ENGLISH ONLY

SUBSIDIARY BODY ON IMPLEMENTATION

Second meeting

Montreal, Canada, 9-13 July 2018

Item 11 of the provisional agenda

COOPERATION WITH OTHER CONVENTIONS, INTERNATIONAL ORGANIZATIONS AND INITIATIVES

THE CONTRIBUTION OF THE CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES OF WILD FAUNA AND FLORA TO THE IMPLEMENTATION OF THE GLOBAL STRATEGY FOR PLANT CONSERVATION

Note by the Executive Secretary

1. The Executive Secretary is circulating herewith, for the information of participants in the second meeting of the Subsidiary Body on Implementation, a document on the contribution of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) to the implementation of the Global Strategy for Plant Conservation (GSPC) 2011-2020. This document was prepared for the seventeenth meeting of the Conference of the Parties to CITES (Johannesburg, South Africa, 24 September -5 October 2016) and updates information made available for the first meeting of the Subsidiary Body on Implementation.¹
2. The document includes the summary of responses provided by 42 Parties to CITES to a questionnaire on the implementation of several targets of GSPC, including on target 11, for which the Conference of the Parties to the Convention on Biological Diversity, in decision XII/15, encouraged Parties, as appropriate, to recognize the Plants Committee of CITES and relevant national CITES authorities as lead entities for implementation.
3. The document is being circulated in the form and language in which it was received by the Secretariat.

CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES
OF WILD FAUNA AND FLORA

Seventeenth meeting of the Conference of the Parties
Johannesburg (South Africa), 24 September -5 October 2016

Strategic matters

Cooperation with biodiversity-related conventions and other organizations

COOPERATION WITH THE GLOBAL STRATEGY FOR PLANT CONSERVATION
ON BIOLOGICAL DIVERSITY

1. This document has been submitted by Mexico.*

Background

2. At its 16th meeting (CoP16; Bangkok, 2013) the Conference of the Parties adopted [Resolution Conf. 16.5](#) on "Cooperation with the Global Strategy for Plant Conservation of the Convention on Biological Diversity", which provides specific guidelines on GSPC-CITES collaboration by:
 - Inviting Parties to:
 - a) take note of the potential contribution of CITES to the objectives and targets of the consolidated update of the *Global Strategy for Plant Conservation 2011-2020* through the activities and products listed in the Annex to the Resolution;
 - b) promote and enhance collaboration between their GSPC focal point and their CITES Authorities, through:
 - i. the involvement of CITES authorities in the development and implementation of the GSPC national strategies, particularly activities related to CITES-listed species; and
 - ii. the inclusion of CITES-GSPC-related activities in CBD National Reports;
 - Directing the Secretariat to encourage the exchange of information related to the GSPC and other plant conservation and sustainable use initiatives, by:
 - a) promoting awareness of ongoing CITES activities that contribute to the achievement of GSPC Targets, by communicating information among CITES bodies and Parties on the operations and outcomes of CITES processes, such as the Review of Significant Trade, Periodic Review of the Appendices, proposals to amend the CITES Appendices, and formulation of Non-detriment Findings (NDFs), among others;
 - b) collaborating with the CBD Secretariat to streamline reporting on relevant CITES activities related to the GSPC Targets;
 - c) including the GSPC in any work plans developed under the Memorandum of Cooperation with the Secretariat of CBD; and
 - d) inviting a CBD representative to participate as an observer at Plants Committee meetings that address GSPC;
 - Directing the Plants Committee and the Secretariat to promote CITES collaboration with CBD on the implementation of the GSPC by:
 - a) representing the CITES Plants Committee at meetings of CBD's Subsidiary Body on Scientific, Technical and Technological Advice (SBSTTA) and other GSPC meetings subject to the availability of external funding; and
 - b) providing contributions for CBD documents regarding the implementation of the GSPC.

* The geographical designations employed in this document do not imply the expression of any opinion whatsoever on the part of the CITES Secretariat (or the United Nations Environment Programme) concerning the legal status of any country, territory, or area, or concerning the delimitation of its frontiers or boundaries. The responsibility for the contents of the document rests exclusively with its author.

