Global Target on Invasive alien species

Not all parties have the same capacities, knowledge and tools to address invasive alien species and implement T6

Toolkit provides information to guide actions and align them with the global target

It is not mandatory but a tool to provide support

CBD Toolkit on Invasive Alien Species

Provides actions to facilitate the implementation of T6:

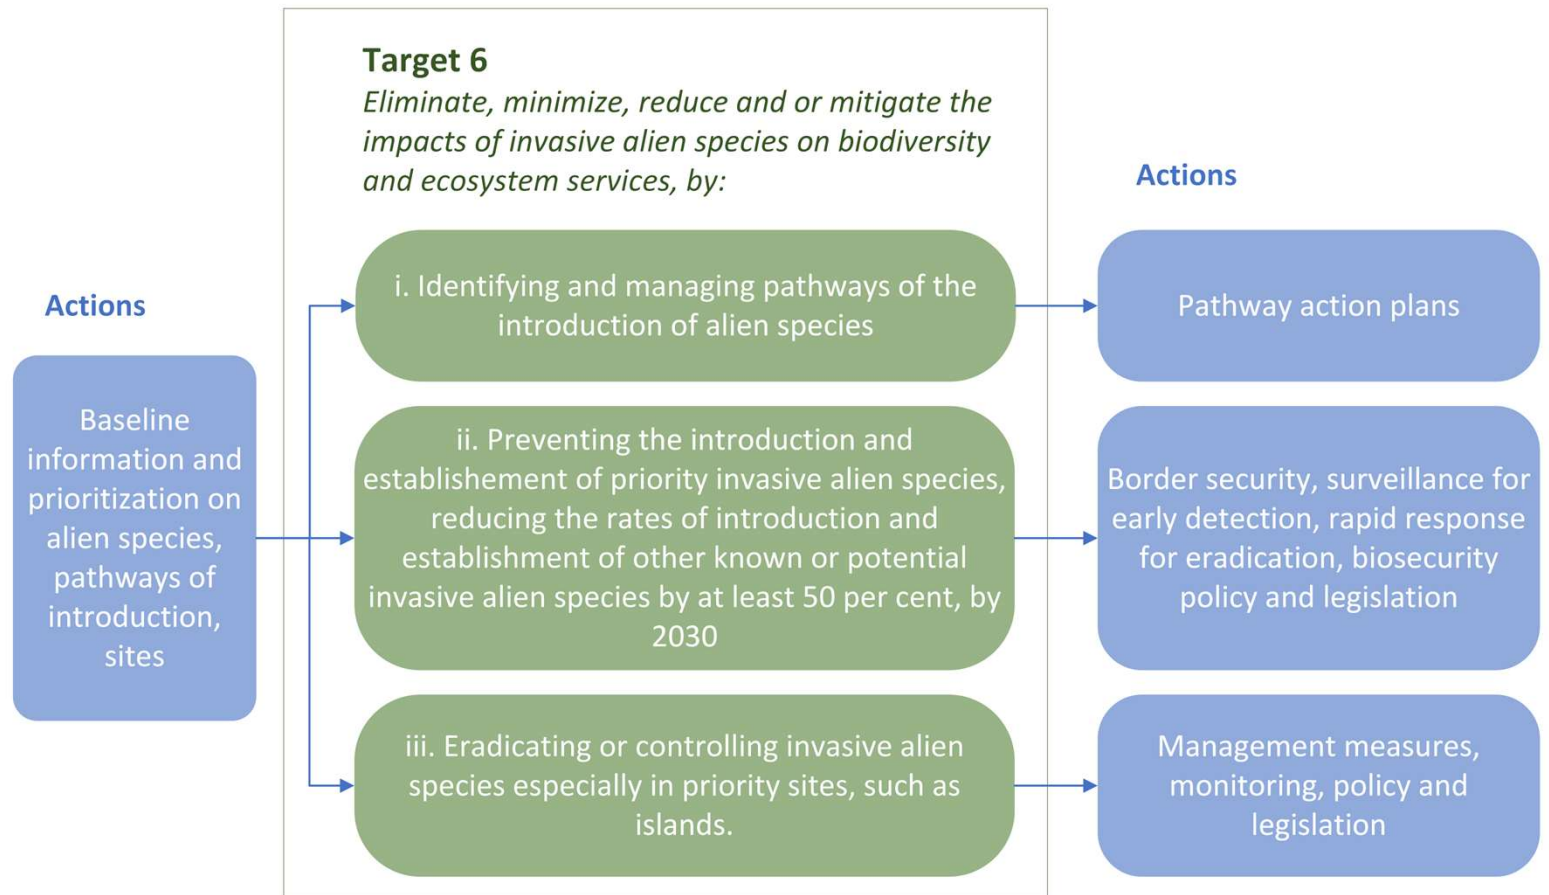

- Background on IAS and on IAS under CBD
- What do we need to know to implement T6
- What actions can be implemented

