Key areas of the strategic framework for capacity-building and development

- * Already completed
 - * Clearing House Mechanism – Training workshops, Creating links to our website with the system where possible
 - * Training – Additional training modules development, training of trainers on ABS issues, contract training
 - * Legislation and policy Development
 - * Stakeholder Awareness – including executive level awareness
 - * Permit and Contract Templates Development – Including for IPLCs
 - * Developing a roster of Experts
 - * Cabinet briefs for all countries

- * Planned

- * Formalizing the training program with the UWI
- * Online Reporting system
- * Business model development

Main challenges that you are facing in terms of capacity-development?

- * Funding
- * Commitment from the executive level
- * Response time for consultants
- * Legal designation of ILCs specifically LCs

Lessons useful for the design of future capacity building initiatives

- * Discussion with Governments on CD issues
- * Awareness is not always as expected
- * Importance of local communities and local sellers not always captured
- * Timeline for legislation development
- * Staff turn over – need to make provisions for training of more than one person per country
- * Fishing emails by companies in developed countries

Capturing, packaging and sharing lessons

- * ABS case study Video
<http://lightpoleproductions.com/private/clients/iucn/>
- * Documentary – currently being developed
- * Training Program – to be institutionalized

What we haven't captured

- * Awareness for the less exposed sectors
- * Legislation – Especially for countries not in our project
- * Formalization of the regional strategy we are developing
