Subject: Inquiries for start up funding for Biodiversity project

Greetings from Southern Sudan!

We are an NGO involved in sustainable development. We have planned to set up an educative biodiversity Centre where a botanical garden shall be set up, with the aim of promoting among other things communities/individuals with tools of in conservation, advocacy and practically set up a garden where endangered species of plants (with medicinal) values can be multiplied. This will be the first of its kind in Southern Sudan.

Southern Sudan has emerged from 22 years of civil war. As such, we are inquiring the possibility of submitting a proposal for a "minimal" set up fund for the secretariat for up to two years, and then the project will sustain itself.

Yours sincerely

Emmanuel Longo