<https://www.cbd.int/invasive/cbdtoolkit>

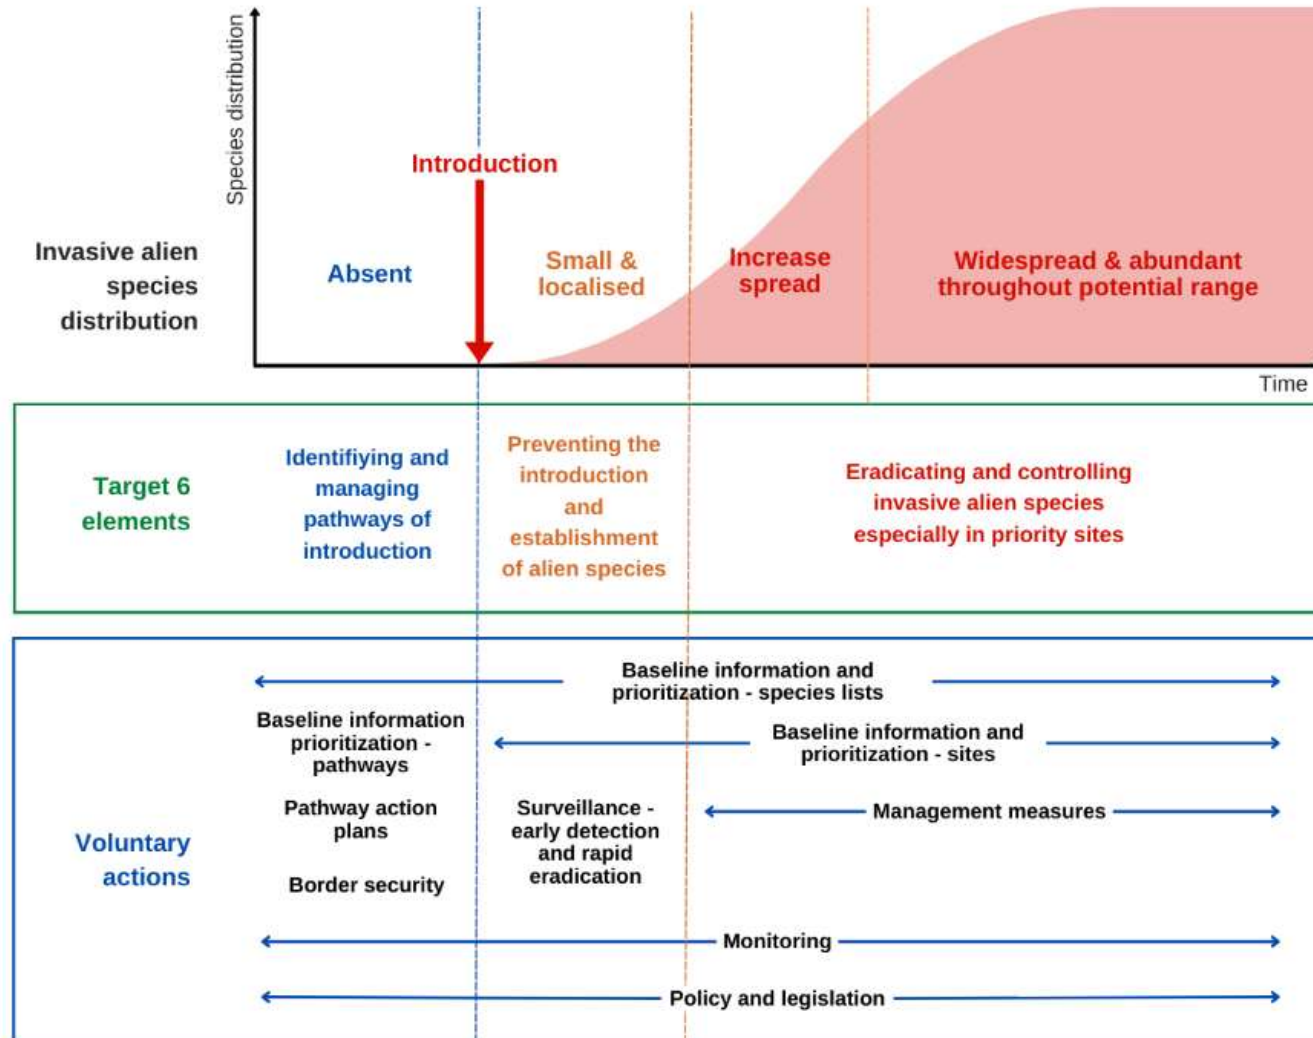

What actions do parties need to address Target 6?

