

PROTECTED AREAS

KEY BIODIVERSITY AREAS

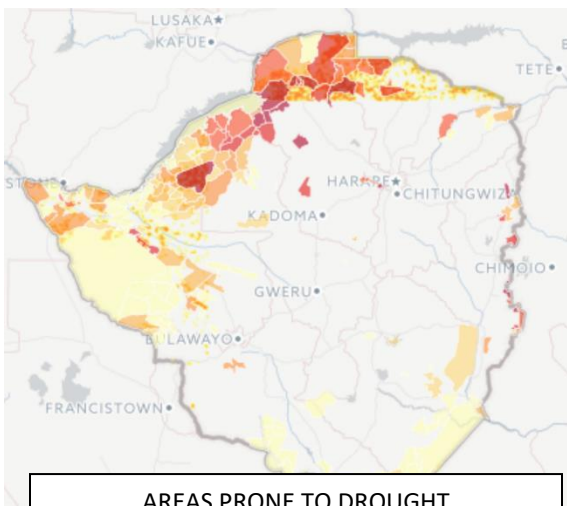

A = FIRE; B = POACHING; C – INVASIVE ALIEN SPECIES; D = WETLAND DEGRADATION

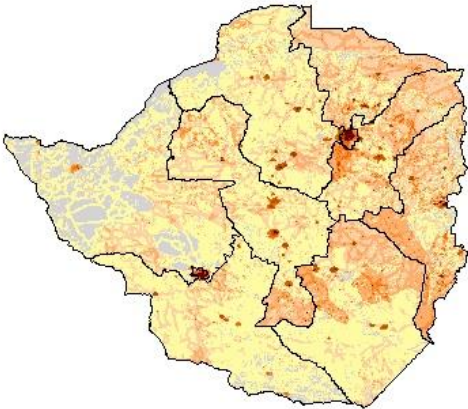

MINING DEPOSITS (SHAPES), MINING OPERATIONS (DOTS) MINES IN PROTECTED AREAS (BUILDINGS)

FIRE FREQUENCY AND INTENSITY IN PROTECTED AREAS

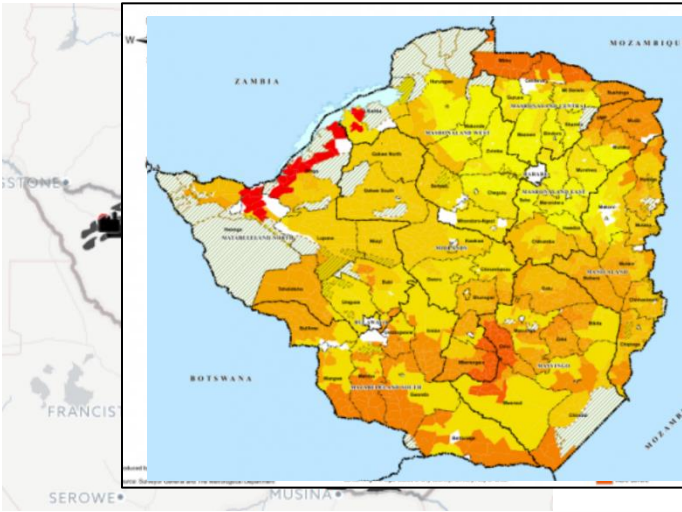

AREAS PRONE TO DROUGHT

POPULATION DENSITY

FOOD INSECURITY (DARKER = MORE FOOD SCARCITY)

Based on the maps, identify where you would prioritize each of the following actions:

Where would you make changes to protected area coverage and/or management effectiveness? Why?

-

Where would you focus restoration efforts? Why?

-

Pre-SBSTTA Workshop Program:

Spatial Data in the Sixth National Report to the Convention on Biological Diversity

Jointly organized by UNDP, UN Environment and SCBD
Palais des Congrès, Montréal – Sunday, 10 December 2017, 10:00 to 17:00

What other action would you take?
Where would you take this action? Why?

-

Objectives:

- To provide an update on the current status of spatial data use in NBSAPs and National Reports
- To share the results of a needs assessment review for spatial data
- To identify key areas of the 6th National Report for which spatial data are essential
- To explore linkages between the Aichi Biodiversity Targets and the Sustainable Development Goals
- To share approaches to mapping elements of the 6th National Report
- To provide an update on UNDP's and UN Environment's planned support on spatial data as part of an overall support package to countries
