

Some Restoration Projects in Iran

Iran is composed of a central plateau rimmed by mountain ranges mainly the Alborz and Zagros Mountains

The character of the land is one of steppes and desert

**All of Restoration Projects in Iran
is mainly supported by two
organizations :**

➤ Environment Department

**➤ Forest & Rangeland
Organization**

The current Restoration Programs

The Uremia Lake restoration
Project

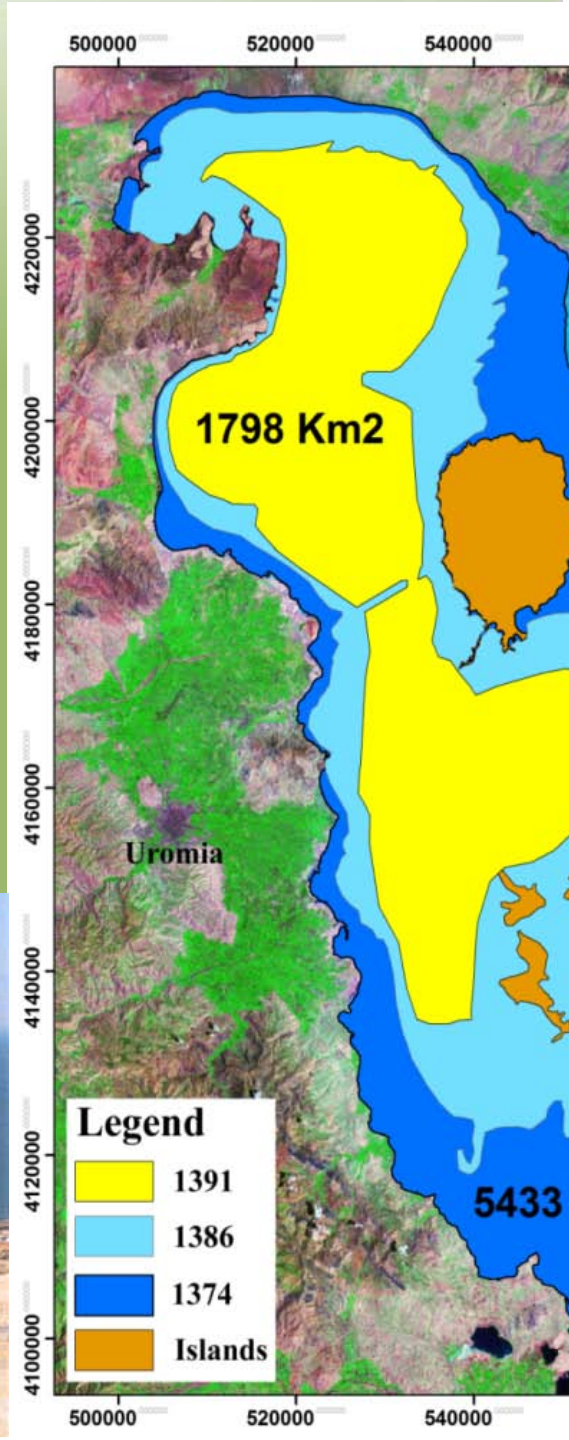

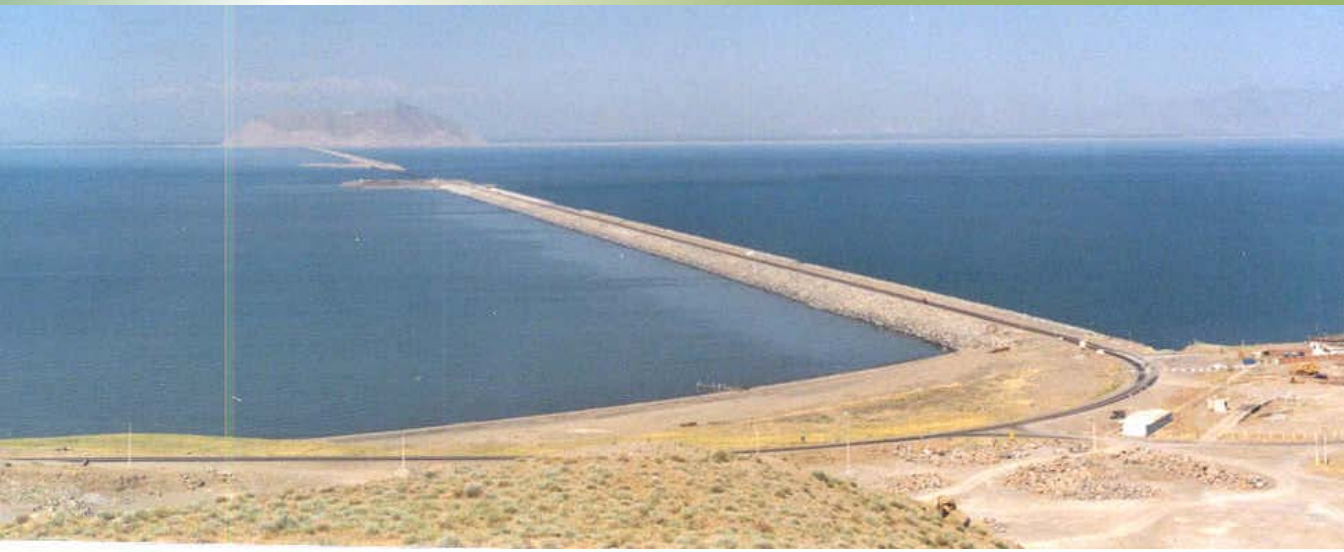

Zagros woodland restoration
Project

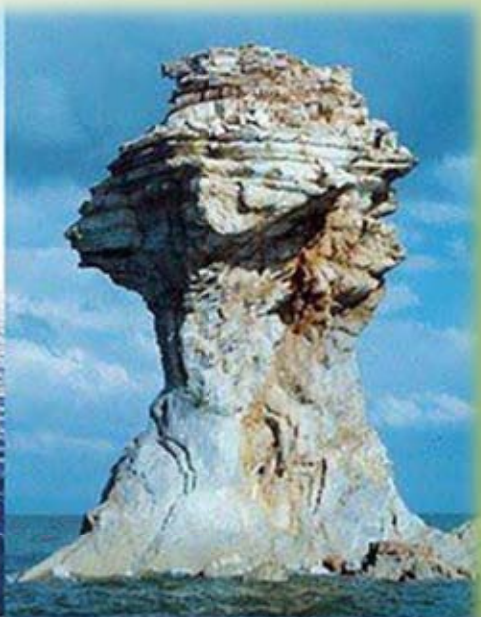

The Cheetah habitat
restoration activities

Desertification Project
(Forest & Rangeland Organization)