What do we need to know to meet T6?

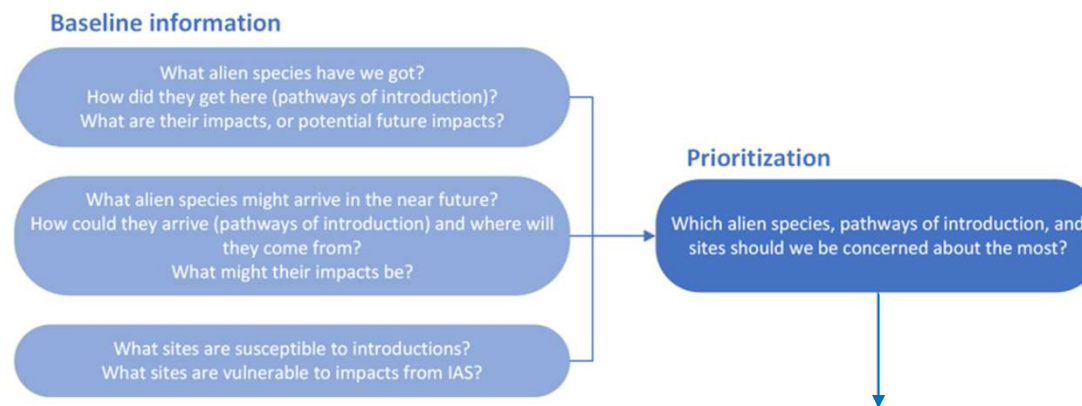

Baseline information

Who are the main invasive alien species?

How are they getting there?

Where are the susceptible and the sensitive sites?

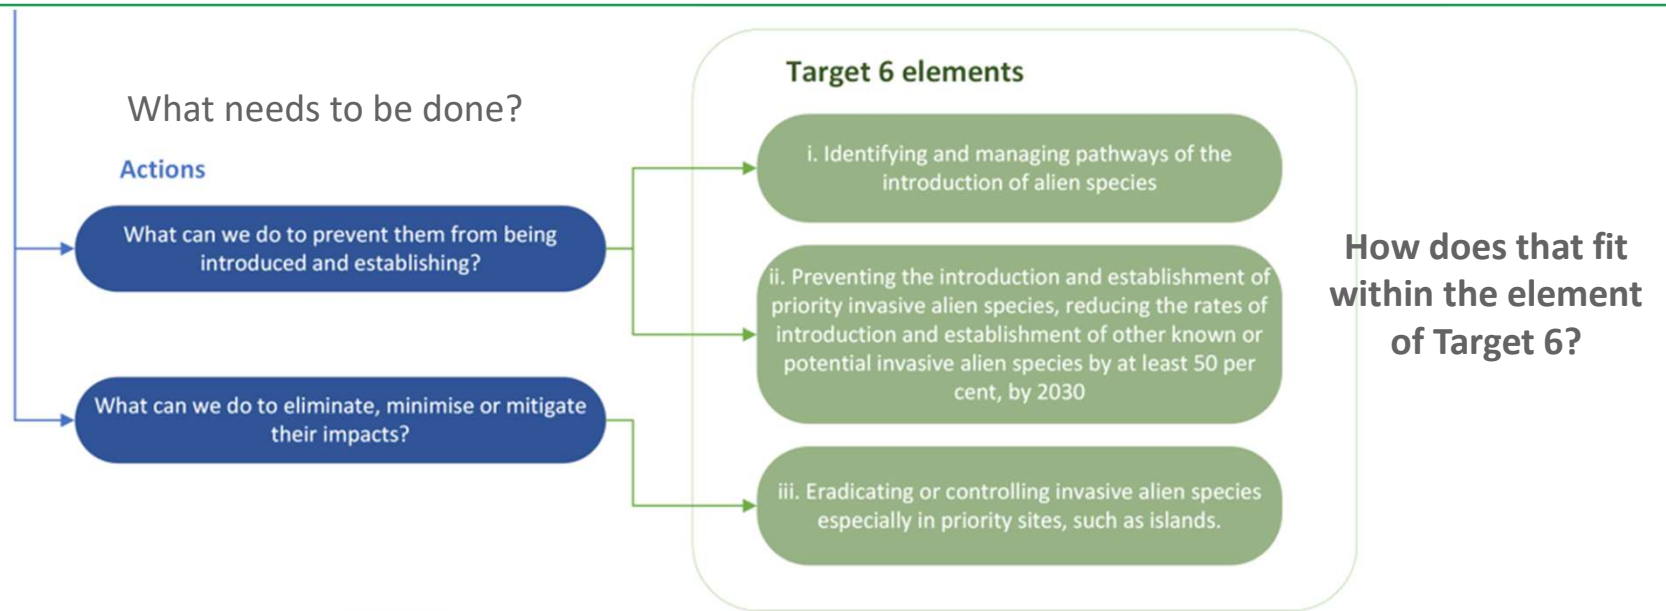

How do we decide what to address?

