

# The List of Wetlands of International Importance

31 January 2005

The Ramsar List was established in response to Article 2.1 of the Convention on Wetlands (Ramsar, Iran, 1971), which reads:

*Each Contracting Party shall designate suitable wetlands within its territory for inclusion in a List of Wetlands of International Importance, hereinafter referred to as “the List” which is maintained by the bureau [secretariat of the Convention] established under Article 8.*

Wetlands included in the List acquire a new status at the national level and are recognized by the international community as being of significant value not only for the country, or the countries, in which they are located, but for humanity as a whole.

The Convention establishes that “*wetlands should be selected for the List on account of their international significance in terms of ecology, botany, zoology, limnology or hydrology.*” Over the years, the Conference of the Contracting Parties has adopted more specific criteria interpreting the Convention text, as well as an *Information Sheet on Ramsar Wetlands* and a *Classification system of wetland type*.

All issues pertaining to the Ramsar List were encapsulated in Resolution VII.11 adopted by the Conference of the Parties in May 1999 and entitled *Strategic Framework and guidelines for the future development of the List of Wetlands of International Importance*.<sup>1</sup>

Everything in the Strategic Framework is founded upon this “Vision for the Ramsar List”:

*To develop and maintain an international network of wetlands which are important for the conservation of global biological diversity and for sustaining human life through the ecological and hydrological functions they perform.*

The Convention’s goal is to achieve Ramsar listing for as many wetlands throughout the world as meet the criteria of international importance; in the short term, the objective is to have at least 2000 sites in the List by 2005, almost twice the current number. To bring this much of the world’s wetland resource under the umbrella of Ramsar status, the Convention urges all States to join the Convention, if they have not already done so, and to make significant efforts to implement the systematic approach for the development of the List in each country as adopted under the *Strategic Framework*.

Full data submitted by the Parties for each of their Ramsar sites are entered in the Ramsar Sites Database, which is maintained by Wetlands International under contract with the Convention. At present, the Center for International Earth Sciences Information Network (CIESIN), at Columbia University (USA), is developing a *Ramsar Wetland Data Gateway*, a multilevel, multidisciplinary, diverse resource base, including spatial, tabular and graphic data, all of which would be accessed through a common search interface.

The basic Ramsar List is also available, with one-paragraph descriptions of each site, as the *Annotated Ramsar List* in hard copy form and on the Convention’s Web site ([http://ramsar.org/profile\\_index.htm](http://ramsar.org/profile_index.htm)).

---

<sup>1</sup> The Strategic Framework is available in print form as Handbook No. 7 in the Wise Use Toolkit series and on the Ramsar Web site at [http://ramsar.org/key\\_guide\\_list\\_e.htm](http://ramsar.org/key_guide_list_e.htm).

## La Liste des zones humides d'importance internationale

La Liste de Ramsar a été établie conformément à l'article 2.1 de la Convention sur les zones humides (Ramsar, Iran, 1971) qui stipule:

***Chaque Partie contractante devra désigner les zones humides appropriées de son territoire à inclure dans la Liste des zones humides d'importance internationale, appelée ci-après, «la Liste», et qui est tenue par le Bureau institué en vertu de l'article 8.***

Les zones humides qui sont inscrites sur la Liste acquièrent un nouveau statut au niveau national et, aux yeux de la communauté internationale, prennent une importance non seulement pour le pays ou les pays où elles se trouvent mais aussi pour toute l'humanité.

La Convention précise: «*Le choix des zones humides à inscrire sur la Liste devrait être fondé sur leur importance internationale au point de vue écologique, botanique, zoologique, limnologique ou hydrologique*». Au fil des années, la Conférence des Parties contractantes a adopté des critères plus spécifiques pour interpréter le texte de la Convention, de même qu'une *Fiche descriptive des zones humides Ramsar* et un *Système de classification des types de zones humides*.

La Résolution VII.7, adoptée par la Conférence des Parties en mai 1999, et intitulée ***Cadre stratégique et lignes directrices pour orienter l'évolution de la Liste des zones humides d'importance internationale***<sup>2</sup> contient tout ce qui concerne la Liste de Ramsar.

Le Cadre stratégique repose intégralement sur cette «*Vision pour la Liste de Ramsar*»:

***Élaborer et maintenir un réseau international de zones humides importantes, en raison des fonctions écologiques et hydrologiques qu'elles remplissent, pour la conservation de la diversité biologique mondiale et la pérennité de la vie humaine.***

La Convention s'est donné pour objectif d'inscrire, sur la Liste de Ramsar, le plus grand nombre possible de zones humides qui, dans le monde entier, remplissent les critères d'importance internationale; à court terme, il s'agit d'avoir inscrit au moins 2000 sites avant 2005, soit près du double du nombre actuel. Pour réaliser cet objectif, la Convention invite instamment tous les États qui ne l'auraient pas encore fait à rejoindre ses rangs et à redoubler d'effort pour appliquer, dans chaque pays, l'approche systématique adoptée dans le contexte du *Cadre stratégique*.