3. At its 21st meeting (PC21; Veracruz, México 2014), the Plants Committee considered document [PC21 Doc. 8.2](#), presented by the (then) interim Vice Chair of the Plants Committee (Hesiquio Benítez, México) and prepared in collaboration with the Mexican Scientific Authority (*Comisión Nacional para el Conocimiento y Uso de la Biodiversidad*, CONABIO). As a result, and on the basis of the recommendations of the document, the Plants Committee:
 - 3.1. Took note of Res. Conf. 16.5, and in particular the “List of potential CITES activities and products and their contribution to the objectives and targets of the updated Global Strategy for Plant Conservation 2011-2020” included in its Annex;
 - 3.2. Encouraged Parties to report any progress related to the implementation of Res. Conf. 16.5 to the regional representatives of the Plants Committee;
 - 3.3. Established an intersessional working group on GSPC, as follows:
 - a) Mandate:
 - i. Monitor compliance with the recommendations formulated by PC21 regarding the implementation of Res. Conf. 16.5; and,
 - ii. Prepare a progress report for review at PC22.
 - b) Membership:
 - i. Chair: Representative of North America (Mr. Benítez)
 - ii. Members: Representatives of Africa (Ms. Khayota), Asia (Mr. Fernando), Central and South America and the Caribbean (Ms. Rivera) and Oceania (Mr. Leach), and Alternate representative of Europe (Mr. Carmo).
 - iii. Parties: United Kingdom of Great Britain and Northern Ireland, and United States of America.
 - iv. IGOs and NGOs: UNEP-WCMC, International Union for Conservation of Nature (IUCN), Botanical Gardens Conservation International, and TRAFFIC International.
4. At the 22nd meeting of the Plants Committee (PC22; Tbilisi, Georgia 2015), the working group presented the progress achieved, through document [PC22 Doc. 7.2 \(Rev. 2\)](#), submitted by the Representative of North America (Mr. Benítez) in collaboration with the Mexican Scientific Authority (CONABIO), highlighting the following sections of the document:
 - a) Annex 3, consisting of a “Draft report on CITES contribution to the implementation of GSPC 2011-2020 (Res. Conf. 16.5)”, which represents a preliminary *qualitative* assessment of CITES performance in the implementation of all 5 GSPC Objectives. The methodology followed by the working group to achieve the draft report is detailed at length in document PC22 Doc. 7.2 (Rev. 2), and it is mainly based on the input provided by 34 Parties in response to a consultation process described in Annex 1 of that document.
 - b) Annex 4 consisting of a detailed “Overview of the Secretariat’s capacity building materials with emphasis on the activities related to GSPC and Resolution Conf. 16”. Particularly, said Annex 4 included a Table which summarizes Periodic Review proposals and Review of Significant Trade in Specimens of Appendix-II species since CoP13 to the 21st meeting of the Plants Committee (PC21, 2014).
 - c) Annex 5, an *Excel* file consisting of the entire online flora reported by the 34 CITES Parties responded to the working group’s consultations in preparation for PC22; currently available at <https://cites.org/sites/default/files/eng/com/pc/22/E-PC22-07-02-Annex5-Rev2.xlsx>
5. Based on the recommendations of document PC22 Doc. 7.2 (Rev. 2), the Plants Committee:
 - a) Took note of the “Draft report on CITES contribution to the implementation of GSPC 2011-2020 (Res. Conf. 16.5)” (contained in **ANNEX 1** to the present document);
 - b) Requested the Secretariat to publish on its website the summary on Periodic Review proposals and Review of Significant Trade updated until PC21 (contained in **ANNEX 2** of the present document); and,
 - c) Encouraged Parties to provide information on the implementation of Res. Conf. 16.5, in order to prepare an updated version of the draft report for consideration of the 17th meeting of the Conference of the Parties.
6. In order to update the information contained in the Draft Report (**ANNEX 1**), the Plants Committee (through the interim Vice Chair, Ms. Adrienne Sinclair) requested the Secretariat to publish Notification to the Parties 2016/046 on the “Questionnaire on the implementation of Res. Conf. 16.5”, encouraging to fill in a questionnaire based on that originally included in [Annex 2 to document PC22 Doc. 7.2 \(Rev. 2\)](#). The feedback and responses received have been included ANNEX 1 of the present document (Draft report on the contribution to the implementation of GSPC 2011-2020); which reflects the inputs provided by a total of 42 Member States:

