# Aichi Prefectural Government: Biodiversity Collaborations in Aichi, Japan

ESTABLISHING ECOSYSTEM NETWORKS TO PASS SUSTAINABILITY IN NATURE TO FUTURE GENERATIONS

#### FACT 1

Implementation of 'Aichi Mitigation'

#### FACT 2

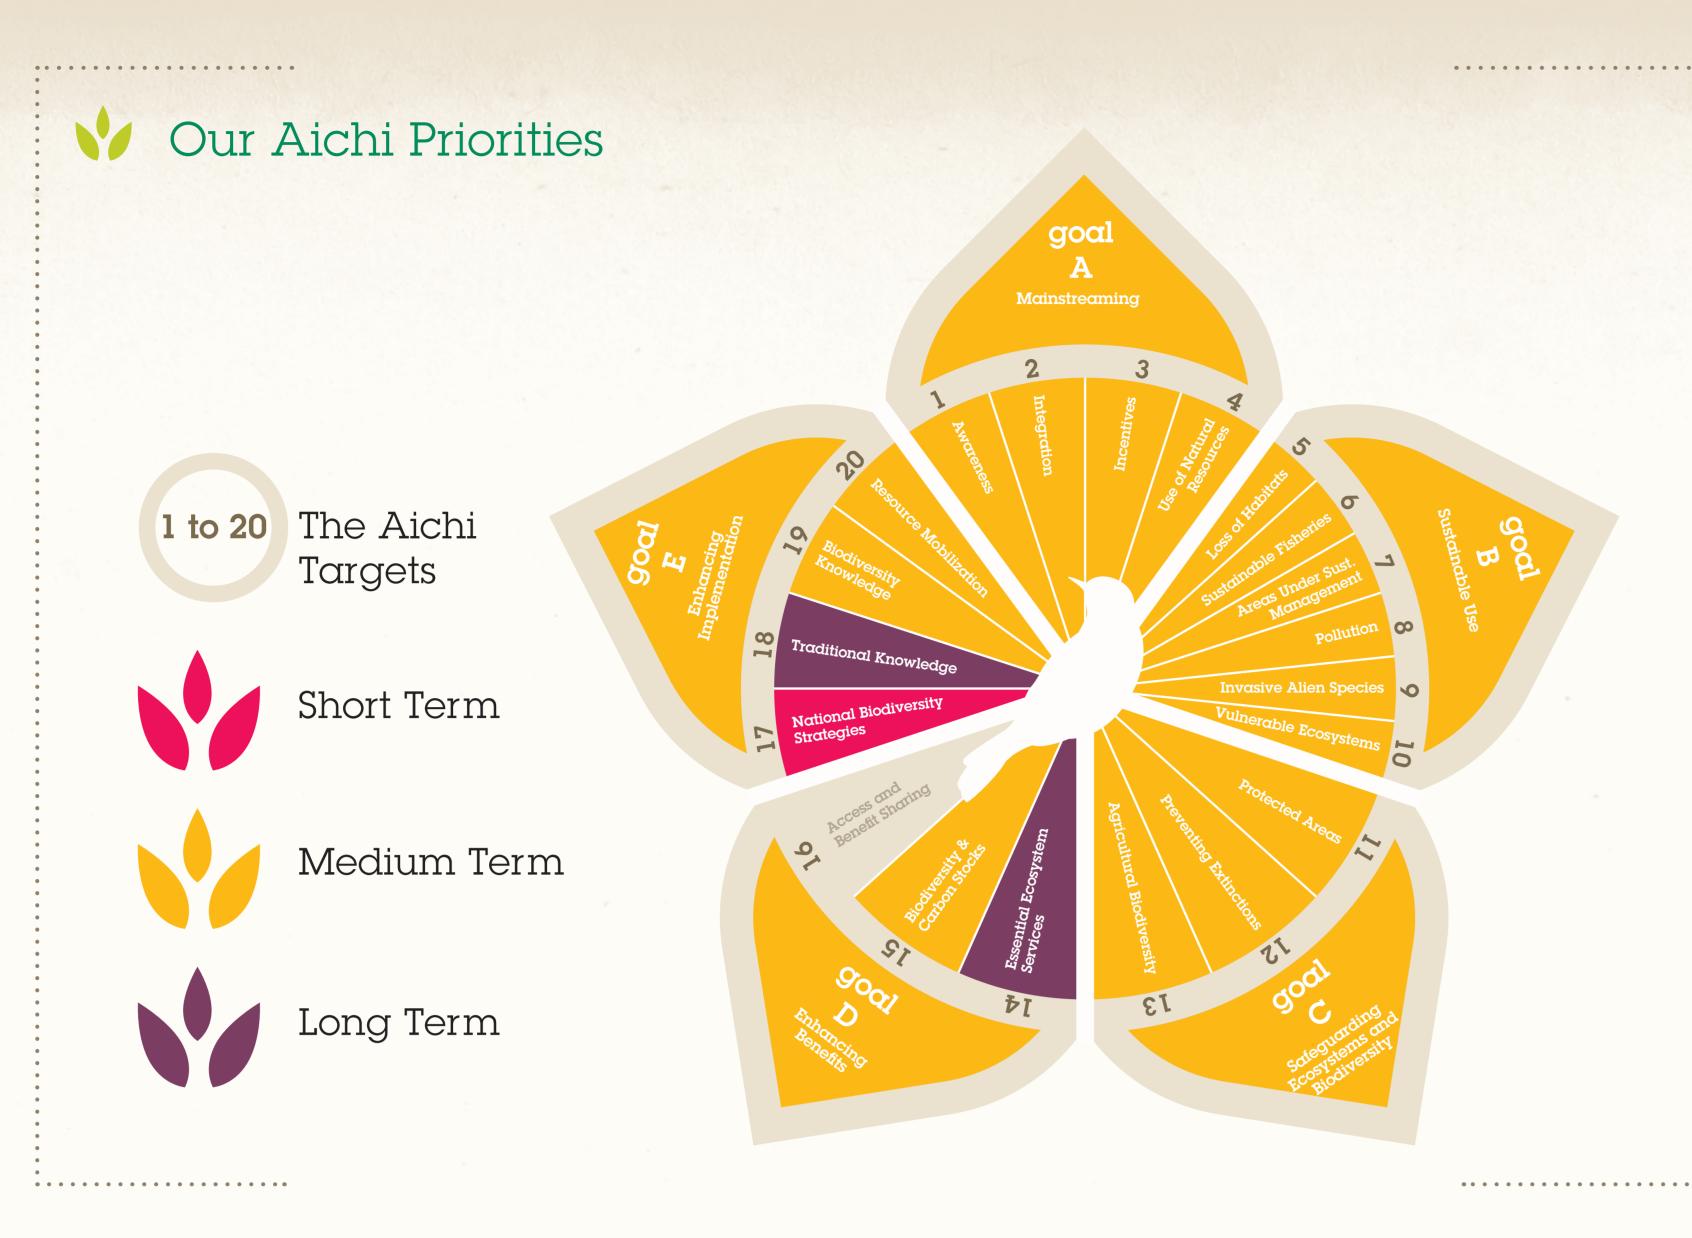

Promoting conservation and sustainable use of biodiversity in business activity

## FACT 3

Promoting consideration for and sustainable use of biodiversity in agriculture, forestry and fishing

"Ecological Networks"

natural blessings.)

and culture, and

based on AICHI METHOD.

to learn local nature, history,

(Establishment of the basis of

We encourage

take action.

