

# Introduction to the CBD online reporting tool

Regional Workshop for Middle East and North Africa on the  
Preparation of the Fifth National Report  
14-17 December 2013, Doha, Qatar

**United Nations Decade on Biodiversity**

## Background to Online Reporting

- The need for monitoring implementation has been recognized in many decisions of the COP
- In decision VIII/14, the COP decided to establish a voluntary on-line facility to support national reporting as a planning tool
- In line with Article 18 the tool will facilitate technical cooperation among Parties by facilitating the sharing of information on the design and application of indicators and on policy support tools
- The online reporting tool is a complement to national reporting not a replacement for it and builds on it.
- The online reporting tool is part of the CHM

# Functionality of the online reporting tool

The online reporting tool will allow Parties to:

- Provide updates on progress towards each of their national targets and the Aichi Biodiversity Targets on an ongoing basis
- Directly submit their national biodiversity strategies and action plans and their national reports, as well other relevant documents.
- More easily identify those areas where progress is being made and those areas where more efforts may be needed

## Functionality of the online reporting tool

The Online reporting tool will capture information related to:

- Regional, national and subnational targets
- Indicators
- Policy support tools
- Activities.

Allows Parties to link this information to relevant Aichi Biodiversity Targets

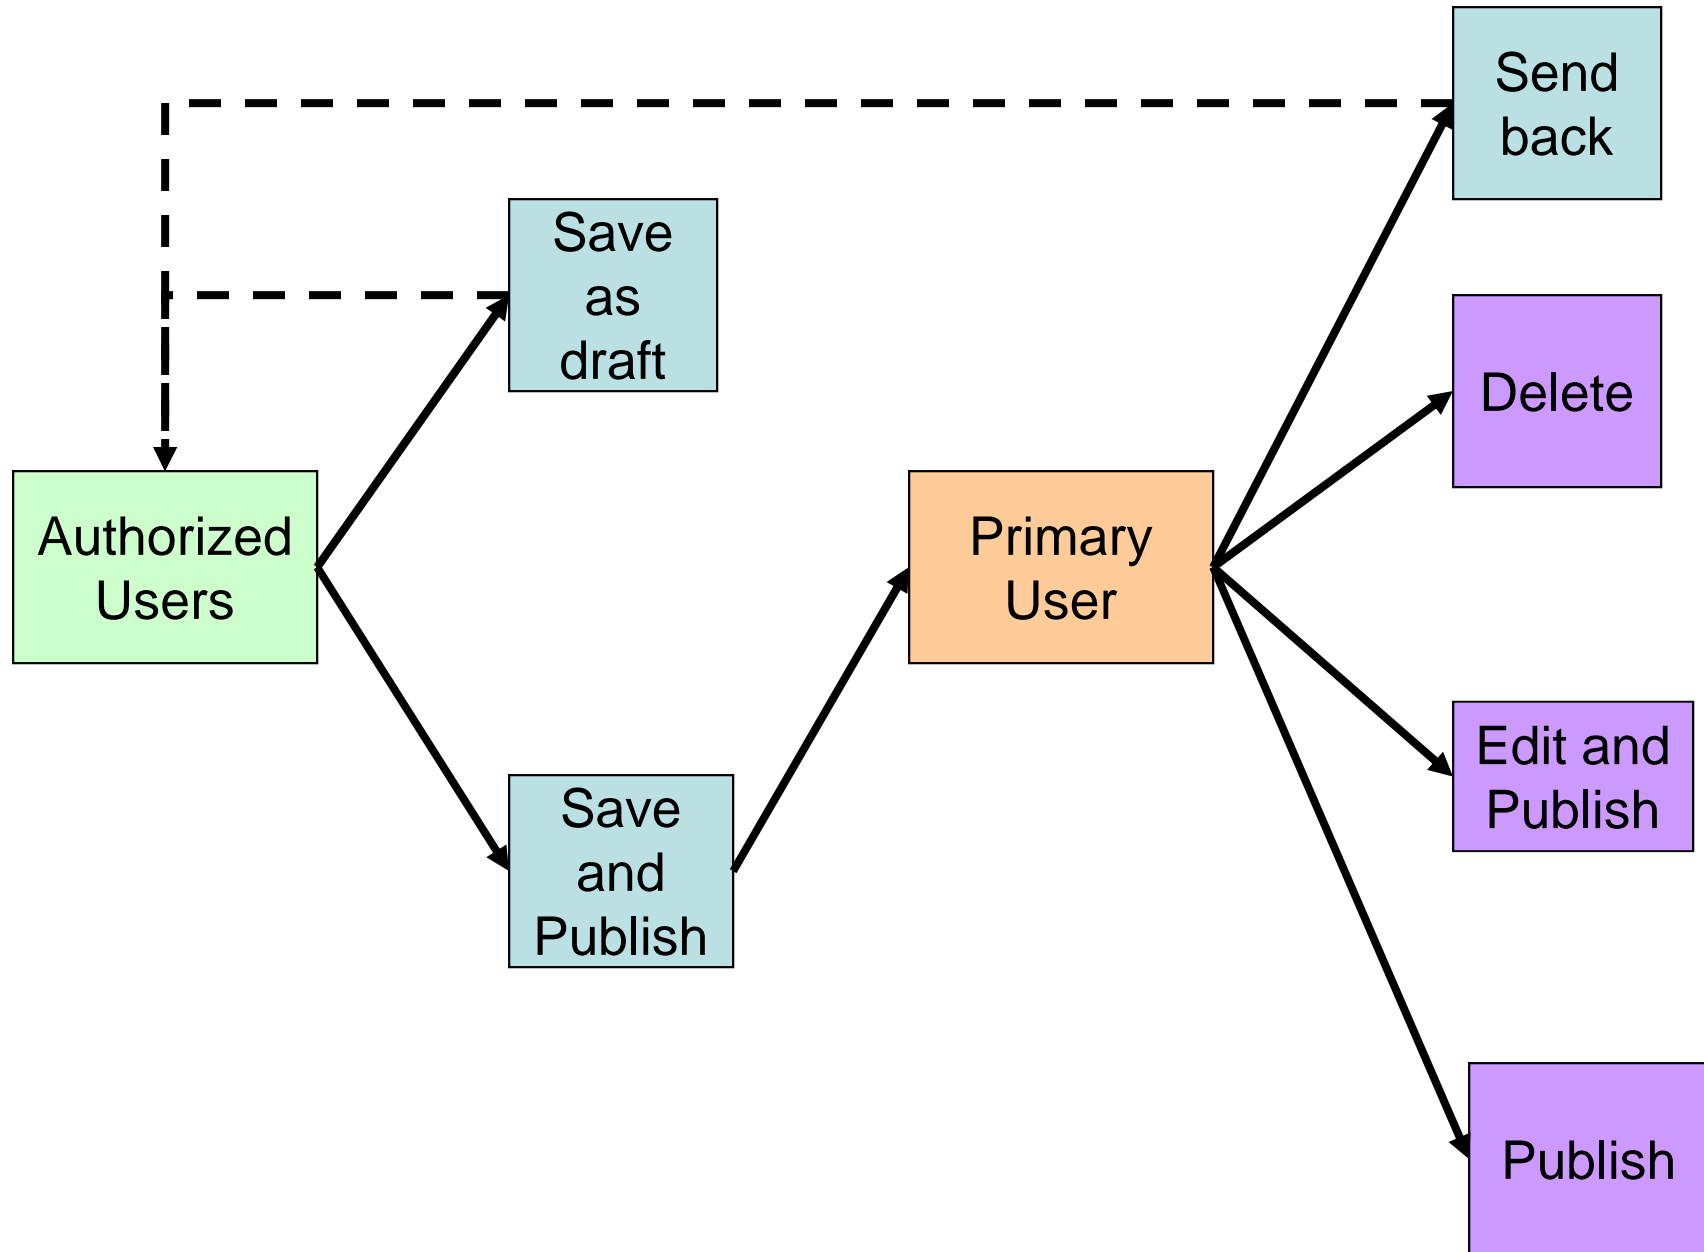

Information entered can be viewed organized by national target or by the Aichi Biodiversity Targets.

The tool will help to identify indicator development needs, areas where more information is needed or is in need of being updated