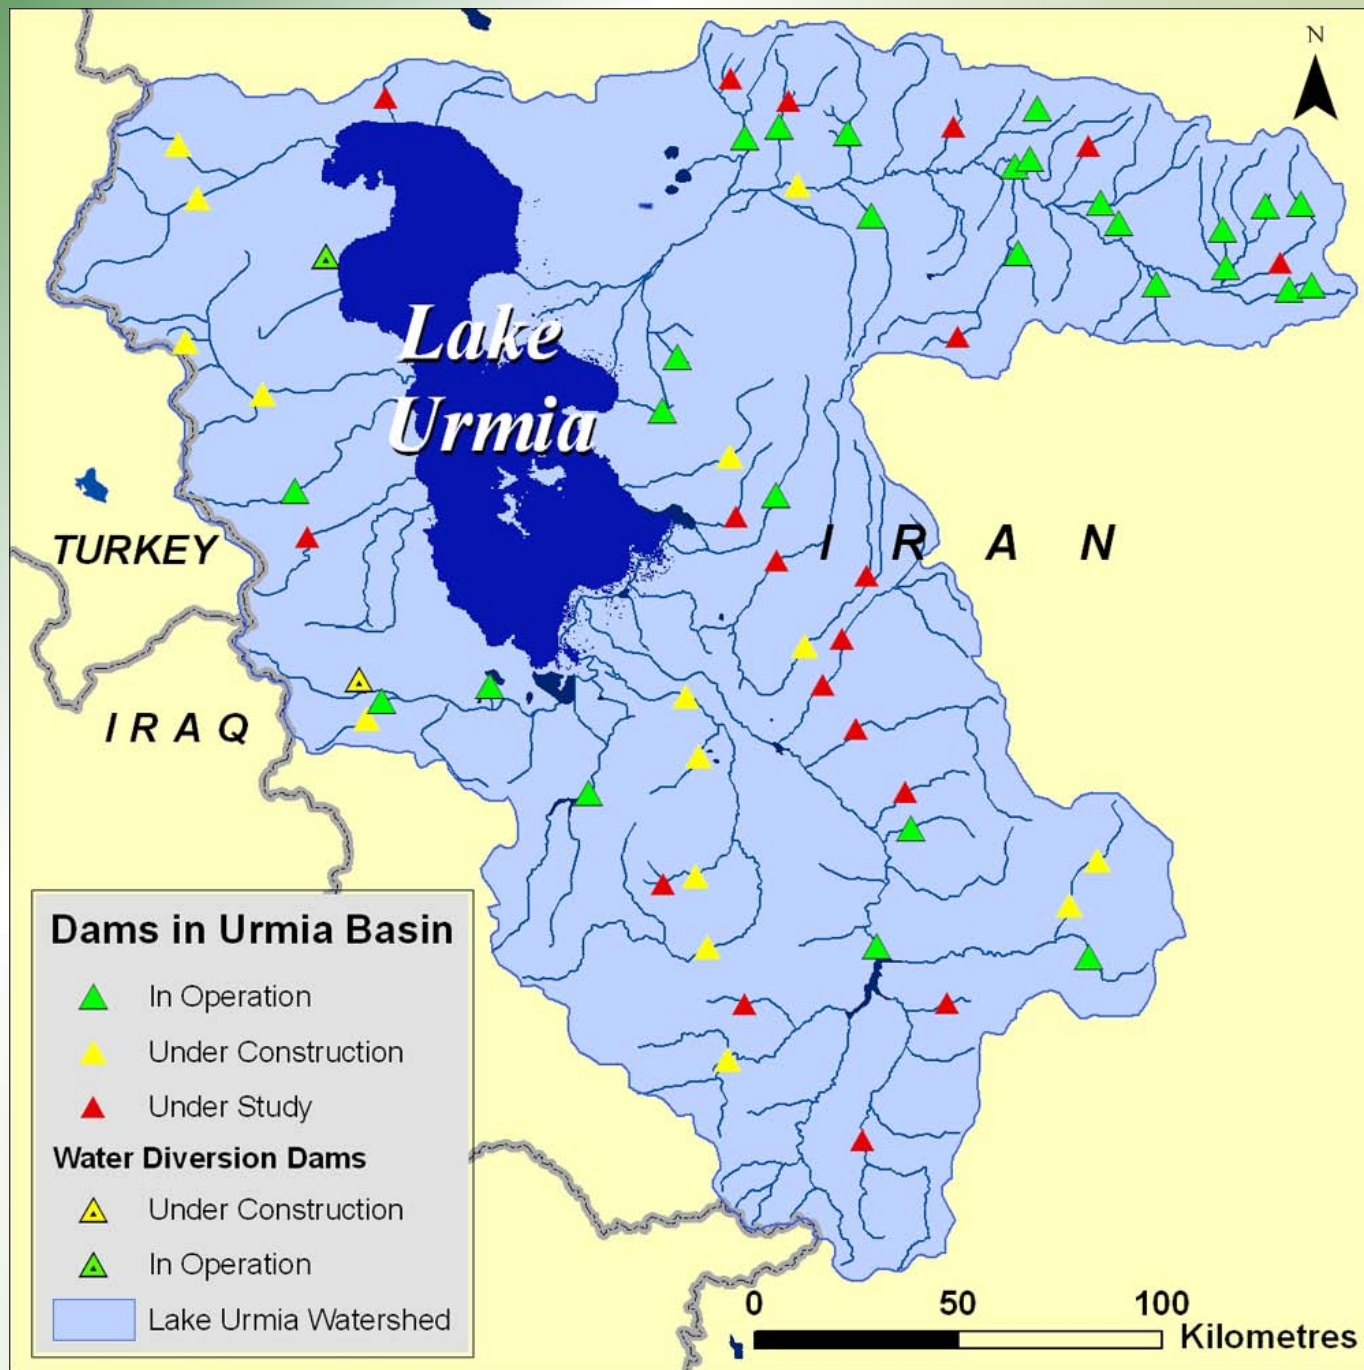

Unsustainable
Development
puts the lake at risk

- **More water abstraction from rivers and ground water resources;**
- **Expansion of agricultural lands;
Use of traditional irrigation systems;**
- **Existing of unauthorized irrigation wells;**