- | | | |
|--------------------|-----------------|---|
| 1) Argentina | 16) Finland | 31) Peru |
| 2) Australia | 17) Greece | 32) Portugal |
| 3) Austria | 18) Honduras | 33) Republic of Korea |
| 4) Botswana | 19) Italy | 34) Republic of Moldova |
| 5) Brazil | 20) Jamaica | 35) Seychelles |
| 6) Bulgaria | 21) Japan | 36) Slovakia |
| 7) Chile | 22) Madagascar | 37) Spain |
| 8) China | 23) Mexico | 38) Switzerland |
| 9) Colombia | 24) Monaco | 39) Turkey |
| 10) Costa Rica | 25) Montenegro | 40) United Kingdom of Britain
and Northern Ireland
(including Overseas
Territories, UKOTs) |
| 11) Croatia | 26) Montserrat | 41) United States of America |
| 12) Cuba | 27) Netherlands | 42) Venezuela |
| 13) Czech Republic | 28) New Zealand | |
| 14) Denmark | 29) Norway | |
| 15) Ecuador | 30) Panama | |

Recommendations to the Conference of the Parties

7. Endorse the updated version of **ANNEX 1** of the present document (which reflects the both the inputs provided by Parties in preparation for PC22, as well as the additional inputs in response to Notification 2016/046), and request the Secretariat to send it to the Secretariat of the Convention on Biological Diversity, in order for it to be considered at *CBD's 13th meeting of the Conference of the Parties* (COP13-CBD, Cancun, México; December 2016) as CITES contribution to the implementation of GSPC 2011-2020.
8. Request the Secretariat to:
 - a) Publish and maintained updated on its website the summary contained in **ANNEX 2** of the present document (*Periodic Review proposals submitted to CoPs for amendments to Appendices I and II, taxa selected for Periodic Review of species included in App. I and II, and Review of Significant Trade in specimens of App. II species*), including relevant updates derived from PC22 and CoP17;
 - b) Request the UNEP-WCMC (*United Nations Environment Programme-World Conservation Monitoring Centre*) to include in its website an interactive version of the online flora, currently available at <https://cites.org/sites/default/files/eng/com/pc/22/E-PC22-07-02-Annex5-Rev2.xlsx>, in such a way that CITES Parties can maintain it up to date, and thus have a clear idea on CITES contribution to the implementation of Target 1 of the GSPC.

COMMENTS FROM THE SECRETARIAT

- A. The Secretariat supports the cooperation with the Global Strategy for Plant Conservation (GSPC) of the Convention on Biological Diversity (CBD), as directed in Resolution Conf. 16.5. The document explains that this cooperation has mainly consisted of providing the CBD with updates on various CITES review processes concerning selected plant species (Periodic Review of the Appendices; Review of Significant Trade), and information on plant-related activities conducted by the Parties and the Secretariat that are or may be relevant to GSPC's objectives. The document seeks agreement from the Conference of the Parties to continue this delivery of information to the GSPC.
- B. The Secretariat notes that to date, there seem to have been only limited opportunities for GSPC to inform CITES of relevant activities, or bring information on plant conservation and sustainable use initiatives involving CITES-listed species to the attention of the Parties.
- C. The Secretariat suggests that the Conference of the Parties agrees to the recommendation in paragraph 7 of the document, as it may contribute to discussions on the GSPC at CBD's 13th meeting of the Conference of the Parties (COP13-CBD, Cancun, December 2016).
- D. The implementation of the recommendation in paragraph 8 a) would have cost implications for the Secretariat. It requests the Secretariat to maintain on its website updated information on proposals submitted to amend Appendices I and II, the Periodic Review and the Review of Significant Trade as far as flora is concerned. The most practical and effective way of keeping the required information up to date involves the creation of a database. This would cost around USD 10,000 in consultancies, for which external funds would have to be secured. The Secretariat has provided further comments on the estimated costs for establishing databases for the Review of Significant Trade process and the Periodic Review process in documents CoP17 Doc. 33 and CoP17 Doc. 82.1 respectively.

- E. Regarding the recommendation in paragraph 8 b), the Secretariat would encourage the Conference of the Parties to seek comments from UNEP-WCMC regarding the feasibility and cost for undertaking the proposed activity.
- F. Finally, the Secretariat would like to bring to the attention of Parties that the Notification mentioned in paragraph 6 has been published and can be found on the CITES website as Notification No. 2016/046.

“Draft report on CITES contribution to the implementation of GSPC 2011-2020”
Last updated: September 2016

The present draft is based on the information provided by the 42 Parties in response to the questionnaires sent in preparation for PC22 and in response to Notification 216/046, as well as the information contained in Annexes 2 and 3 of the present agenda item.

