NOTIFICATION

Selected Candidates for the Online Training Course on Rapid Identification of Invasive Alien Species for Achieving Aichi Biodiversity Target 9

Dear Madam/Sir,

In notification 2016-025, dated 26 February 2016, the Secretariat of the Convention on Biological Diversity invited Parties to nominate candidates to participate in a training course on the application of DNA barcoding in detection and monitoring of priority invasive alien species, pests and zoonotic disease vectors. The notification is accessible at: <https://www.cbd.int/doc/notifications/2016/ntf-2016-025-gti-en.doc>.

In this regard, I am pleased to announce that the selection of the candidates for the online course on DNA barcoding methodological approaches and technologies has been completed. The selection process was done in consultation with the GTI Coordination Mechanism and was carried out taking into account regional balance, gender equity, technical and relevant experience with national policy development on invasive alien species and its implementation, as well as the ability of trainees to work as trainers.

The list of selected candidates is attached in the annex to this notification. With the generous support from the Government of Japan, the Secretariat will provide financial assistance to cover the cost of the selected candidates from developing country Parties for participating in the online distance education course.

Please accept, Madam/Sir, the assurances of my highest consideration.

Braulio Ferreira de Souza Dias
Executive Secretary