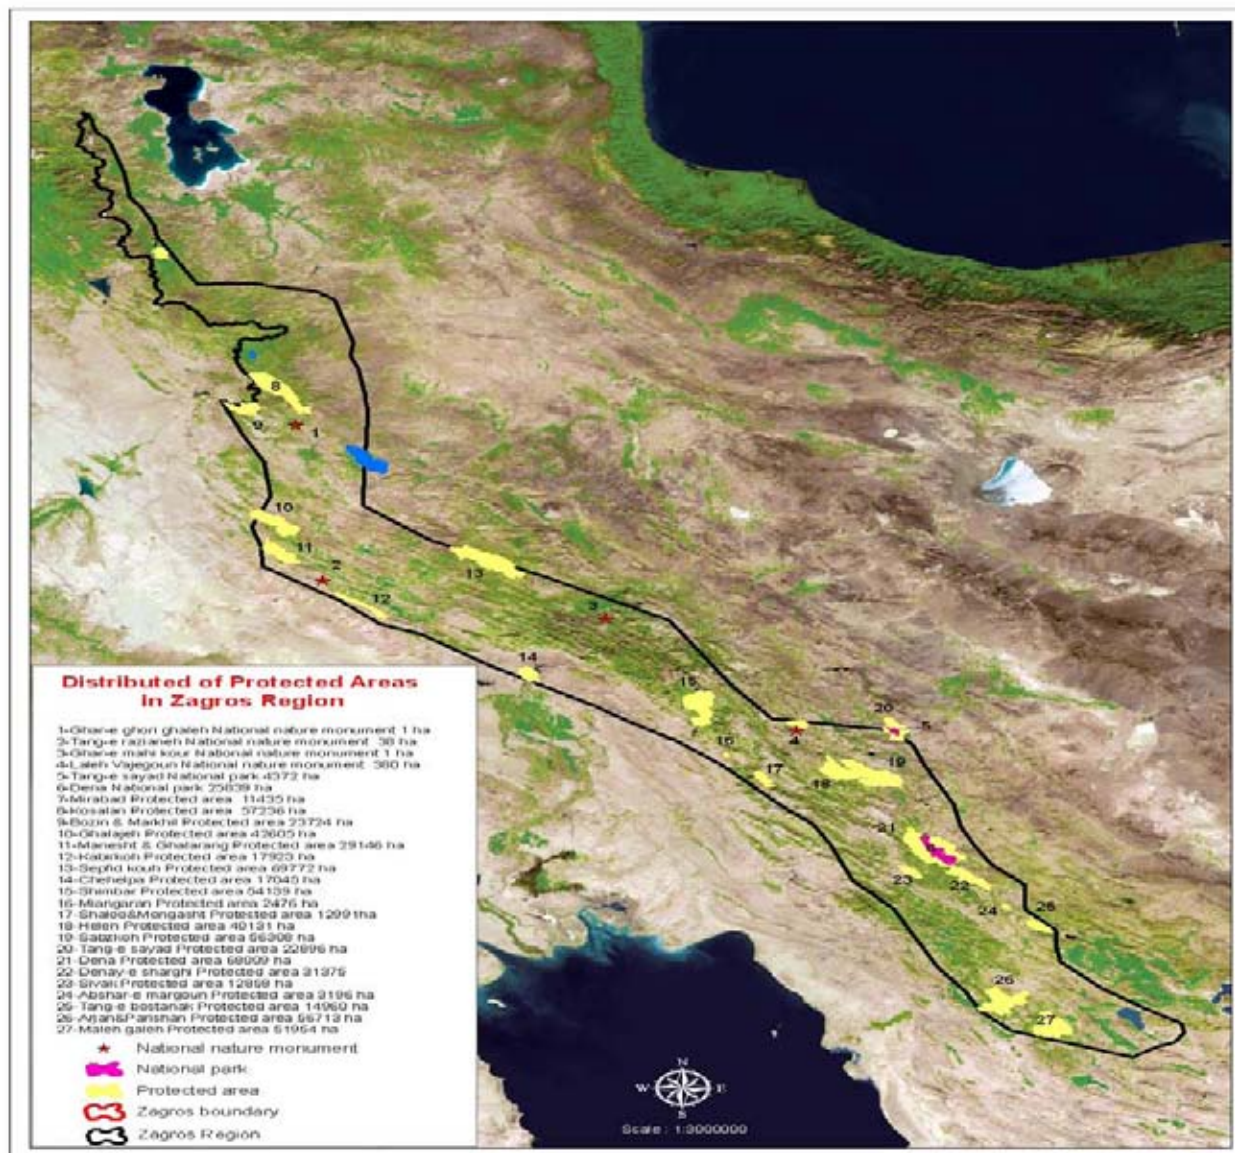

7

There are 27 protected area in the Zagros region

The Zagros Mountains Project
purpose is to facilitate the
design, establishment,
sustainable development and
integrated management of the
oak woodlands in west of Iran

- ☐ Changing the forest areas to agricultural and habitat lands
- ☐ Lack of fossil fuel supply in some areas
- ☐ Imbalance presence of domestic animal in the woods
- ☐ Road Constructions
- ☐ Mining

Threats

Public Education

Local community
participation

Management of domestic animal in the woodland

Implanting , proliferation and pest controlling of Trees

