PSR ASSESSMENT FRAMEWORK

Conceptual framework for biodiversity conservation showing the link between the loss of biodiversity, the direct and indirect causes of biodiversity loss and how society responds to the loss of biodiversity. (*Ong, 2004*).

4NR PROCESS

- Participatory
- Multi-stakeholder
 - Government
 - Civil society organizations
 - Academia and research institutions
 - Private sector

4NR INITIAL FINDINGS

- No target setting done focused on complying with the 2010 targets
- There are goals and targets in some macrolevel frameworks, projects, programs and activities that correspond to the 2010 biodiversity goals and targets

4NR INITIAL FINDINGS

- There are some indicators to measure progress
 - Criteria and Indicators System for Sustainable Forest Management
 - Biodiversity Indicators for National Use (BINU)-Coastal and Marine Ecosystems
 - Biodiversity Monitoring System (BMS), BIOME (Biodiversity Monitoring and Evaluation)
 - Philippine Environment Monitor
 - MTPDP (2004-2010) and ENR Major Final Outputs
 - Others?

4NR INITIAL FINDINGS

- Limited baseline information
- Lack of systematic monitoring and reporting system

CHALLENGES

- Collection of data there are numerous efforts but data mostly fragmented, unorganized or unpublished
- ☐ Time constraints
