The MDG / 2010 target poster background

A cooperation
with the UNDP-Equator- Initiative
and
the SCBD

gtz | Programme Implementing
the Biodiversity Convention

Bundesministerium für
wirtschaftliche Zusammenarbeit
und Entwicklung

1. EI Board Meeting (04/05)

- Run up to the Millennium Review Summit:
2 concerns:
 - community projects for MDG achievement not adequately recognized
 - no further commitment for MDG 7
- Discussion of the „Community Commons“

- c) A listing of the eight Millennium Goals, to which in turn the flags are linked, thus showing at a glance which goals are fostered by the project

What did we achieve?

[illegible]

In 2010, the HPA/WHO programme began to produce R&D forecasts for vaccine production of 100,000 tonnes of all and multiple dose products.

Source: *Author's calculations* based on data from the *Survey of Consumer Expenditures*, 1990-1999.

These authors also discuss the historical, political and institutional context. They say that a combination of the authors' location in different sectors, universities and countries, and their educational and professional training, led to a good understanding of the issues and enabled them to conduct a fair game, but also acknowledges the inevitable political and moral bias and bias.

d) Good governance as an additional criteria to the list of MDGs

2. Community Commons

gtz

06/2005: ca. 150 participants from 44 countries in NY,
among them 9 reps from GTZ supported projects

Global Exchange Forum for:

- Resource use & Biodiversity conservation
- HIV/AIDS
- Food security
- Crisis management and prevention

Local-Global-Leaders Dialogue

- Communities discussing with reps from WB, UNDP, donors

gtz

2. Community Commons

- Learning from Community „best practices“
- Positioning of Communities:
„MDGs for us / we for MDGs“
- Communities present their own MDG-Poster
- Elaboration of the Community Declaration as an input to the Civil Society Hearings for the MDG Review Summit

3. MDG – Review Summit (09/2005)

High-level support from politics, science and society for the environment – poverty linkage

Messages PEP event:

- Poverty alleviation without an healthy environment is impossible
- Significance of community initiatives for achieving the MDGs

3. MDG – Review Summit

gtz

High-Level Policy Dialoge

Thematic discussion fora

- Investments in the environment
- Future priorities for poverty alleviation
- Implications for the time after the „World Summit“

Heads of States Dinner

„high visibility“ promotion event

- „Announcements“
- Declarations
- Public Support

Benson:
MDG &
Communities

Maluleke:
Role of
Communities

4. COP 8 Curitiba, Brazil (03/06)

gtz

**Biodiversity
Mega Conference:
> than 4000 participants**

Joint events:

- Theme day on Access & Benefit Sharing
- IUCN Global Biodiversity Forum
- UNITAR SUMMIT

gtz

4. COP 8 Curitiba, Brazil

MDG related events:

MDG-Day at Taba: Implementing the CBD – achieving the MDGs

Introducing the MDG- Poster tool kit

Launching MDG-Poster Book 1st edition !

5. CEPA - IAC meeting Montreal (12/06)

gtz

- Presentation of the MDG poster tool as a means of communication and mainstreaming
- Integration into CEPA toolkit of CBD
- idea: adapting poster reference frame towards CBD based on
 - 2010 target
 - 11 goals under the target
- Giving a NBSAP mainstreaming tool at hand

6. 2010 Poster goes COP

- 1/2007 – 5 / 2007: Development of electronic toolkit for online – elaboration of 2010 poster
- 7/2007: Presentation of set of about 20 posters from 14 countries at WG RI-2 (Paris)
- 8/2007 – 12/2007: Development of CD (offline)
- 01-02 / 2008: Presentation / Utilization of 2010 poster toolkit at CB WS (Singapore, RSA)
- 02 / 2008: promotion at WG PA 2 / SBSSTA
- 05 / 2008 : (comprehensive) poster exhibit at COP 9 , Bonn

2010 Biodiversity Target

- 1 Promote conservation of ecosystems & habitats
- 2 Promote the conservation of species
- 3 Promote the conservation of genetic diversity
- 4 Promote sustainable use and conservation
- 5 Reduce pressures from land-use change
- 6 Control threats from invasive alien species
- 7 Address challenges from climate change and pollution
- 8 Maintain capacity of ecosystems to provide services
- 9 Maintain cultural diversity of indigenous & local communities
- 10 Ensure fair & equitable benefit sharing from genetic resources
- 11 Ensure protection of adequate resources

NAMIBIA NBSAP ...to protect ecosystems, biological diversity and ecological processes

Namibia's NBSAP was prepared for over five years. Preparation was a truly intersectoral multi-disciplinary effort involving more than 150 participants representing over 40 organisations. This effort was coordinated by National Biodiversity Task Force and twenty one (21) thematic working groups were developed.

National Strategies:

(1) Conservation of biodiversity (2) Sustainable use of natural resources (3) Monitoring, predicting and coping with environmental change and threats (4) Sustainable land management (5) Sustainable well and management (6) Sustainable coastal and marine ecosystem management (7) Integrated planning for biodiversity conservation and sustainable development (8) Strengthening Namibia's role in the larger world community.

What did we achieve?

1. POLICY AND STRATEGY DEVELOPMENT TO SUPPORT BIODIVERSITY USE AND MANAGEMENT. Namibia developed innovative policies, legislation and strategies to address development issues that are still a huge challenge worldwide. Top decision-makers need to realise the urgency for addressing environmental issues.

2. MONITORING AND EVALUATION TO TRACK BIODIVERSITY STATUS. Namibia has an excellent and expansive set of inventory data on Namibian biodiversity. However, it is important to note that monitoring is an ongoing activity and the programme enhanced the efforts through multi-disciplinary research.

3. AGENDA SETTING, AWARENESS CREATION AND ACCESS TO BIODIVERSITY INFORMATION. Namibian Biodiversity Task Force formed a think tank and learning platform for exchange and brokering of ideas and concepts in this field and contributed to the cutting edge involvement of Namibia, in issues such as ABS.

4. INSTITUTION BUILDING AND CO-OPERATION - CAPACITY DEVELOPMENT - MAINSTREAMING INTO OTHER SECTORS. National Biodiversity Programme has undertaken in-depth work on capacity development, mainstreaming important biodiversity matters into sectors other than 'traditional biodiversity' sector in Namibia.

5. PROMOTION OF SUSTAINABLE USE AND MANAGEMENT OF NATURAL RESOURCES. Various working groups of NBSAP are dedicated to improving knowledge base, management tools and management capacities to find a good balance of use biodiversity and its long-term conservation.

6. PROTECTION AND REHABILITATION OF PRIORITY BIODIVERSITY AREAS. Through the Biodiversity Task Force, professionals more concerned with wildlife and parks management and more traditional issues revolving around that field have been inspired to look into new biodiversity concepts.

7. LEVERAGE FOR GETTING INTERNATIONAL SUPPORT. As a developing country, Namibia competes with other nations for relatively limited co-operation funds.

2010 Biodiversity Target

"Biodiversity is essential for maintaining production systems such as agriculture, livestock ranching, sea fisheries, and for providing us with healthy environments such as clean water and air. Biodiversity is valuable to all of us."

HON. WILLEM KONJORE, MP, MINISTER OF ENVIRONMENT AND TOURISM.
