PPG7 (Pilot Program for Tropical Forests):

- ✓ Indigenous Land (29 million hectares).
- ✓ Extractivism Reserves (2.1 million hectares).
- ✓ Sustainable Forest Management (28,000 hectares).
- ✓ Ecological corridors (40 million hectares in the Amazon and 8.5 million hectares in Atlantic Forest).
- ✓ Macrozoning.
- ✓ Capacity building for civil society.
- ✓ Agroforestry

- High deforestation rates in the 90's and beginning of 2000's.
- Accelerated loss of forest cover in the Amazon.
- Plan for Prevention and Control of Deforestation in the Amazon (2004).

Plan for Prevention and Control of Deforestation in the Amazon – PPCDAm:

- ✓ Forest cover monitoring.
- ✓ Enforcement of the forest law.
- ✓ Land use planning and assignment of property rights.
- ✓ Promotion of sustainable use of forests.

ARPA (Amazon Protected Areas):

- ✓ To increase and consolidate the implementation of Protected Areas in the Amazon Forest.
- ✓ Three specific objectives:
 - (i) identify and create new strict protected areas;
 - (ii) effective establishment of these new areas; and
 - (iii) develop long-term sustainable management tools and mechanisms for effective protection within all Amazonian strict protected areas.

Milestones of Forest Policy

- Monitoring
- Enforcement
- Protected Areas and Territorial Planning
- Public Forests Law

- Dual monitoring:

PRODES (yearly) + DETER (fortnightly).

- Reliable data.

- Real time deforestation alerts.

Enforcement

- Integration of forest monitoring and inspection operations in permanent basis.
- Creation of the Environmental Monitoring Centre in the licensing and monitoring agency – IBAMA.

