

# The 2nd National Biodiversity Strategy and Action Plan: An Assessment

# GOAL for 2008 – 2018

**“Conservation and sustainable practices for use of biological diversity in Saint Lucia are effectively integrated into national development at all levels”.**

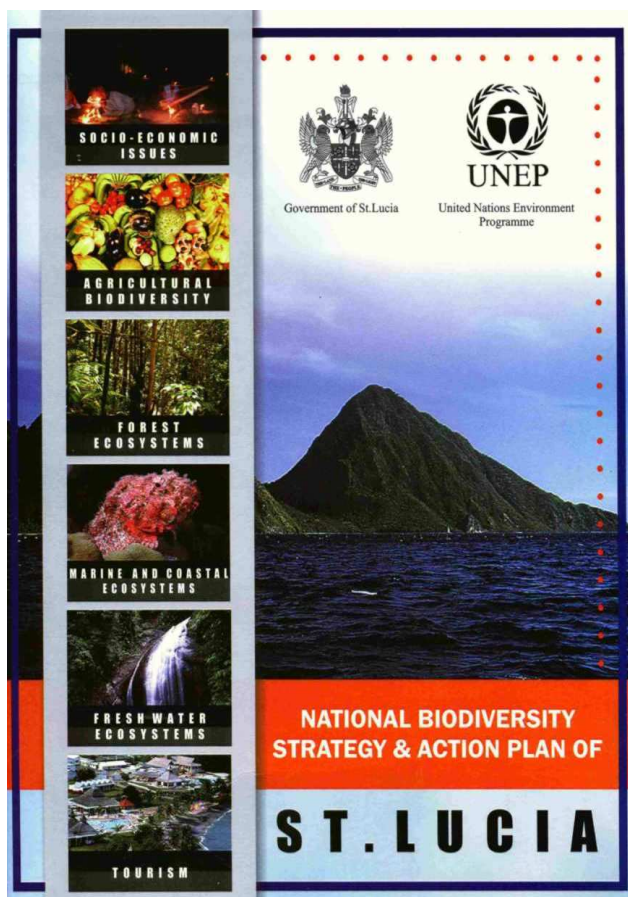

# Expected outcomes

- Mainstreaming biodiversity objectives in national development planning agenda
- Community participation in biodiversity initiatives
- Enhanced institutional and enabling framework for biodiversity management
- Effective M,E&R developed and implemented

# Effective M&E of NBSAP

- Establishment of biodiversity coordinating mechanism
- Outputs are realistic
- Compliance with guidelines and procedures for effective management of biodiversity components
- Adequate human and financial resources

# Findings (cont.)

- NBSAP quite comprehensive
- NBSAP adaptive, iterative and cyclical – *NBSAP reviewed, expanded as conditions evolve.*

## Slide 5

**LL1**

Have moved info from this slide to Way forward Slides

Luvette Louisy, 8/6/2013

## Findings (cont.)

- Some deficiencies in the design of NBSAP
- Quantitative targets, indicators and monitoring mechanisms are lacking from the NBSAP
  - Complicates monitoring of implementation
  - indicates a lower level of commitment to implementation.
- Coordination is still only at technical level

# NBSAP Revision Process

- Review of the existing NBSAP, helping to identify gaps
- Specifically focus on biodiversity and ecosystem services values
- Clear ***commitments*** to incorporate values at this stage, as well as an overview of ***which*** type of values, and ***how*** they will be incorporated