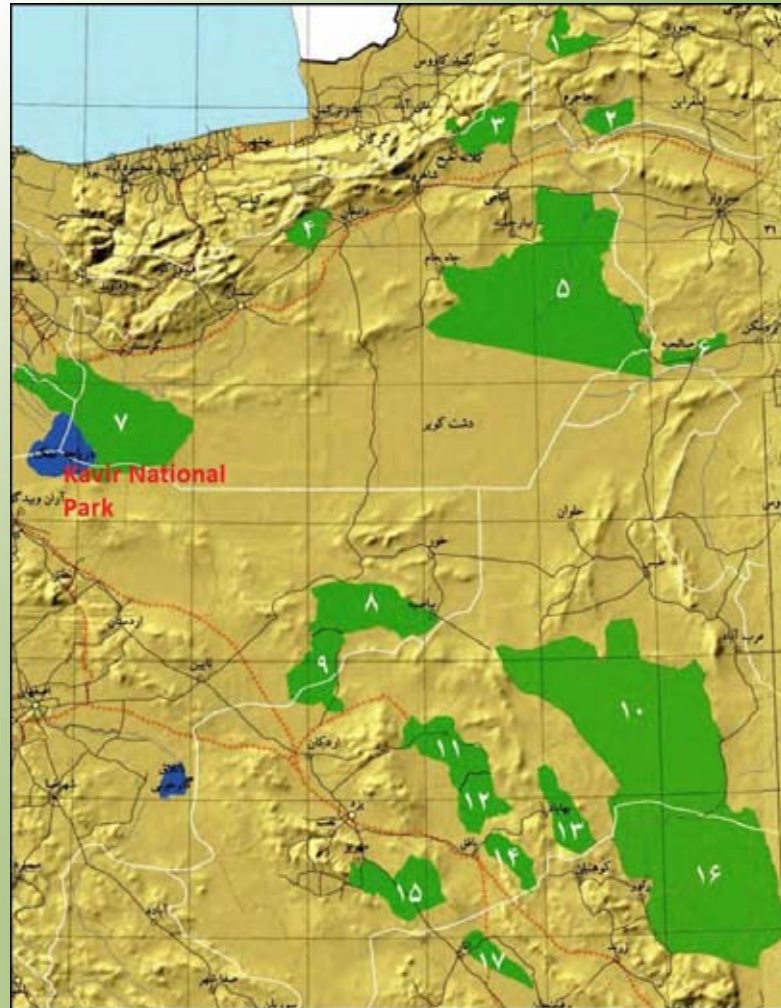

The Cheetah Conservation Project

- Their population is divided between at least ten protected habitats.
- These habitats are located in the region of the Kavir Desert in eastern Iran.

Living map of Asiatic Cheetah

Road construction is an important factor of habitat degradation

Increasing the number of protected area staffs

number of game guards present:

Kavir National Park – 16 Game Guards

Siahkouh National Park – 5 Game Guards

Turan National Park – 21 Game Guards

Miandasht Wildlife Refuge – 12 Game Guards

Dare Anjir Wildlife Refuge – 5 Game Guards

Abbas Abad Wildlife Refuge – 14 Game Guards
