Footnote area: (Footnote references + texts)

EXPLANATIONS

A. FOOTNOTE REFERENCES:

1) Footnote references should be entered in the <u>footnote columns</u> (highlighted in yellow), in the data area (E4:V102). Footnote references should be "alphabetical", separated by a right brain

e.g.: a)

b)

c)

Please do **NOT** use any other format for the footnote references!

- 2) You can enter more than one footnote reference next to a value. e.g.: a)b)e)h) When doing so, it is not necessary to leave a space between the references, since the right bracket is already serving as separator.
- 3) Given the limited width of the footnote reference columns, it is possible that some of your footnote references will not be visible. However, this will have no impact on the processing of your data and metadata.

B. FOOTNOTE TEXTS

- 1) The yellow highlighted area to the right of this text, corresponds to the <u>FOOTNOTE</u>

 AREA (E103:E138). In this area you can enter the **footnote text(s)** corresponding to the <u>footnote reference(s)</u> which you have entered in the **footnote columns** (data area E4:V1
- 2) Footnote texts **should be preceded** by the corresponding footnote reference, e.g.
 - e.g.: a)This is the first footnote text referring to footnote reference a) in the data area.
 b)This is the second footnote text referring to footnote reference b) in the data area.
 c) etc......
- 3) When inputting the footnote texts it is <u>not necessary</u> to leave a space between the footnote reference and the footnote text, since the right bracket is already serving as separator.
- 4) Please use **one** (1) **line only** per footnote text, even if it is very long.
- 5) In case you **delete** a <u>footnote reference</u> **entirely** from the <u>data area</u> (i.e. it no longer figures anywhere in the data area), please do **not forget** to also **delete** the corresponding footnote texte in the footnote area
