Goal B. Nature's contributions to people are valued, maintained or enhanced through conservation and sustainable use supporting the global development agenda for the benefit of all.		
Objective: Nature's capacity to contribute to people's lives, wellbeing and livelihoods is reliant on the area and integrity of both natural and managed ecosystems and their constituent species, and within-species genetic diversity and between-species phylogenetic diversity. Thus the need to maintain, and where appropriate, enhance nature's contributions to people provides a strong rationale for the conservation and sustainable use of biodiversity. In particular, actions to achieve benefits to people from nature's contributions through ecosystem-based approaches, disaster risk-reduction, sustainable management of wild species, sustainable agricultural ecosystems, regulation of air and water, and urban green spaces, will be critical to the achievement of the 2050 Vision.		
Milestones	Component	Indicators (Headline in bold)
<p>Milestone B.1 Nature and its contributions to people are fully accounted and inform all relevant public and private decisions.</p> <p>Milestone B.2 The long-term sustainability of all categories of nature's contributions to people is ensured, with those currently in decline restored, contributing to each of the relevant Sustainable Development Goals.</p>	<p>B.1 Nature and its contributions to people are fully accounted for</p> <p>B.2 Long-term sustainability of nature's contributions to people is ensured</p> <p>B.3 Nature's contributions to people in decline restored</p> <p>B.4 Contribution to relevant Sustainable Development Goals</p>	<p>B.0.1 National environmental economic accounts of ecosystem services</p> <p>B.2.1 Nature's regulating contributions including climate regulation, disaster prevention and other (from the environmental economic accounts)</p> <p>B.3.1 Nature's material contributions including food, water and others (from the environmental economic accounts)</p> <p>B.4.1 Nature's non-material contributions including cultural (from the environmental economic accounts)</p>
Linkages		
Objectives of the CBD – conservation of biological diversity, sustainable use of the components of biological diversity		
GBF targets – all targets		
Sustainable Development Goals Goal 2: End hunger, achieve food security and improved nutrition and promote sustainable agriculture Goal 3: Ensure healthy lives and promote well-being for all at all ages Goal 6: Ensure availability and sustainable management of water and sanitation for all Goal 12: Ensure sustainable consumption and production patterns Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development Goal 15: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss		
GBO-5 pathways Essential for the achievement of all transitions to sustainable pathways identified in GBO-5
