Observation, Verification and Learning
Initiative for Brazil's Rural Environmental
Registry (CAR - Cadastro Ambiental Rural)
and Environmental Regularization Process

Conservation International

Mission

“Building upon a strong foundation of science, partnership and field demonstration, CI empowers societies to responsibly and sustainably care for nature, our global biodiversity, for the well-being of humanity”.

Background

- New Forest Code approved in 2012, after a long process of discussion;
- The Rural Environmental Registry (CAR) has become statutory - important tool for the implementation of the Code;
- Over 5 million rural properties will have to register in 2 years - big challenge;

CAR

- Electronic record that will contain georeferenced information about the property - including Permanent Protection Areas and Legal Reserves;
- Responsibility of implementation - states and municipalities
- Tool to:
 - monitor deforestation;
 - monitor environmental liabilities - restoration of deforested areas;
 - allow landscape conservation planning

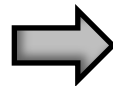

INOVACAR

Support strong implementation of CAR at the national and state levels

Establish the baseline for monitoring CAR implementation and environmental regularization in the Amazon

Promote transparency and stimulate social control of the CAR implementation process

Promote lessons learned exchanges among states, municipalities, the federal government, and NGOs

Goals of Inovacar

- Support the states in the implementation of CAR;
- Contribute to identify bottlenecks as well as lessons learned from the implementation of CAR;
- Promote improvements in environmental policy.

Indicadors

**INSTITUTIONAL
ASPECTS**

**GEOTECHNOLOGY/
SYSTEM**

**STRATEGIES FOR
ENROLLMENT**

**REQUIRED
INFORMATION**

Institutional Aspects

- Legal Framework
- Financing
- Human Resources
- Management of CAR
- Capacity Building
- Infrastructure
- Integration with other Public Policies

Geotecnologies / System

- Information System
- IT support
- Drawing Software
- Transparency and public access
- Satelite images
- Integration with thematic databases
- Validation of Registred properties
- Integration with environmental protocols

Strategy for Enrollment

- Social engagement
- Small farmers
- Traditional communities
- Priority Areas

Required Information

- Information insertion protocol
- Necessary documentation
- No. of Registries in the System

Realization