Objective I: Plant diversity is well understood, documented and recognized	
1) Target 1: An online flora of all known plants	1.1. Of the 42 responding Parties: a) 19 Parties reported that around 80-100% of their native CITES-listed plants have online descriptions, namely: Australia, Austria, Brazil, Bulgaria, Chile, China, Colombia, Croatia, Czech Republic, Greece, Italy, Madagascar, Mexico, Montserrat, Norway, Portugal, Switzerland, UK, and USA. In most of these cases, the majority of the hyperlinks provided represented national-managed online platforms. b) 2 Parties reported that around 50-70% of their native CITES-listed plants have online descriptions, these were: Finland and Peru. c) 13 Parties reported that either an unknown or up to 25% of their native CITES listed plants have online descriptions, these were: Argentina, Botswana, Costa Rica, Cuba, Ecuador, Honduras, Japan, Panamá, Republic of Korea, Republic of Moldova, Seychelles, Spain, and Montenegro. The links on the species with online descriptions (according to Parties responses) can be consulted in the spreadsheet in Annex 3 of the present document. 1.2. Furthermore (as provided by the Secretariat), CITES has the following publications or checklists available: a) Checklist of CITES Species– 2013: http://checklist.cites.org/#/en b) CITES Wiki Identification Manual: https://www.cites.org/eng/resources/wiki_id.php c) Kew Garden CITES references for plants: http://www.kew.org/data/cites.html d) Piante Grasse - (publication of the “Associazione Italiana Amatori delle piante Succulente”) – Volume 9 e) Piante Grasse - Volume 12 f) Species+ Database: http://www.speciesplus.net/
2) Target 2: An assessment of the conservation status of all known plant species, as far as possible, to guide conservation action	According to the Secretariat’s report, since CoP13 to the date: a) 36 Appendix I species have been selected under the Periodic Review of the Appendices process (PR), of which: 5 have completed reviews (with a PC document to support with the supporting statement); and 31 have ongoing reviews (which include 7 species of <i>Sclerocactus</i> spp., with the results of the PR to be presented for consideration of the present meeting of the Plants Committee [PC22, Georgia 2015]). b) 69 Appendix II species have been selected under the PR, of which: 8 have completed reviews (whether a decision to retain, amend their listings) with a PC document or amendment proposal with the supporting statement; 1 review was suspended; and the remaining 60 are ongoing (including 7 species of <i>Sclerocactus</i> spp. with the results of the PR to be presented for consideration of PC22). c) During the reported period, 118 plant species have been under review by the Significant Trade process (ST), all of them with results recorded in PC working documents. d) A total of 95 plant <i>taxa</i> have been the target of a successfully adopted amendment proposal, as follows: 16 correspond to amendment proposals related solely to annotations (amendment of existing annotations, or merging thereof, inclusion of certain populations in App. II); 1 resulted in the deletion from App. I; 34 resulted in the deletion from Ap. II; 1 resulted in the transfer from Appendix II to I; 3 resulted in the transfer from Appendix I to II; 40 resulted in the inclusion under Appendix II. Furthermore, the UNEP-WCMC trade database represents one of the main sources of information, that serves as the basis of the analysis that guide the decision making processes for CITES plant listed species, mainly: Significant Trade (Res. Conf. 12.8 [Rev. CoP13]), Periodic Review (Res. Conf. 14.8 [Rev. CoP16]), Amendments to the Appendices (Res. Conf. 9.24 [Rev. CoP16]).

3) Target 3: Information, research and associated outputs, and methods necessary to implement the Strategy developed and shared	
<i>Preliminary assessment of CITES performance in contributing to Objective I:</i>	Good

Objective II: Plant diversity is urgently and effectively conserved	
7) Target 7: At least 75 per cent of known threatened plant species conserved <i>in situ</i> .	Regarding the approximately 300 plant species currently listed in Appendix I (an based solely on the 34 responding Parties): a) Around 60 plant taxa are currently protected under <i>in situ</i> conservation schemes in any of the following 16 countries: Argentina, Brazil, Chile, China, Colombia, Costa Rica, Cuba, Finland, Italy, Madagascar, Mexico, Panamá, Peru, Republic of Korea, UK, and USA. b) Furthermore, 6 Parties specifically mentioned having no native Appendix I species in their countries: Australia, Austria, Bulgaria, Czech Republic, Montserrat, and Norway.
8) Target 8: At least 75 per cent of threatened plant species in ex situ collections, preferably in the country of origin, and at least 20 per cent available for recovery and restoration programmes.	Similarly, regarding the approximately 300 plant species currently listed in Appendix I, around 33 taxa are currently known to be protected under <i>ex situ</i> conservation schemes in any of the following 15 countries: Chile, China, Colombia, Costa Rica, Cuba, Ecuador, Finland, Greece, Italy, México, Madagascar, Monaco, Panamá, Peru, and the UK.
Preliminary assessment of CITES performance in contributing to Objective II:	Perfectible