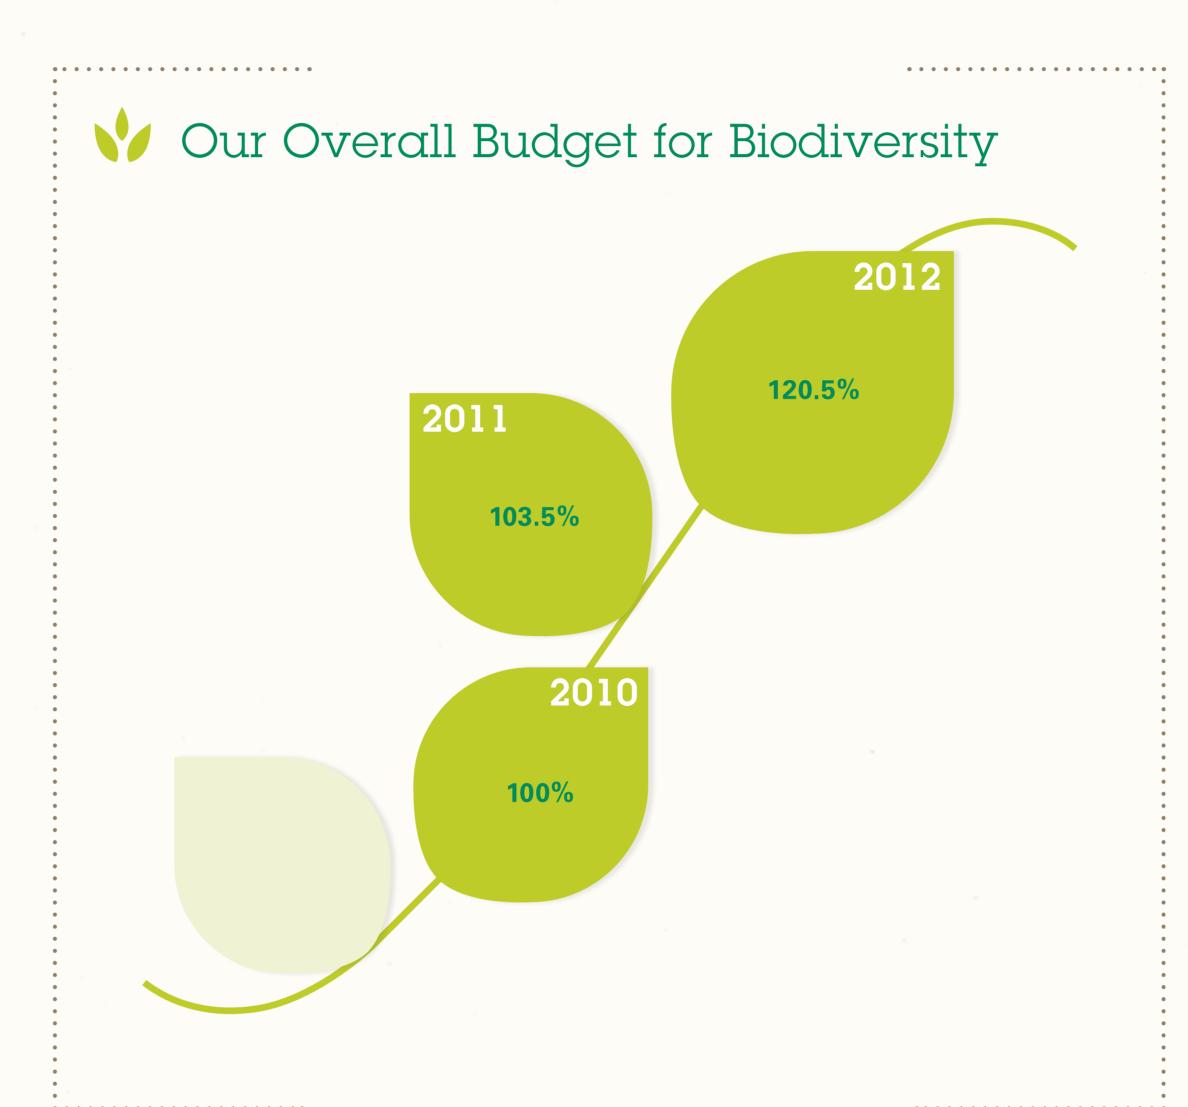

(Fostering of human resources.)

