Emerging Principles

Paying for Results

Lessons for Biodiversity Financing

Problem statement

Proposed approach

Enabling environment

- ❑ Ending poverty is not just for poor countries
 - Most of the poor live in middle-income countries and many live in high-income countries
- ❑ Generating sustainable growth is not just difficult for poor countries
 - Think about the Eurozone crises and turmoil in MENA
- ❑ Investing in development is not just for rich countries
 - Protracted crises are having an impact on traditional donors, reducing the availability of ODA

Lessons for Biodiversity Financing

Problem statement

Proposed approach

Enabling environment

- ❑ Adequately financing a post-2015 development framework depends on a global development cooperation that:
 - Attracts aid from diverse sources,
 - Emphasizes domestic resource mobilization, and
 - Capitalizes on the potential of the private sector.

Paying for Results

Lessons for Biodiversity Financing

Problem statement

Proposed approach

Enabling environment

❑ The success of this new global development cooperation requires:

- Good policies and the capacity to implement them, and
- Credible institutions to:
 - increase the impact of scarce resources, and
 - leverage additional resources from both domestic and foreign, public and private resources