Objective III: Plant diversity is used in a sustainable and equitable manner	
11) Target 11: No species of wild flora endangered by international trade	11.1. Listings under CITES Appendices (https://cites.org/eng/app/appendices.php), applicable to the 180 Parties to the Convention: a) Approximately 300 plant species are currently listed under Appendix I of CITES. Their trade is regulated by the applicable provisions of the Convention, in particular: Art. III (and other related Resolutions and Decisions; particularly Res. Conf. 16.7 on non-detriment findings, or NDFs). b) Approximately 29,600 plant species are listed under Appendix II of CITES. Their trade is regulated by the applicable provisions of the Convention, in particular: Art. IV (and other related Resolutions and Decisions; particularly Res. Conf. 16.7 on non-detriment findings, or NDFs). c) Approximately 12 plant species are listed under Appendix III of CITES. Their trade is regulated by the applicable provisions of the Convention, in particular: Art. V (and other related Resolutions and Decisions). 11.2. Furthermore, <i>all</i> the information reported under this Annex contributes to the implementation of Target 11.

12) Target 12: All wild harvested plant-based products sourced sustainably.	a) Of the 42 responding Parties, 15 specifically mentioned that under their domestic legislation, all Appendix I and II CITES listed species are subject to the Conventions provisions related to the formulation of non-detriment findings (NDFs) in compliance with the provisions of Arts. II and IV of the Convention, as well as Res. Conf. 16.7; most of them specified that the formulation of NDFs is made on a case by case basis. This, in addition to the domestic measures set in place which might include the implementation of stricter measures. These countries were: Argentina, Brazil, Chile, China, Ecuador, Honduras, Jamaica, Madagascar, Mexico, New Zealand, Peru, Republic of Korea, UK, Switzerland and USA. b) Similarly, 10 countries explicitly mentioned the establishment of quotas for a total of around 400 Appendix I and II taxa. These countries were: Bulgaria, China, Colombia, Croatia, Ecuador, Jamaica, Japan, Madagascar, Peru, and Republic of Moldova. However this might represent a strong underestimation of CITES plant species with established quotas at a national level. c) Furthermore, CITES website hosts sections to aid compliance to its provisions, such as: • NDF Section, where Parties can find the most updated information and guidance on the formulation of NDFs for species listed under Appendices I and II: https://cites.org/eng/prog/ndf/index.php • The 2015 national export quotas available at: https://cites.org/sites/default/files/common/quotas/2015/ExportQuotas2015.pdf d) Regarding the regulation of main specimens in trade, there are around 15 annotations in the Appendices relevant to plant species, which are focused on regulating the main specimens in trade.
Preliminary assessment of CITES performance in contributing to Objective III:	Good

Objective IV: Education and awareness about plant diversity, its role in sustainable livelihoods and importance to all life on earth is promoted	
14) Target 14: The importance of plant diversity and the need for its conservation incorporated into communication, education and public awareness programmes.	On the CITES Virtual College Parties can find courses, reference materials and training slides that, although no specific to flora, can provide a strong platform to train Parties on how CITES works.
15) Target 15: The number of trained people working with appropriate facilities sufficient according to national needs, to achieve the targets of this Strategy.	
Preliminary assessment of CITES performance in contributing to Objective IV:	Perfectible

Objective V: The capacities and public engagement necessary to implement the Strategy have been developed	
16) Target 16: Institutions, networks and partnerships for plant conservation established or strengthened at national, regional and international levels to achieve the targets of this Strategy.	Although the CITES Secretariat has formalized the cooperation with numerous institutions, international organizations and multilateral environmental agreements, the existing MoUs do not focus on flora matters only. They address general cooperation for all CITES species (animals and plants) or for animal species and, none of them is specific for plant species.
<i>Preliminary assessment of CITES performance in contributing to Objective V:</i>	Perfectible

“Periodic Review proposals submitted to CoPs for amendments to Appendices I and II (Article XV of the Convention), taxa selected for Periodic Review of species included in Appendices I and II [Resolution Conf. 14.8 (Rev. CoP16)] and Review of Significant Trade in specimens of Appendix-II species [Resolution Conf. 12 (Rev. CoP13)] since CoP13 to PC21”