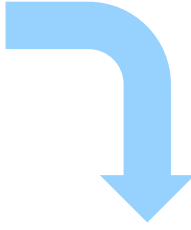

Actions

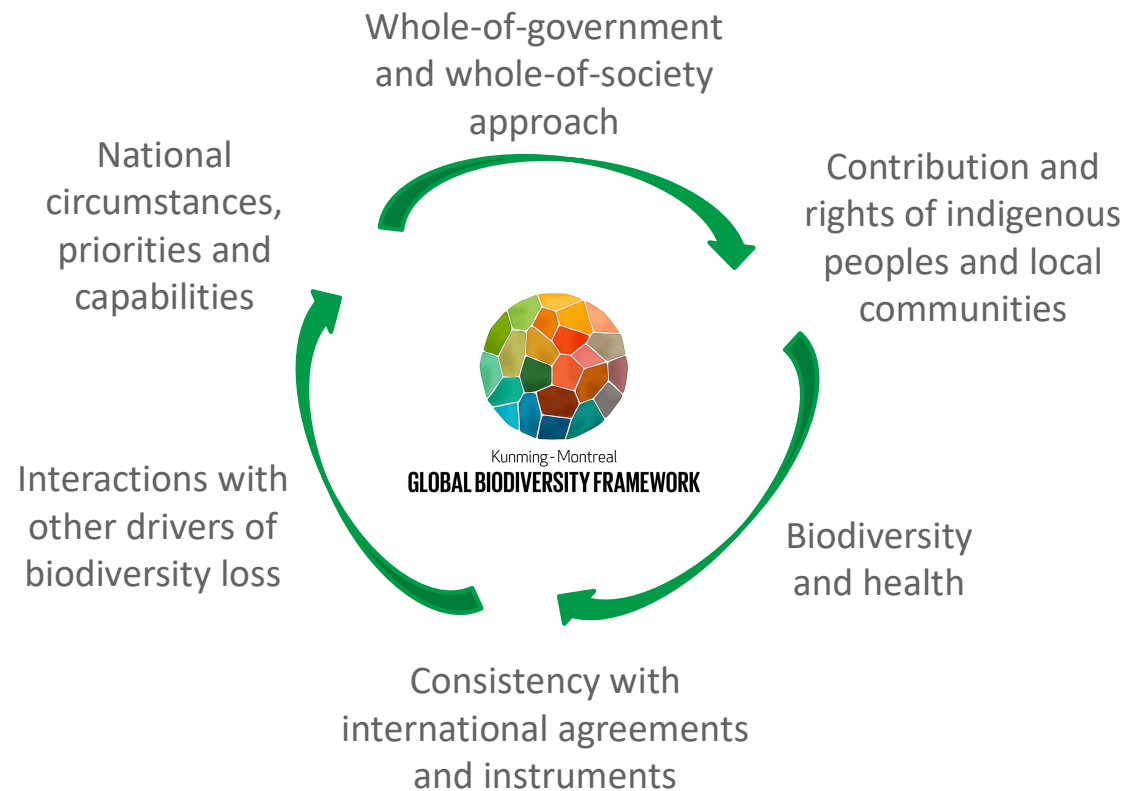

Toolkit – implementation of actions

- Nine actions separated out according to T6 elements
 - Information and prioritization
 - IAS
 - Pathways of introduction
 - Sites
 - Pathway Action Plans
 - Border security
 - Surveillance for early detection
 - Rapid response for eradication
 - Biosecurity policy and legislation
 - Management measures
 - Monitoring
 - Policy and legislation
- 
- ‘Guiding questions’ to help frame action
 - Summary of what needs to be implemented
 - Key resources to support implementation

Additional considerations for implementation

Outline cross-cutting actions and how they can support Target 6 (Section C of GBF)

Additional considerations for implementation

Relationship with other targets of the Kunming Montreal Global Biodiversity Framework

Supporting materials of the toolkit

IAS toolkit glossary of key invasive alien species related terms

Resources to support the development and implementation of actions towards target 6

Guidance for the development and implementation of a **National Invasive Species Strategy and Action Plan (NISSAP)**
