Comments on national situation
<p>We need sustainable technical support to manage the national CHM. In the framework of biodiversity protection program under the GIZ we compiled a few months ago some information about biodiversity and presented it to GIZ for creating the demo version of a separate CHM. But I do not know how we will manage it in future.</p> <p>But the ministry has an official website. It will be useful to create a CHM within the ministry's web site and not as a separate web site.</p>

Strategic Vision
<p>To creating national CHM is one of the activities in updating NBSAP in Azerbaijan, we are waiting for improvement of NBSAP by Government. In the end of the year I hope the full detailed CHM website will be ready for the users.</p>