Protected Areas and Territorial Planning

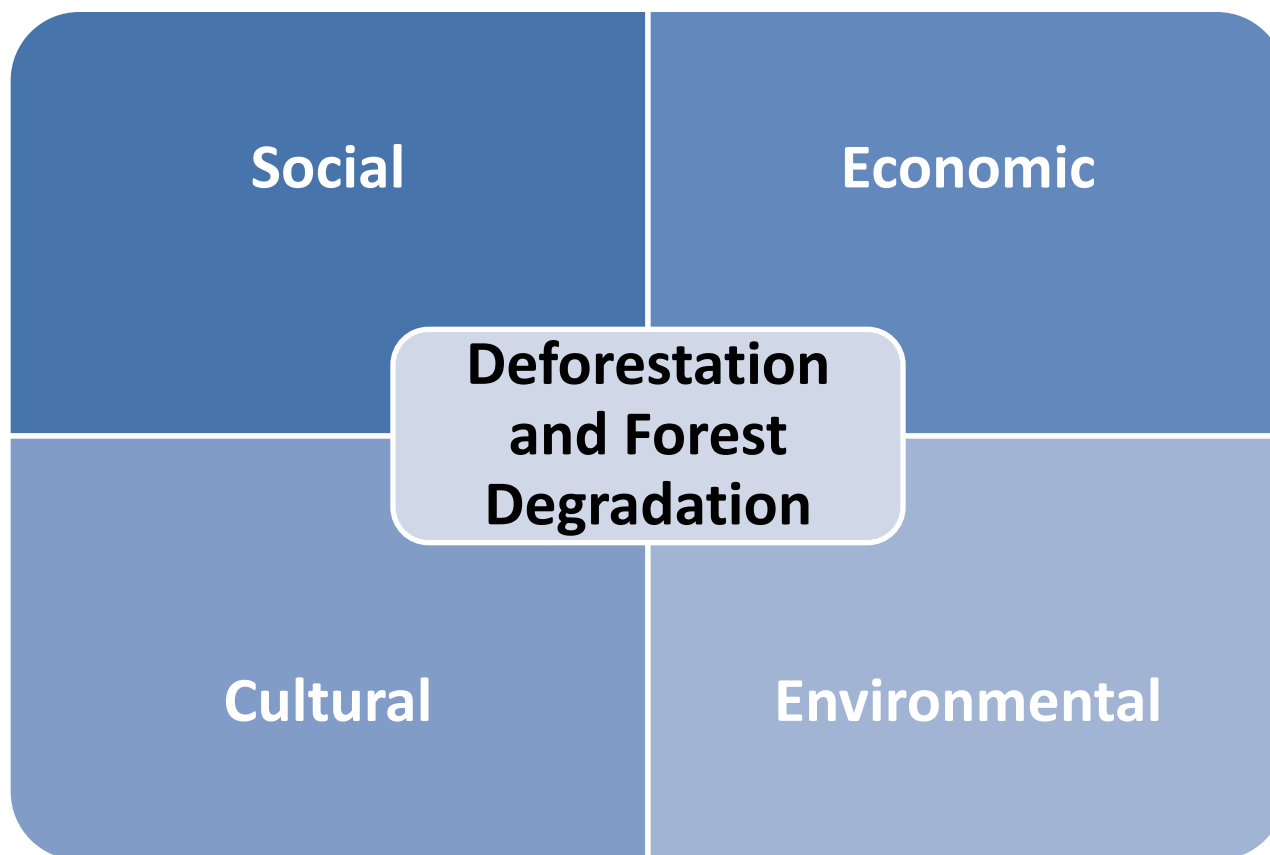

- National Registry of Rural Estate.
- Obligation of georeferenced data.
- Re-registration of properties over 100 hectares.
- Creation of new conservation units
(approximately 53 million hectares).

Public Forests Law

- All public land with forest cover in 2006 is a public forest.
- Public forests should remain public and forests.

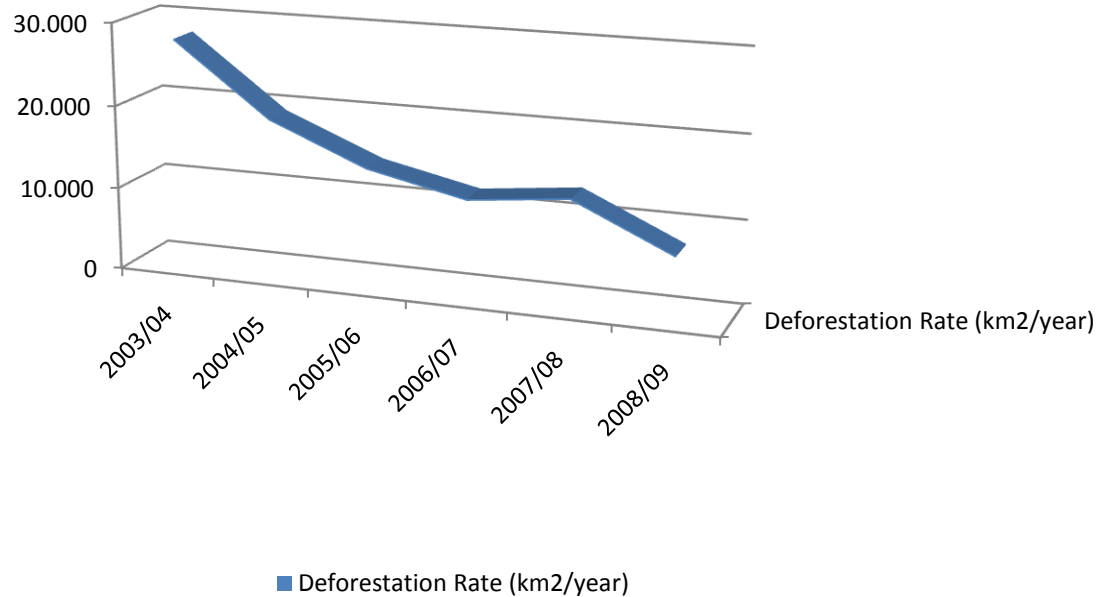

Public Forests Law

- National Forest Information System.
- National Registry of Public Forests.
- Promotion of sustainable forest management.
- Concessions for private sector.
- National Fund for Forestry Development.

Deforestation in Brazil

Deforestation Rate (km²/year)

Current Status of REDD+ in Brazil

- PPCDAM national and subnational.
- Sustainable Amazon Plan (2008)
- Amazon Fund (2008).
- 21 individual initiatives self-labeled as REDD+.
 - Lack of connection with UNFCCC negotiations.
 - Still prepared as CDM format

International Cooperation for REDD+

- Norway:

 - Amazon Fund (up to US\$1 billion until 2015)

- Germany:

 - Amazon Fund (pledge of EUR 18 million)
 - GTZ (technical cooperation for the Ministry of Environment and for the Amazon Fund) and DED (technical cooperation)
 - KFW (financial cooperation to better enforcement of forest law at the BR-163 District: EUR 42 million)

International Cooperation for REDD+

- UK:

- Amazon Fund (technical cooperation)
 - South-South Cooperation

- GEF:

- ARPA II (US\$ 16 million)

- National Forest Inventory (US\$ 9 million – in negotiation)

REDD+ is a long term strategy.

Build the National Regime of REDD+ (legal milestones in 2011/2012):

- REDD+ National Strategy
- Financial Framework
- Representativeness
- Rights and Responsibilities of REDD+ stakeholders

Launch the National Webplatform for REDD+ (October 2010).

THANK YOU!
