

LIBERIA'S TOP PRIORITY ACTIONS FOR BIODIVERSITY CONSERVATION

- Develop and introduce biodiversity training in Liberian schools, colleges & rural communities
- Identify and assess forest and agricultural biodiversity and quantitative values in monetary terms
- Define and describe subsidies that militate the conservation and sustainable use of biodiversity
- Develop and initiate implementation of measures to restore and/or rehabilitate at least 2% of these ecosystems

- Develop a national plan defines and illustrates sustainable production consumption of natural resources within ecological limits and seek legislative support for its implementation
- Invest in the establishment and management of hydro and biogas technology
- Identify and document alien species in prioritized ecosystems and determine various means by which they enter the country and sources
- Organize a biodiversity conservation Trust fund
- Conduct a series of case studies on indigenous knowledge systems