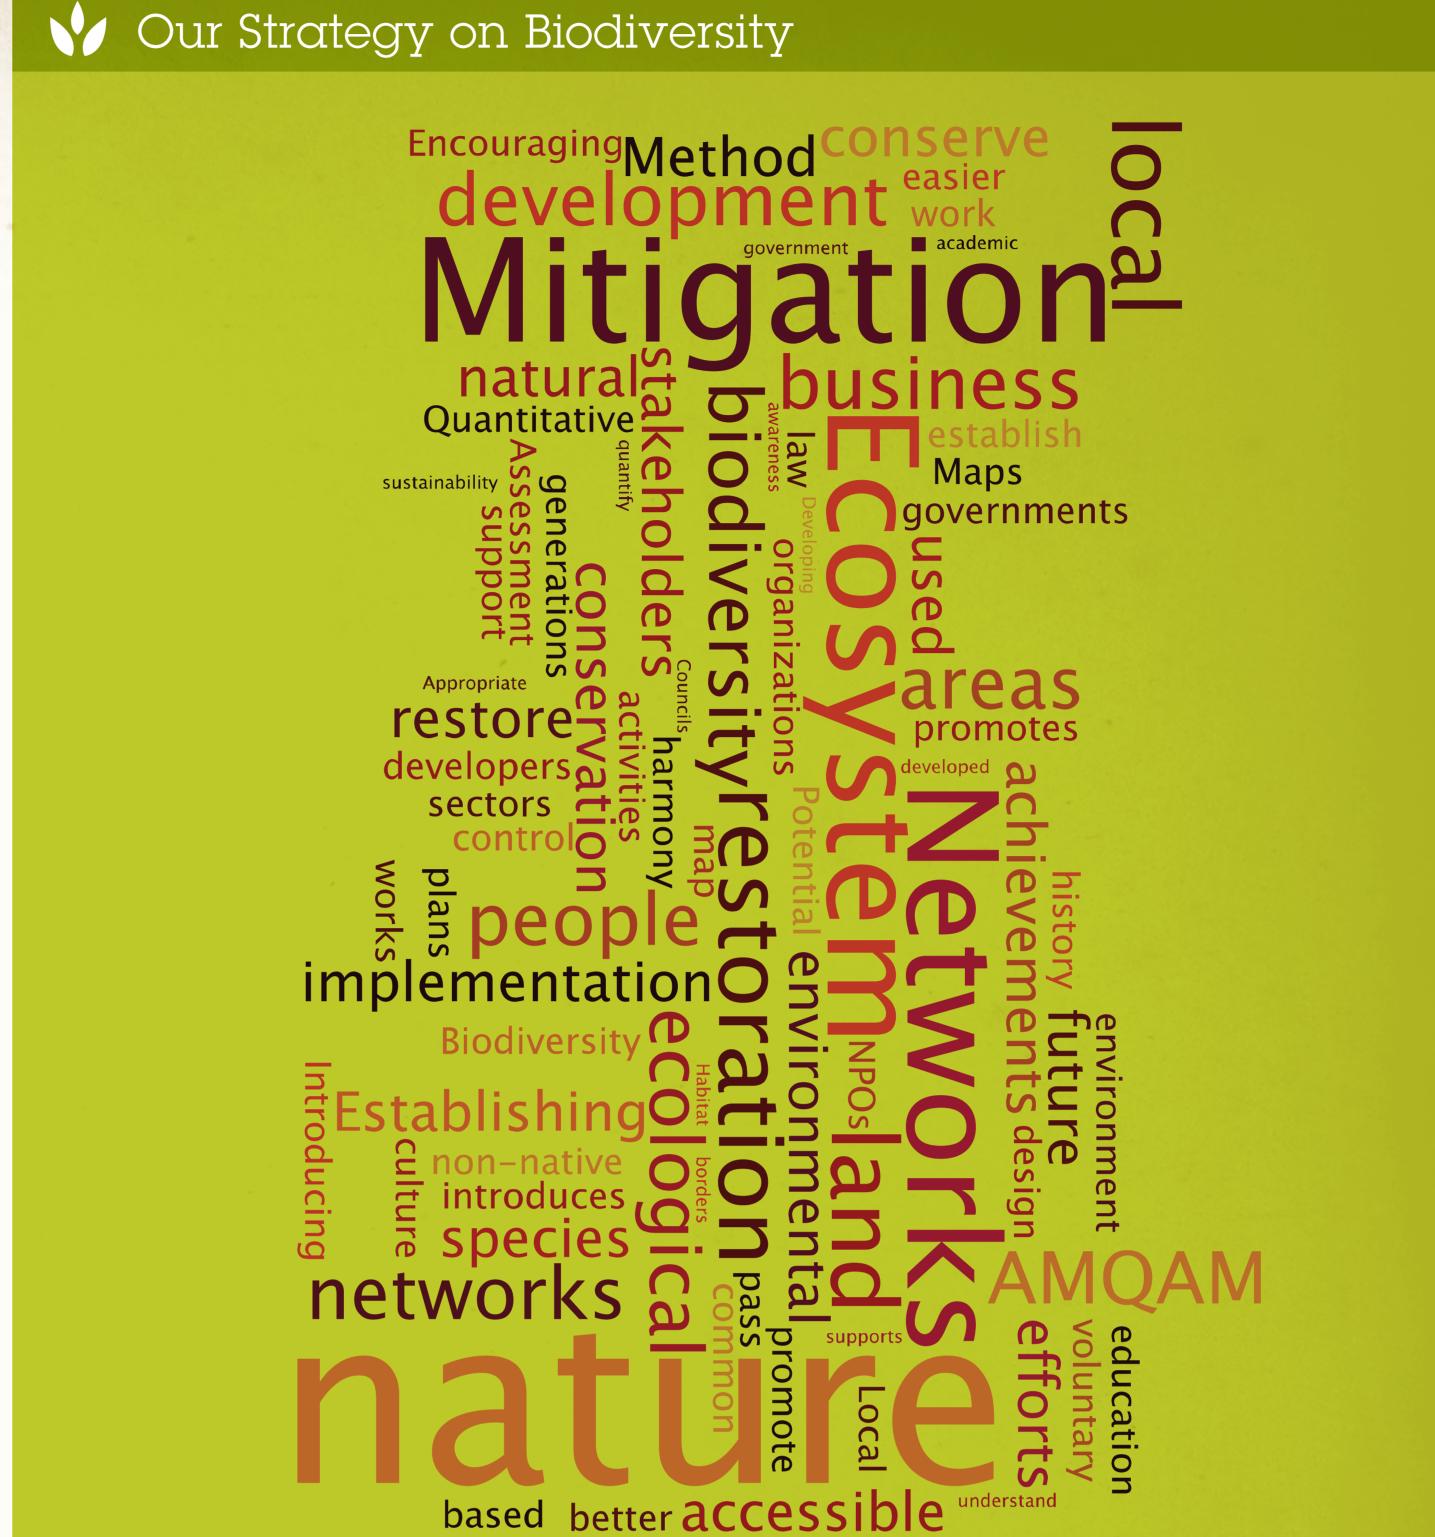

After COP10 held in 2010 in Aichi, we have proceeded ecosystem networking to link the habitats. In 'Inochiwotunagu Project', the university students play a central role to start the project which turns 10-kilometer-long green belts of nearby factories into the woods where wildlife such as foxes can industrial zone in Chita Peninsula...

"Ecosystem Networking also links people with people. Working together with people live in Chita Peninsula, people restore nature close to their lives and appreciate it."

New Aichi Biodiversity Strategy towards the implementation of the Aichi Targets

Our Main Approaches for Mainstreaming

It is a system that land developers compensate the loss of

biodiversity due to land developments. If the compensation is not

possible within the area of the development, it would be replaced in

Introducing 'Aichi Mitigation'

Aichi Prefecture is one of local governments. What do you think is the most important thing that local governments can contribute to biodiversity?

### ...and more Initiatives:

Establishing 'Ecosystem Networks' to pass sustainability in nature to future generations (Aichi Prefecture) Aichi Targets 1, 4

Developing a new local strategy for biodiversity based on the Aichi Targets (Aichi Prefecture) Aichi Target 1

Leading efforts with 'Aichi Method' to introduce it into ecosystem networking (Aichi Prefecture) Aichi Target 7

land development and biodiversity conservation at the same time (Aichi Prefecture) Aichi Targets 14, 15

Introducing 'Aichi Mitigation Quantitative Assessment Method' to quantify in a simple way (Aichi Prefecture)

Aichi Targets 2, 14, 19 'Nagoya's Eastern Hills Ecosystem Network Council' which creates loca common properties (East Part of Nagoya City)

Aichi Targets 5, 7, 9

Introducing 'Aichi Mitigation' to suppor 'Kigyounomori Inochiwotunagu Project' in which university students play a central role to work for biodiversity in the woods owned by some companies in Aichi (Chita Peninsula in Aichi Prefecture) Aichi Targets 11, 18

> 'Tunageru lectures' in which university students play a central role (Chita Peninsula in Aichi Prefecture) Aichi Target 18

The protection of endangered species and the appropriate control of invasive non-native species (Aichi Prefecture) Aichi Target 13

