

Restoration activities conducted by WWF-Vietnam

Activities of forest restoration

1	Community Forest Management (CFM)	1.500ha
2	New plantation with local trees	210ha
3	Natural regeneration	2.300ha
4	Contract with local communities for protection of forest	1.500ha

1- Community Forest Management

- Local communities are allocated protection forest for management
- Support: 9 USD/ha/year
- Length of time: 6 years
- Use this payment to compensate for members in forest protection
- Field check is made at every three months before the payment

II. New plantation with local trees (Hopea Odorata)

- (1) Land use planning;
- (2) Site survey;
- (3) Measurement land for plantation;
- (4) DPC issues decision on land allocation for households engaging in plantation

www.panda.org/greatermekong

Rate WWF support for households in plantation

- *From: 450 USD to 550 USD/ha (depend on land type)
- *Percent withdrawn by year:
 - First year 25%
 - Second year 15%
 - Third year 20%
 - Fourth year 20%
 - Fifth year 20%

III. Natural regeneration

- (1) Land use planning;
- (2) Site survey;
- (3) Measurement and action plan for natural regeneration
- (4) DPC issued a decision on land allocation for households engaging in natural regeneration

www.panda.org/greatermekong

Training on natural regeneration was organized

Marking young trees for purposes of natural regeneration

Rate WWF support for households in natural regeneration

- Rate: 250 USD/ha
- *Percent withdrawn:
- First year 25%
- Second year 15%
- Third year 20%
- Fourth year 20%
- Fifth year 20%

www.panda.org/greatermekong

IV. Contract with local communities for protection of forest

Training on forest patrolling and reporting was provided

www.panda.org/greatermekong

Physical check at every quarter before making payment

Experiences and lessons learnt

- Quite complicated procedures required by the donor applied for plantation and natural regeneration
- As requested by the donor, farmers engaging in plantation and natural regeneration must obtain red book (land use right certificates), this restricts some land areas for the activity
- Payment mechanism via bank account and other stipulations on withdrawing money actually discourage the participation of local people

Experiences and Lessons learnt

- Women play important roles in carrying out the activities
- Role of social organizations (farmer union, women union, etc)
- There are a number of projects working on forest restorations in the same areas, so the conflicts and competing on land among projects
- It is difficult to mobilize and persuade local people in planting local trees, they prefer planting acacia, rubber and others like rattan, etc.

Thank you!
