Global-national linkages

Developing capacity and national-level involvement in the BIP process

Philip Bubb and Val Kapos

philip.bubb@unep-wcmc.org

www.twentyten.net

2010 BIP development objective:
a reduction in the rate of biodiversity loss at the global level, through **improved decisions** for the conservation of global biodiversity.

2010 BIP immediate objective:
that decisions made by governments and other stakeholders are **better informed** to improve the conservation status of species, habitats, and ecosystems at the global level.

The project has three key outcomes:

(1)   A 2010 Biodiversity Indicators Partnership generating information useful to decision-makers;

(2)   Improved global indicators are implemented and available;

(3)   National governments and regional organizations using and contributing to the improved delivery of global indicators.

Global-National Outputs - 1

The development of <u>guidelines</u> and other tools to facilitate:

(i) the <u>use of</u> global 2010 indicator <u>methodologies</u> at national and regional levels,

(ii) the <u>use of</u> global 2010 <u>indicators</u> in national and regional-level policy and decision-making.

(iii) increased local, national, and regional <u>data</u> and other <u>contributions</u> to the development of global 2010 indicators,

Global-National Outputs – 2

Regional capacity building <u>workshops</u> on the use of biodiversity indicators, including:

• Latin America & Caribbean - 2008

• Asia - 2009

also, southern & eastern Africa proposal for 2008/9

workshop during CBD SBSTTA XIII, 16 February 2008, sharing experiences in development of national/regional targets & indicators.

Context, opportunities & linkages

CBD Parties updating NBSAPs etc.

4th National Reports to the CBD, March 2009 – includes analysis of progress towards the 2010 Biodiversity Target.

GEF Project – "*Support to GEF Eligible CBD Parties for carrying out 2010 Biodiversity Targets National Assessments*"
- UNDP & UNEP. 90 countries. $20,000 each
- Supports 4th National Reports to CBD, national consultations
- Guidance materials & website

- Countdown 2010
- SEBI 2010
- Other MEA indicators development
- MDGs and UN Statistical Division & UNDP capacity building
- National and regional statistical agencies and initiatives

Development of the Indicator Guidelines:

- Initial versions in first half of 2008 on the 2010 BIP website (www.twentyten.net)

- Updated versions for publication at end of 2009

- Incorporating case studies and lessons learned

Indicator <u>Methodology</u> Guidelines

- **Indicator purpose, definition and status**

- **Contacts and collaborators**

- **Methodology and tools**

- **Data needs and sources**

- **Use at different scales, aggregation, interpretation of change**

- **Forms of presentation**

- **Accuracy and limits to usefulness**

- **Technical capacity requirements**

- **Examples & stories**

Indicator <u>Use</u> Guidelines

One document

Overview of the CBD Framework of Targets and Indicators and its application at national and regional scales.

- Issues in developing and using biodiversity indicators

- Policy formulation, setting targets, national and international monitoring and reporting

- Sustainability and impact

- Examples & stories

- …………..

Enhancing use of local and national data in global indicators
   Guidelines

One document

- Identifying sources of data

- Interpreting data for multiple uses

- Mechanisms of data flow to global indicators

- Examples & stories

- …………..

Regional Capacity Building Workshops - issues for discussion

- Purpose and content of the workshops

- Audience / participants

- Linkages to other initiatives

- Host institutions
