#stopthesame Campaign is a global youth movement pushing the world towards a just, transformative change for our planet.

Underlining how the current course of action in an already degraded present will lead to an even more degraded and hopeless future for the youth, #StopTheSame urges those in power, decision-makers, influencers and all people to pursue a whole of society, systemic, transformative change. Via this campaign, GYBN invites every individual and organisation to embark in a journey towards valuing diversity in all its forms, and drawing a more sustainable future for people and the planet. #Build Back Diverse.