## Functionality of the online reporting tool

- The online reporting tool will allow one main user to validate and publish all information.
- The main user may designate as many other authorized users as she/he wishes. These users may enter information and prepare drafts but will not be able to publish information.
- Information that is entered can be edited at any time
- Search functions and information displays are under development
- Further information can be found in annex I of UNEP/CBD/SBSTTA/17/INF/12

# Functionality of the online reporting tool

Warning! Information displayed is for demonstration purposes only and does not reflect CHM records.

### National Records

The submission of records in this category is restricted to CHM National Focal Points (CHM-NFPs) and National Authorized Users (NAUs). All records submitted by NAUs will be forwarded to the CHM-NFP for review and validation prior to publication.

#### Select a Common Format:

- National Reporting**   
*National Reports, NSAPs, National Targets, National Indicators, Assessments of Progress, and Implementation Activities*
- Financial Resource Mobilisation**  
*Preliminary reporting framework for the implementation of the strategy for resource mobilization*

### Reference Records

Records in this category may be submitted by all registered users. These records will be subject to review and validation by the Secretariat prior to publication

#### Select a Common Format:

- Virtual Library - CHM Resources**
- Biodiversity-related Organizations**

### CBD Secretariat Records

The submission of records in this category is restricted to SCBD staff

#### Select a Common Format:

- Marine Ecologically or Biologically Significant Areas (EBSA)**
- Strategic Plan Global Indicators**
- Case Studies**
