

Technical and Scientific Cooperation & Transfer of Technology Priorities

Regional Bio-Bridge Initiative Round Table for Latin America and the
Caribbean

November 27 - 29, Bogota, Colombia

Presented by:

Eavin L . Parry

Department of Environment

St. Kitts and Nevis

TSC and TT Priorities for SKN

St. Kitts and Nevis has recently established a Protected Areas Unit, employed park rangers and is in the process of establishing Forestry Management Programmes

Areas for TSC may include:

- Technical assistance (TA) in applying GIS and remote sensing as a science-based, decision support tool for forestry management
- TA in the use of drone technology for forest data collection and monitoring

TSC & TT Priorities for SKN ('''' t)

St. Kitts and Nevis along with some other Caribbean islands have seen a marked reduction in key coral endangered species such as elkhorn and staghorn coral. There is a lack of expertise in coral restoration.

Areas for TSC may include:

- 1) TA in establishing artificial coral reefs
- 2) TA in the establishing of coral nurseries
- 3) TA assistance in the use and deployment of a Coral Reef Early Warning System (CREWS) Station
- 4) Capacity building in the above area

TSC & TT Priorities for SKN ('''' t)

St. Kitts and Nevis has the unique challenge with controlling the population growth of the African Green Vervet Monkey, which is the most destructive IAS in the country.

Areas for TSC may include:

- 1) TA in management of the monkey population
- 2) Capacity building in proven control measures

TSC and TT Priorities for SKN "" "" t

Area for TSC

- 1) Technical capacity building in various types of ecological survey techniques such as field techniques for surveying bird

Thank You!
