

New Caledonia

Geographic Context

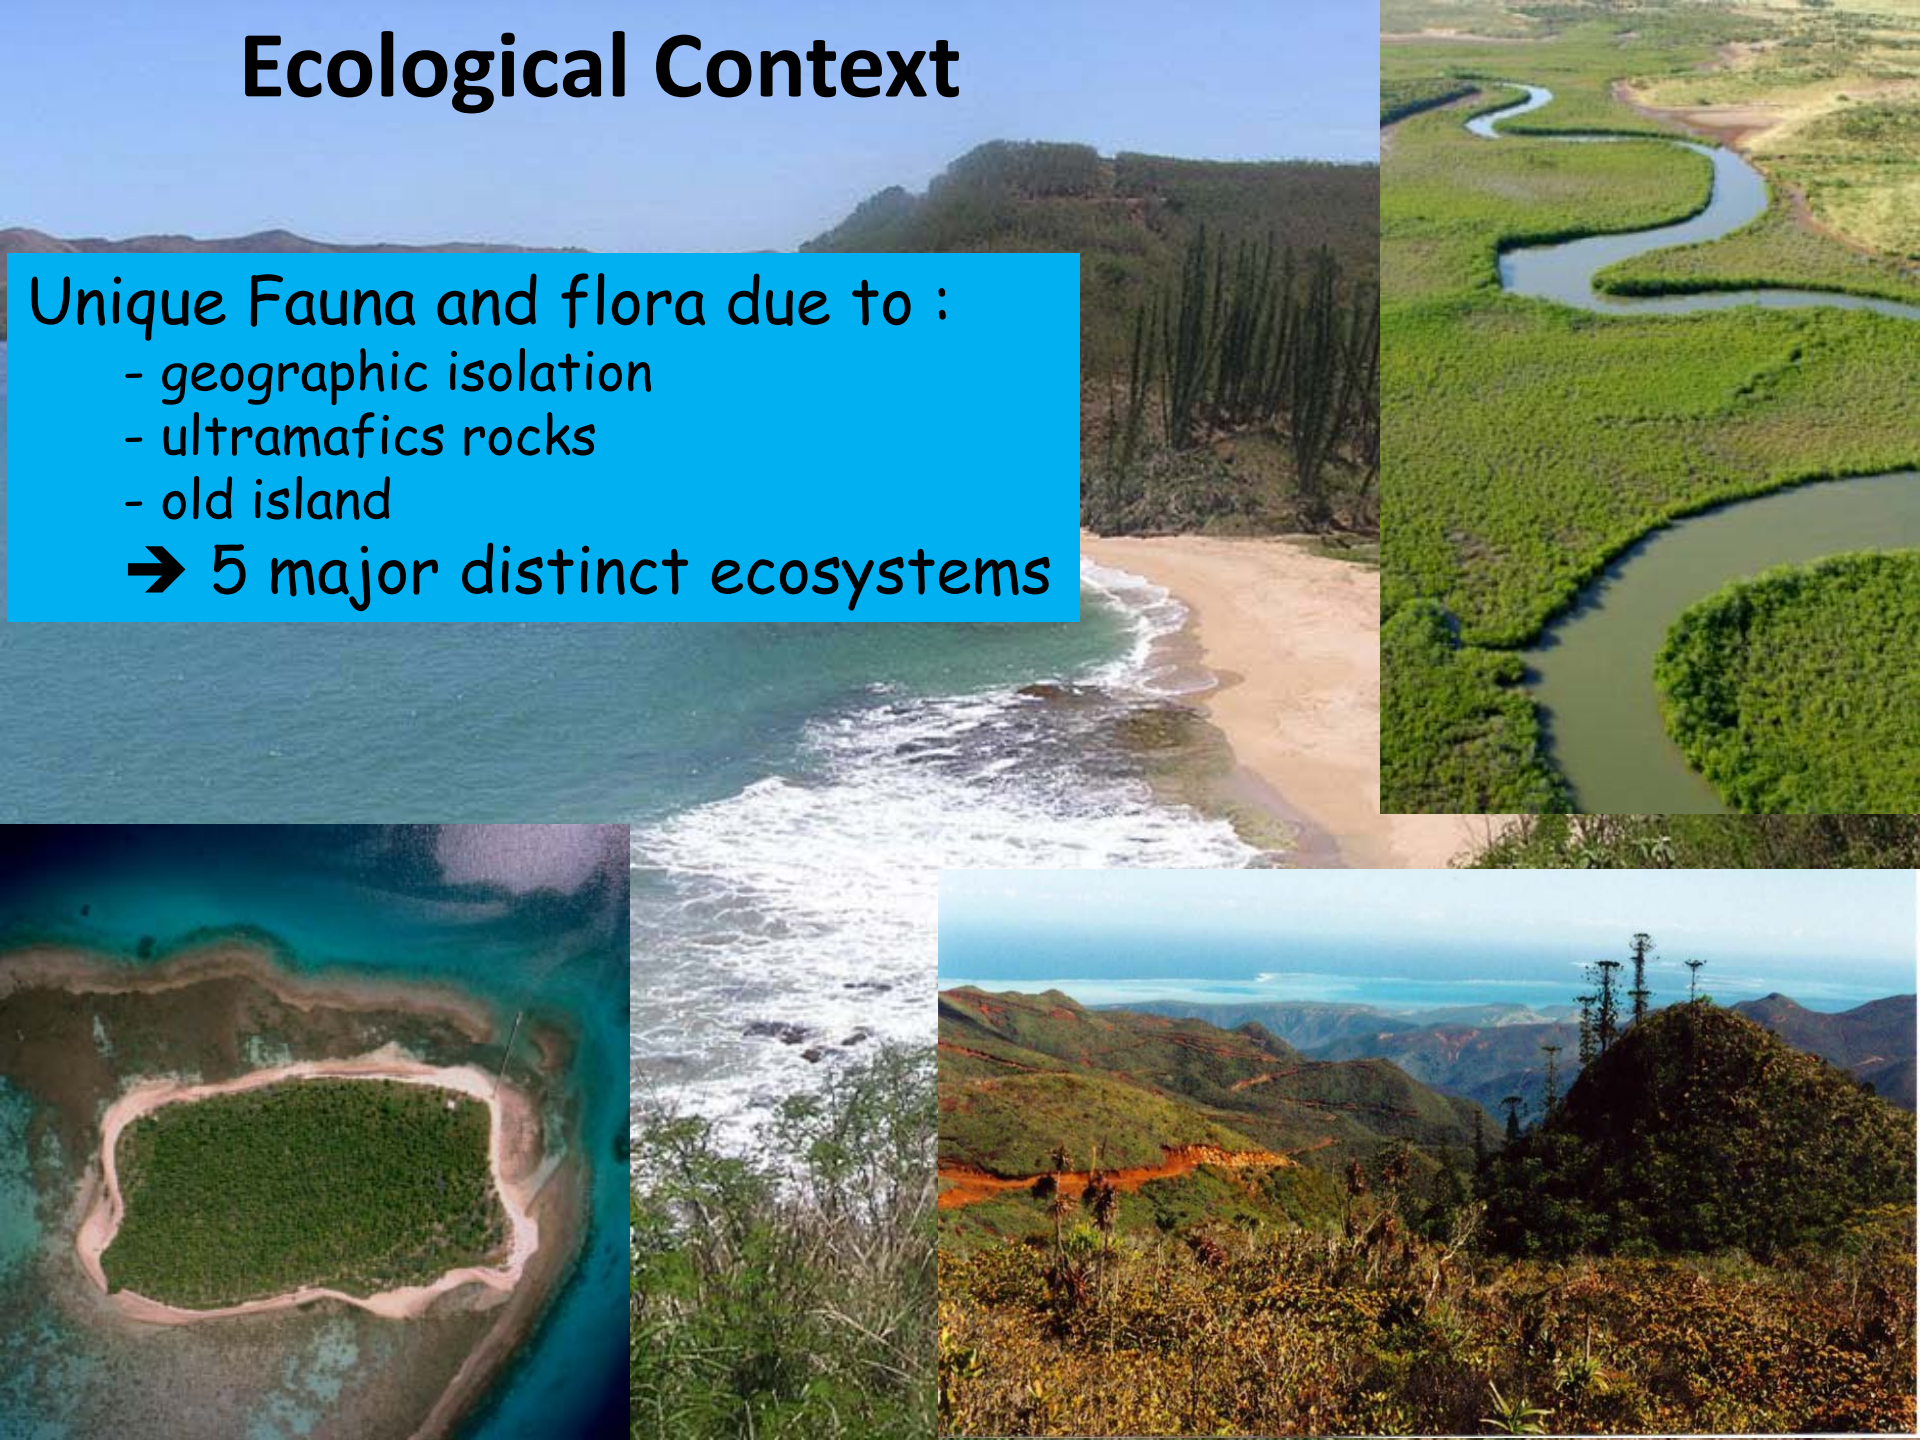

Ecological Context

Unique Fauna and flora due to :

- geographic isolation
- ultramafics rocks
- old island

→ 5 major distinct ecosystems

- Hot spot of tropical diversity
- between 75 et 100 % of endemism

Environnement under pressure

Invasives species

Développement /urbanisation

Fires

Climate change

