INFORMAL ADVISORY COMMITTEE  
ON CAPACITY-BUILDING FOR THE  
IMPLEMENTATION OF THE  
NAGOYA PROTOCOL

Third meeting

Montreal, Canada, 20-22 March 2018

Item 3 of the provisional agenda\*

### OVERVIEW OF ACCESS AND BENEFIT-SHARING CAPACITY-BUILDING TOOLS AND RESOURCES

*Note by the Executive Secretary*

#### I. INTRODUCTION

1. The present note by the Executive Secretary provides an overview of existing access and benefit-sharing capacity-building tools and resources, on the basis of information available to the Secretariat as of 8 February 2018. The information contained herein forms the basis of the analysis contained in document CBD/ABS/CB-IAC/2018/1/2, section III, on awareness-raising and capacity-building resources. The capacity-building tools and resources which have been added to the table below since the document was last updated for the second meeting of the Conference of the Parties serving as the meeting of the Parties to the Nagoya Protocol, in September 2016, are marked with an asterisk in the first column which contains the number of the resource and are highlighted in grey.

2. The Secretariat prepared this overview based on information from various sources, including:

(a) Information made available by Parties, other Governments, indigenous peoples and local communities and relevant organizations regarding their capacity-building and development tools and resources made available through the ABS Clearing-House;

(b) Information provided by members of the Informal Advisory Committee;

(c) Online searches.

## II. OVERVIEW OF ABS CAPACITY-BUILDING AND DEVELOPMENT TOOLS AND RESOURCES

3. In preparing the present overview, access and benefit-sharing capacity-building tools and resources were considered to be those whose primary intent was to facilitate structured learning, impart new knowledge and skills through progressive instructive steps and/or provide guidance on how to perform specific tasks related to access and benefit-sharing. Other tools and resources that were not expressly developed for these purposes were considered to be general literature or reference material and not necessarily capacity-building resources. The overview categorizes capacity-building tools and resources on the basis of their main purpose: assessing capacity-building needs and designing capacity-building initiatives; monitoring and evaluation of capacity-building initiatives; facilitating training or learning; providing technical guidance; or raising awareness.

It is meant to be used at all stages of project implementation or, at a minimum, at the beginning of a project, at its midpoint and at the end.	N/A <sup>2</sup>

9	SCBD E-Learning Modules on ABS (2): - Introduction to the Nagoya Protocol and access and benefit-sharing - The ABS Clearing-House	SCBD and UN System Staff College	2018	En (Fr, Es, Ru, Zh, Ar forthcoming)	forthcoming	The module "Introduction to access and benefit-sharing" introduces the concept and practice of accessing genetic resources and the sharing of benefits arising from their utilization. It describes the key ABS terminology and concepts, the core principles of ABS and practical examples of key procedures, good practices and lessons learned in the implementation of ABS. The module on the ABS Clearing-House helps participants become familiar with (a) the role of the ABS Clearing-House in translating ABS and the Nagoya Protocol into practice, (b) the different types of information that can be registered through the ABS Clearing-House, (c) best practices for submission/adding of information; and (d) how to find information in the ABS Clearing-House.	1, 4

The Practical Guidelines is a hands-on-tool for the implementation of the Nagoya Protocol on ABS. It proposes procedures for granting prior informed consent, concluding mutually agreed terms and monitoring compliance by instituting continental and regional procedures that are transparent and functional. The Strategic Guidelines gives policy direction to the AU Member States and sets out the commonly agreed principles to be coordinated at an AU level. The Strategic Guidelines aims at facilitating coordination and cooperation between African countries and African stakeholders.	1,2

Contracts are foreseen as the main legal tool for making access and benefit sharing work. Many years have gone by since contracts were first suggested as a solution to resolve the challenges of ABS, but so far few successful benefit-sharing cases have been presented. This volume explores the possibilities and limits of contract law which both practitioners and stakeholders need in order for ABS contracts to become an effective solution for sustainable use of biological diversity.	3

The e-book is intended for 'DNA barcoders' – researchers and practitioners using DNA-based approaches, such as DNA barcoding, for the identification of organisms. It aims to help them understand how access and benefit-sharing relates to their work and the steps to take to avoid problems. It also points to opportunities provided by the Nagoya Protocol for researchers and practitioners to raise awareness of their work and identify for themselves the specific practices within their field as these relate to access and benefit-sharing.	1

Authored by Claudio Chiarolla, former WIPO legal officer in the Traditional Knowledge Division, and Burcu Kılıç, WIPO consultant, the publication analyses the choices available to policymakers regarding patent disclosure requirements related to genetic resources and traditional knowledge. The publication documents “the variety of issues at stake and the many options available,” through examples from different national and regional jurisdictions. This exploration of options is meant to help policymakers to reach informed decisions and facilitate understanding, implementation and training, in particular by focusing on key questions to be considered at each stage of the policy development process.	n/a

It can be used in the generation of new policies or laws; alternatively, it could also be applied in the context of evaluating existing policies and legislation to identify where gaps, administrative burdens and transaction costs in general may be negatively affecting implementation.	1, 2
