

MAIN INVASIVE ALIEN SPECIES IN THE FSM

- Little Fire Ant
- African Giant Snail
- African Tulip
- Mango Fruit Fly

WHAT MADE FSM TO IDENTIFY THEM AS “MAIN”

- A serious threat to the ecosystem
- Reduce the quality and market value
- Over grow & outcompete other native species

STRATEGIES USED TO ADDRESS INVASIVE SPECIES

- Invasive Species Taskforces
- Port Surveillance and monitor
- Awareness
- Local initiatives

MAIN CHALLENGES WITH IAS MANAGEMENT

- Lack of Operation Capacity:
 - Insufficient resources
 - Trained personnel
 - Infrastructure limit
 - Funding

T6 OF THE KUNMING MONTREAL GLOBAL BIODIVERSITY FRAMEWORK

- Strategic action plan and framework
- Capacity building and resources:
 - Financial assistance
 - Strengthen port surveillances
 - Control and restoration of the ecosystem

THANK YOU
