0	0	General comment: For IPLCs from the seven geographical regions is crucial and necessary to participate fully and effectively in the whole participatory process for the preparation of the post-2020 global biodiversity framework. There is the need to work at local, national and international levels on biodiversity matters to consider these inputs in the global biodiversity framework. IPLCS should have an effective role in the National Biodiversity Plans taking in consideration that IPLCs are the guardians and keepers of Mother Earth an all her beings (ecosystems).  IPLCs should have the necessary funding to participate in getting the Vision 2050 "Living in Harmony with Nature", in the implementation of the Strategic Plan on Biodiversity 2020, regional and global workshops, consultations and different CBD Convention and its protocols meetings as well as other relevant meetings.  For IPLCs the participation of men and women and youth in the CBD meetings is essential. This intercultural participation is being made under the wise guidance of our elders, recognizing the women role as seeds keepers and cultural keepers and following our customary laws and biocultural protocols.