Toutes les données fournies par les Parties sur chaque site Ramsar sont consignées dans la Banque de données Ramsar tenue par Wetlands International sous contrat de la Convention. Actuellement, le Center for international Earth Sciences Information Network (CIESIN) de l'Université de Columbia (États-Unis), prépare un Portail pour les données Ramsar sur les zones humides, une base de données diverse, pluridisciplinaire et multiniveaux, comprenant des données graphiques, spatiales et tabulaires avec accès par moteur de recherche commun.

---

<sup>2</sup> Le Cadre stratégique est disponible sous forme imprimée, dans le Manuel No7 de la Boîte à outils de l'utilisation rationnelle et peut être téléchargé sur le site Web de Ramsar: [http://ramsar.org/key\\_guide\\_list\\_f.htm](http://ramsar.org/key_guide_list_f.htm)

## La Lista de Humedales de Importancia Internacional

La Lista de Ramsar se estableció con arreglo al párrafo 1 del artículo 2 de la Convención sobre los Humedales (Ramsar, Irán, 1971), que dice lo siguiente:

***Cada Parte Contratante designará humedales idóneos de su territorio para ser incluidos en la Lista de Humedales de Importancia Internacional, en adelante llamada “la Lista”, que mantiene la Oficina [secretaría de la Convención] establecida en virtud del Artículo 8.***

Los humedales incluidos en la Lista pasan a formar parte de una nueva categoría en el plano nacional y la comunidad internacional reconoce que tienen un valor significativo no sólo para el o los países donde se encuentran, sino también para la toda la humanidad.

La Convención estipula que “*la selección de los humedales que se incluyan en la Lista deberá basarse en su importancia internacional en términos ecológicos, botánicos, zoológicos, limnológicos o hidrológicos.*” Con los años la Conferencia de las Partes Contratantes ha adoptado criterios más precisos para interpretar el texto de la Convención, así como una *Ficha Informativa de los Humedales de Ramsar* y un *Sistema de Clasificación de tipos de humedales*.

Todas las cuestiones relacionadas con la Lista de Ramsar se encapsularon en la Resolución VII.11 adoptada por la Conferencia de las Partes en mayo de 1999, titulada ***Marco estratégico y lineamientos para el desarrollo de la Lista de Humedales de Importancia Internacional***.<sup>3</sup>

El contenido íntegro del Marco Estratégico descansa en la siguiente “Visión para la Lista de Ramsar”:

***Crear y mantener una red internacional de humedales que revistan importancia para la diversidad biológica mundial y para el sustento de la vida humana debido a las funciones ecológicas e hidrológicas que desempeñan.***

La meta de la Convención es que se incluya en la Lista el mayor número posible de humedales de todo el mundo que cumplan los criterios de importancia internacional; el objetivo a corto plazo es que la Lista contenga por lo menos 2000 sitios para el año 2005, casi el doble del número actual. Para que esta proporción de los recursos de los humedales del mundo queden sujetos al régimen global de Ramsar, la Convención exhorta a todos los Estados a adherirse a ella, caso de que no lo hayan hecho aún, y a realizar esfuerzos significativos para aplicar en su territorio el enfoque sistemático de desarrollo de la Lista adoptado en el *Marco Estratégico*.

Todos los datos facilitados por las Partes respecto de cada uno de sus sitios Ramsar se introducen en la Base de Datos sobre los Sitios Ramsar, administrada por Wetlands International en virtud de un contrato con la Convención. El Center for International Earth Sciences Information Network (CIESIN), de la Universidad de Columbia (E.U.A.), está desarrollando actualmente la *Ramsar Wetland Data Gateway*, una variada base de recursos pluridisciplinarios y de niveles múltiples, comprendidos datos espaciales, tabulares y gráficos, a los que se podrá acceder a través de una interfaz de búsqueda común.

---

<sup>3</sup> El Marco Estratégico está disponible en versión impresa como Manual No. 7 de la serie Herramientas para el Uso Racional y en la página Web de Ramsar en: [http://ramsar.org/key\\_guide\\_list\\_s.htm](http://ramsar.org/key_guide_list_s.htm).

<sup>5</sup> Issyk-kul Lake was designated for the Ramsar List by the former Soviet Union in 1976 and added to the Montreux Record in 1990. The site was designated in 2002 by the Kyrgyz Republic, and discussions are presently under way with Kyrgyz authorities about its present status vis-à-vis the Montreux Record.