We establish

"Ecological

networks

where residents,

and government

(Establishment of

structure system.)

businesses,

WORK

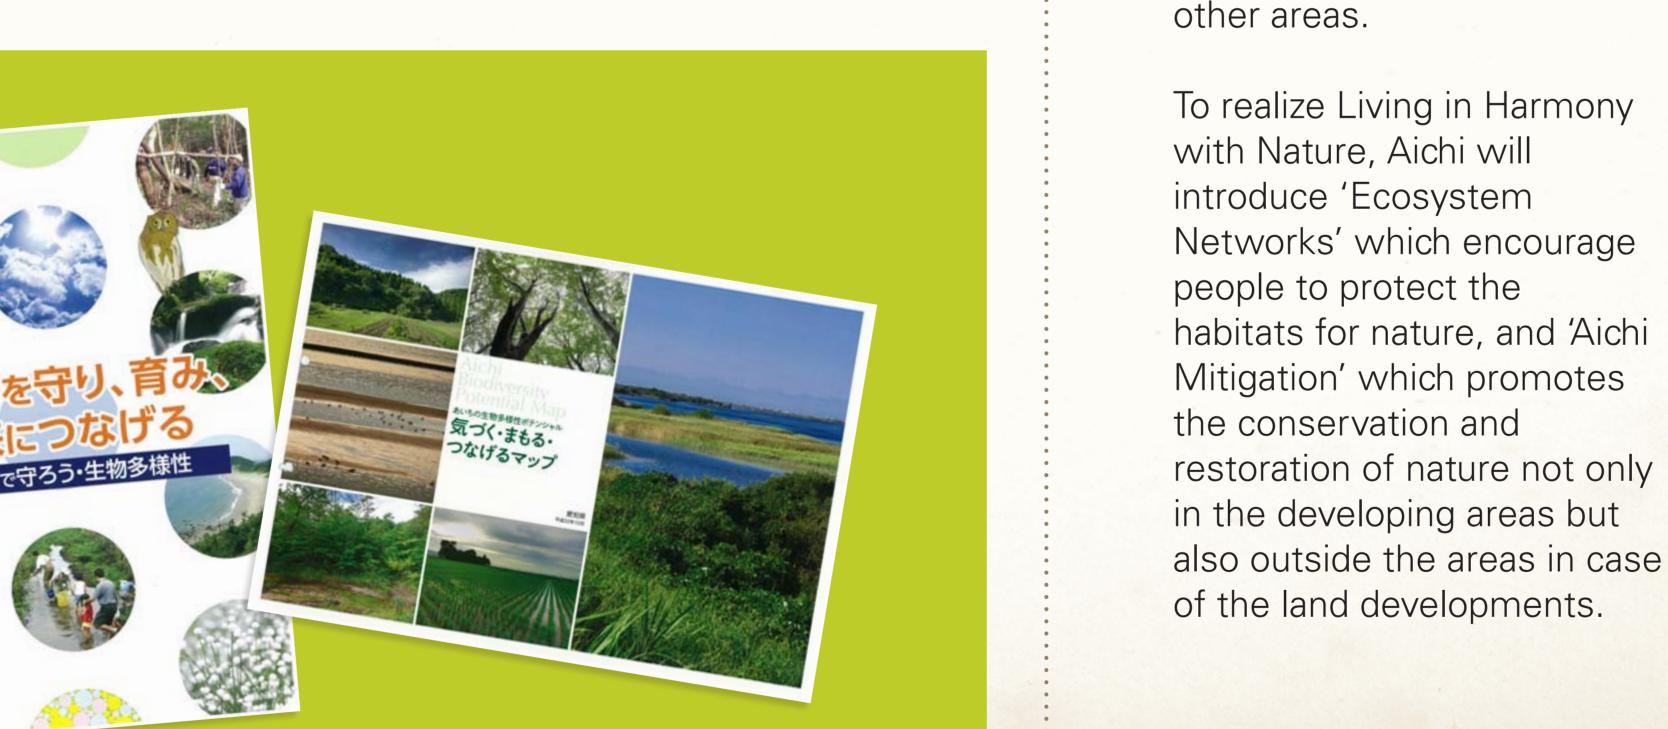

Committee"

TOGETHER.

DID YOU KNOW?

compensation with consideration for ecosystem
