learn and build capacity by knowing the available best practices, solutions and tools for sustainable development of businesses and enhancing brand reputation
- Networking with top leading businesses, government and experts working in the field of biodiversity, climate change and circular economy
- Explore the available opportunities for collaborating towards similar business interests.
