

22 May 2012
INTERNATIONAL DAY
FOR BIOLOGICAL DIVERSITY
Marine Biodiversity

Cetacean biodiversity in the Mediterranean Sea

The 22nd of May 2012 in Rome at the exhibition room "la Nave" in Via G. Sommeiller 7 will be held an open symposium, organized by the Accademia del Leviatano, on the following topic:

Cetacean biodiversity in the Mediterranean Sea: ecology and distribution

The meeting, held within the celebration of IDB 2012, will focus on the presence, distribution, ecology, relationship with environmental parameters, maritime traffic and awareness of the different species of cetacean present in the North-western Mediterranean Sea.

The information is gathered from the network, coordinated by the Italian Institute for Environmental Protection and Research (ISPRA), that uses passenger ferries as research platform to survey cetacean, and to raise awareness, in the Mediterranean Sea.

Free entrance
