

## Panel: Opportunities for biodiversity mainstreaming: The 2030 Agenda for Sustainable Development

# The 2030 Agenda for Sustainable Development and the SDGs

Dr. Roberto Dondisch  
Director General para Temas Globales

## 2030 Agenda for Sustainable Development

- Good example on how all countries will have to undertake integrated actions for sustainable development
- Comprises social, economic and environmental global priorities
- Interlinkages of goals is intended to achieve results across the whole set of them
- Mexico promoted the multidimensional measurement of poverty in order to combat its structural causes
- Results-oriented agenda requires policy coherence

## Biodiversity and the 2030 Agenda for Sustainable Development

- Mexico recognizes the **close interconnection** between social, economic and environmental aspects, and promotes the **mainstreaming of biodiversity** in core sectors, while remarking the urgency to take effective actions to stop the loss of biodiversity.
- **The 13th COP on CBD is an opportunity to enhance the transformative approach of the 2030 Agenda**, and the global governance for environment.
- US presented **amendments on targets 2.5 and 15.6**, related to access to genetic resources, **undermining the level of ambition of the Nagoya Protocol commitments**.
- Mexico delivered a statement in the name of 12 countries to **preserve the integrity and legitimacy of the SDGs** and **preserve the Aichi Biodiversity** targets.
- The full application of goals and targets on biodiversity relies on the **revitalized Global Partnership** to **mobilize all available resources**. The Addis Ababa Action Agenda will have an important role to this aim.