Mining

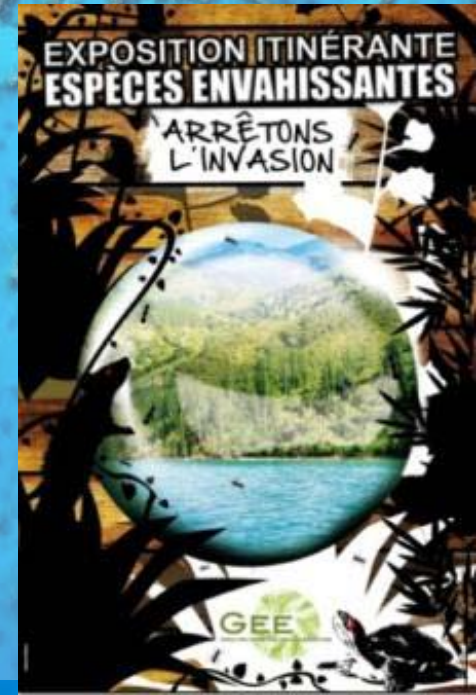

Exploitation

Biodiversity Strategy

1. Increase knowledges on biodiversity
 2. Maintain a good ecological quality of the Island by preventing and fighting threats
 3. Develop ambitious conservation programs:
 - ecosystem
 - species
 4. Find an economic value to biodiversity
- Andmake networks getting stronger

Thank you, Merci!
