# Sustainable Use/ Conservation Mechanisms

1. “do nothing” to minimal economic activities
  - ❖ pihyew/sacred sites : ensures community gene pools of wildlife
  - ❖ Natural water springs and whole watershed
  - ❖ Water bodies
  - ❖ steep terrain
2. Active protection
  - ❖ rotational agricultural areas
  - ❖ irrigation canals, ricefields
  - ❖ homesites

Local Term	English Term	Local Terms	English
Manduwengan/ linneng	Hunting	Man-amag hi hebeng, etc	Fermentation/ Wine making
Man-alan makan	Food gathering	manlebek	processing
Mangalan Linnawan	Honey gathering	manpaut	woodcarving
Manpahtu	Raising ruminant	mentuping	stonewalling
Man-uma	Rotational agriculture	mangubel	Ricefield fishing
Pokal	Wet rice farming		
Man-amag hi hagid	broom making	Mangudingan,	River fishing
Laga	Bamboo weaving	Muyung	Agro-forestry
Abel	Cloth weaving	mangaldin	Vegetable prodn
Manpakan	Pig raising	Ladit	Blacksmithing
Manmegmeg	Poultry raising	Man---banga	Pottery

# Sustainable Use/ Conservation Mechanisms

# Palanguya Territorial Management is an Ecosystems Based Approach

# Conclusions

- Indigenous Peoples and Local Communities make significant contributions towards the achievement of the Strategic Plan for Biodiversity. Parties need to give due attention to Target 18 on promoting Traditional Knowledge and Customary Sustainable Use as a cross-cutting and enabling actions in national implementation.
- Community-based monitoring and information systems are essential to understanding the full values of biodiversity and for tracking progress in CBD implementation.
- Diverse local livelihoods and economies, embedded in ecosystems-based approaches must become centrepieces in the post-2015 development agenda, as a contribution to mainstreaming the Strategic Plan for Biodiversity and securing the human rights and well-being of indigenous peoples and local communities.
